The Routledge Companion to Race and Ethnicity Stephen M. Caliendo 2020-09 The second edition of *The Routledge Companion to Race and Ethnicity* offers readers a broad overview of scholarly exploration of the ways that humans have organized themselves (and have been organized) according to racial and ethnic divisions. More than 80 scholars from around the world and representing multiple academic traditions contribute entries to this accessible yet sophisticated volume that addresses contemporary issues in historical context. The first half of the book challenges readers to grapple with some of the most controversial aspects of categorization, prejudice and discrimination through focused essays ranging from the notion of whiteness to the supposed biological rationale for racial categorization. The second half is comprised of 75 shorter entries on specialized concepts, persons and groups that are crucial to understanding these issues. Taken as a whole, this volume provides a broad, multi-disciplinary and global overview of issues that continue to provide challenges to notions of equality and justice.

Race, Ethnicity, Crime, and Justice Akwasi Owusu-Bempah 2020-09-25 *Race, Ethnicity, Crime, and Justice: An International Dilemma*, 2nd Edition, takes a unique comparative approach to the exploration of race- and ethnicity-related justice issues in five countries around the world. Using the colonial model as a theoretical lens, Owusu-Bempah and Gabbidon analyse data from Great Britain, the United States, Canada, Australia, and South Africa. These international case studies help students contextualize race and justice issues within and across nations. Concise historical framing illuminates today's racial dynamics in these diverse justice systems, and accessible theory grounds the comparison of crime and justice data from the early 21st century with current statistics. A new concluding chapter revisits the question of where these nations fit in the global context of state and non-state actors and of ethnic and racial justice issues. This new edition is suitable for use as a core or supplemental text for advanced undergraduates and early graduate courses on race and crime, minorities and criminal justice, diversity in criminal justice, and comparative justice systems. It is also appropriate

for use in sociology and ethnic studies courses that focus on race and crime.

Race, Ethnicity, and Place in a Changing America, Third Edition John W. Frazier 2017-01-12 Uses both historical and contemporary case studies to examine how race and ethnicity affect the places we live, work, and visit. This book examines major Hispanic, African, and Asian diasporas in the continental United States and Puerto Rico from the nineteenth century to the present, with particular attention on the diverse ways in which these immigrant groups have shaped and reshaped American places and landscapes. Through both historical and contemporary case studies, the contributors examine how race and ethnicity affect the places we live, work, and visit, illustrating along the way the behaviors and concepts that comprise the modern ethnic and racial geography of immigrant and minority groups. While primarily addressed to students and scholars in the fields of racial and ethnic geography, these case studies will be accessible to anyone interested in race-place connections, race-ethnicity boundaries, the development of racialization, and the complexity of human settlement patterns and landscapes that make up the United States and Puerto Rico. Taken together, they show how individuals and culture groups, through their ideologies, social organization, and social institutions, reflect both local and regional processes of place-making and place-remaking that occur within and beyond the continental United States.

Eliminating Health Disparities National Research Council 2004-09-09 Disparities in health and health care across racial, ethnic, and socioeconomic backgrounds in the United States are well documented. The reasons for these disparities are, however, not well understood. Current data available on race, ethnicity, SEP, and accumulation and language use are severely limited. The report examines data collection and reporting systems relating to the collection of data on race, ethnicity, and socioeconomic position and offers recommendations.

Advancing Race and Ethnicity in Education Richard Race 2014-05-19 This timely collection focuses on domestic and international education research on race and ethnicity. As co-conveners of the British Education Research Associations (BERA) Special Education Group on Race and Ethnicity (2010-2013), Race and Lander are advocates for the promotion of race and ethnicity within education. With its unique structure and organisation of empirical material, this volume collates contributions from global specialists and fresh new voices to bring cutting-edge research and findings to a multi-disciplinary marker which includes education, sociology and political studies. The aim of this book is to promote and advocate a range of contemporary issues related to race, ethnicity and inclusion in relation to pedagogy, teaching and learning.

Race, Ethnicity, and Language Data Institute of Medicine 2009-12-30 The goal of eliminating disparities in health care in the United States remains elusive. Even as quality improves on specific measures, disparities often persist. Addressing these disparities must begin with the fundamental step of bringing the nature of the disparities and the groups at risk for those disparities to light by collecting health care quality information stratified by race, ethnicity and language data. Then attention can be focused on where interventions might be best applied, and on planning and evaluating those efforts to inform the development of policy and the application of resources. A lack of standardization of categories for race, ethnicity, and language data has been suggested as one obstacle to achieving more widespread collection and utilization of these data. *Race, Ethnicity, and Language Data* identifies current models for collecting and coding race, ethnicity, and language data; reviews challenges involved in obtaining these data, and makes recommendations for a nationally standardized approach for use in health care quality improvement.

Modern Peoplehood John Lie 2004-07-27 Race, ethnicity, and nation, Lie argues, are modern notions, associated with the rise of the modern state, the industrial economy, and Enlightenment ideas. The state is

responsible for the development and nurturing of feelings of belonging associated with ethnic, racial, and national identity; but also for racial and ethnic conflict, even genocide.

Healey 2018-02-13 The authors are proud sponsors of the 2020 SAGE Keith Roberts Teaching Innovations Award—enabling graduate students and early career faculty to attend the annual ASA pre-conference teaching and learning workshop. The Eighth Edition retains the same use of sociological theory to tell the story of race and other socially constructed inequalities in the U.S. and for examining the variety of experiences within each minority group, particularly differences between those of men and women. This edition also puts greater emphasis on intersectionality, gender, and sexual orientation that will offer students a deeper understanding of diversity. New to this Edition New co-author Andi Stepnick adds fresh perspectives from her teaching and research on race, gender, social movements, and popular culture. The text has been thoroughly updated from hundreds of new sources to reflect the latest research, current events, and changes in U.S. society. 80 new and updated graphs, tables, maps, and graphics draw on a wide range of sources, including the U.S. Census, Gallup, and Pew. 35 new internet activities provide opportunities for students to apply concepts by exploring oral history archives, art exhibits, video clips, and other online sites.

Race and Ethnicity in Multi-ethnic Schools James Ryan 1999 This text explores the representation of race/ethnicity in a multiethnic school. Employing a critical case study approach, it appeals to the wider social context to explain the unequal struggle over the meaning of race and ethnicity in the school. In doing so it examines how stereotyping, curriculum, identity and language practices provide advantages for some and penalize others. The book also provides suggestions for how educators might find ways to introduce discourses that make it possible for traditionally marginalized students and members of the community to have their voices heard and to shape meanings that work in their interest.

Outside America Dan Moos 2005 A new study of those excluded from the national narrative of the West. Dan Moos challenges both traditional and revisionist perspectives in his exploration of the role of the mythology of the American West in the creation of a national identity. While Moos concurs with contemporary scholars who note that the myths of the American West depended in part upon the exclusion of certain groups - African Americans, Native Americans, and Mormons - he notes that many scholars, in their eagerness to identify and validate such excluded positions, have given short shrift to the cultural power of the myths they seek to debunk. That cultural power was such, Moos notes, that these disenfranchised groups themselves sought to harness it to their own ends through the active appropriation of the terms of those myths in advocating for their own inclusion in the national narrative. that, because the construction of American culture was never designed to accommodate these outsiders, their writings display a division between their imagined place in the narrative of the nation and their effacement within the real West marked by intolerance and inequality.

Race, Ethnicity and Nation Peter Wade 2007 "Race, ethnicity and nation are all intimately linked to family and kinship, yet these links deserve closer attention than they usually get in social science, above all when family and kinship are changing rapidly in the context of genomic and biotechnical revolutions. Drawing on data from assisted reproduction, transnational adoption, mixed race families, Basque identity politics and post-Soviet nation-building, this volume provides new and challenging ways to understand race, ethnicity and nation."-- Back cover

Constructing "race" and "ethnicity" in America Dvora Yanow 2003 This work examines what is meant by the terms "race" and "ethnicity" and examines why policy makers continue to use them as if they had some scientific standing. It argues that "race" and "ethnicity" are socially constructed concepts, not objective, scientifically grounded variables.

Beyond Black and White Stephanie Cole 2004 This work brings up-to-date perspectives to the oversimplification of racial categories and new insight into the complexity of social relationships in these two important regions. What We Now Know About Race and Ethnicity Michael Banton†

2015-10-01 Attempts of nineteenth-century writers to establish "race" as a biological concept failed after Charles Darwin opened the door to a new world of knowledge. Yet this word already had a place in the organization of everyday life and in ordinary English language usage. This book explains how the idea of race became so important in the USA, generating conceptual confusion that can now be clarified. Developing an international approach, it reviews references to "race," "racism," and "ethnicity" in sociology, anthropology, philosophy, and comparative politics and identifies promising lines of research that may make it possible to supersede misleading notions of race in the social sciences.

The Handbook of Race, Ethnicity, Crime, and Justice Ramiro Martinez, Jr. 2018-06-19 This Handbook presents current and future studies on the changing dynamics of the role of immigrants and the impact of immigration, across the United States and industrialized and developing nations. It covers the changing dynamics of race, ethnicity, and immigration, and discusses how it all contributes to variations in crime, policing, and the overall justice system. Through acknowledging that some groups, especially people of color, are disproportionately influenced more than others in the case of criminal justice reactions, the "War on Drugs", and hate crimes; this Handbook introduces the importance of studying race and crime so as to better understand it. It does so by recommending that researchers concentrate on ethnic diversity in a national and international context in order to broaden their demographic and expand their understanding of how to attain global change. Featuring contributions from top experts in the field, The Handbook of Race and Crime is presented in five sections—An Overview of Race, Ethnicity, Crime, and Justice; Theoretical Perspectives on Race and Crime; Race, Gender, and the Justice System; Gender and Crime; and Race, Gender and Comparative Criminology. Each section of the book addresses a key area of research, summarizes findings or shortcomings whenever possible, and provides new results relevant to race/crime and justice. Every contribution is written by a top expert in the field and based on the latest research. With a sharp focus on contemporary race, ethnicity, crime, and justice studies, The Handbook of Race and Crime is the ideal reference for advanced undergraduate students, graduate students, and scholars interested in the disciplines such as Criminology, Race and Ethnicity, Race and the Justice System, and the Sociology of Race.

A Mixed Race Frank Shuffelton 1993-04-29 This collection of new essays enters one of the most topical and energetic debates of our time—the subject of ethnicity. The recent vigorous debates being waged over questions raised by the phenomenon of multiculturalism in America highlight the fact that American culture has arisen out of an unusually rich and interactive ethnic mix. The essays in *A Mixed Race* suggest that American society was inescapably multicultural from its very beginnings and that this representation of cultural differences fundamentally defined American culture. While recent scholarship has looked extensively at the ethnic formation of modern American culture, this study focuses on the eighteenth century and colonial American values that have been previously overlooked in the debate, arguing that a culture shaped by responses to ethnic and racial difference is not merely

a modern circumstance but one at the base of American history. Written by a group of first-class contributors, the essays in this collection discuss the representation of cultural differences between European immigrants and Native Americans, the circumstances of the first African-American autobiographical narratives, rhetorical negotiations among different European-American cultural groups, ethnic representation in the genre literature of jest books and execution narratives, and the ethnic conceptions of Michel de Crevecoeur, Phillis Wheatley, and Thomas Jefferson. *A Mixed Race* offers agile and original yet scholarly readings of ethnicity and ethnic formation from some of our best critics of early American culture. Moving from questions of race and ethnicity to varieties of ethnic representation, and finally to individual confrontations, this volume sheds light on the confrontations of ethnically diverse peoples, and launches a timely, full-scale investigation of the construction of American culture.

Understanding Racial and Ethnic Differences in Health in Late Life National Research Council 2004-09-08 As the population of older Americans grows, it is becoming more racially and ethnically diverse. Differences in health by racial and ethnic status could be increasingly consequential for health policy and programs. Such differences are not simply a matter of education or ability to pay for health care. For instance, Asian Americans and Hispanics appear to be in better health, on a number of indicators, than White Americans, despite, on average, lower socioeconomic status. The reasons are complex, including possible roles for such factors as selective migration, risk behaviors, exposure to various stressors, patient attitudes, and geographic variation in health care. This volume, produced by a multidisciplinary panel, considers such possible explanations for racial and ethnic health differentials within an integrated framework. It provides a concise summary of available research and lays out a research agenda to address the many uncertainties in current knowledge. It recommends, for instance, looking at health differentials across the life course and deciphering the links between factors presumably producing differentials and biopsychosocial mechanisms that lead to impaired health.

Race, Ethnicity, and Place in a Changing America, Third Edition John W. This book examines major Hispanic, African, and Asian diasporas in the continental United States and Puerto Rico from the nineteenth century to the present, with particular attention on the diverse ways in which these immigrant groups have shaped and reshaped American places and landscapes. Through both historical and contemporary case studies, the contributors examine how race and ethnicity affect the places we live, work, and visit, illustrating along the way the behaviors and concepts that comprise the modern ethnic and racial geography of immigrant and minority groups. While primarily addressed to students and scholars in the fields of racial and ethnic geography, these case studies will be accessible to anyone interested in race-place connections, race-ethnicity boundaries, the development of racialization, and the complexity of human settlement patterns and

landscapes that make up the United States and Puerto Rico. Taken together, they show how individuals and culture groups, through their ideologies, social organization, and social institutions, reflect both local and regional processes of place-making and place-remaking that occur within and beyond the continental United States.

The Bubbling Cauldron 1995

Race and Ethnicity in Comparative Perspective Georgia A. Persons 2018-04-24 Contradictory forces are at play at the close of the twentieth century. There is a growing closeness of peoples fueled by old and new technologies of modern aviation, digital-based communications, new patterns of trade and commerce, and growing affluence of significant portions of the world's population. Television permits individuals around the world to learn about the cultures and lifestyles of peoples of physically distant lands. These developments give real meaning to the notion of a global village. Peoples of the world are growing closer in new and increasingly important ways. Nonetheless, there are disturbing signs of a growing awareness of ethnic differences in all parts of the world the United States included and a concomitant rise in ethnic-based conflicts, many of them extraordinarily violent in nature. Fear, resentment, intolerance, and mistreatment of the "other" abound in world news accounts. Not only does this phenomenon pose an interesting juxtaposition to the concept of the emergent glo-bal village, but its emergence in the post-cold war era internationally and the post-civil rights era in the United States raises significant and compelling questions. Why are such conflicts occurring now? How do analysts explain these developments? The essays in *Race and Ethnicity in Comparative Perspective* lucidly explore some of the complexities of the persistence and re-emergence of race and ethnicity as major lines of divisiveness around the world. Contributors analyze manifestations of race-based movements for political empowerment in Europe and Latin America as well as racial intolerance in these same settings. Attention is also given to the conceptual complexi-ties of multidimensional and shared cultural roots of the overlapping phenomena of ethnicity, nationalism, identity, and ideology. The book greatly informs discussions of race and ethnicity in the international context and provides an interesting perspective against which to view America's changing problem of race. *Race and Ethnicity in Com-parative Perspective* is a timely, thought-provoking volume that will be of immense value to ethnic studies specialists, African American studies scholars, political scientists, his-torians, and sociologists.

Race, Ethnicity, And Nationality In The United States Paul Wong 2021-09-02 This book is intended for use in advanced undergraduate and graduate-level courses on race and ethnicity and on diversity in America. It was first con- ceived as a collective project of the Research and Resident Scholar Program in Comparative Race Relations at Washington State University, which was established in 1994 with support from the Rockefeller Foundation. A number of the participating authors are established scholars in racial/ethnic studies, and several have published award-winning bestsellers. Others are relative newcomers to the field who were invited to join the project because they were doing important work on less well covered topics, such as relations between African Americans and Chicano/Latino Americans.

Race-ethnicity and Society Benjamin Bernard Ringer 1989 Benjamin Ringer and Elinor Lawless argue that the treatment of racial minorities in America has been qualitatively different from that experienced by white immigrants; that racism is not a mere aberration in American society -- largely confined to the South -- but built into the very foundations of the society.

Below the Surface Deborah Rivas-Drake 2019-02-05 A guide to the latest research on how young people can develop positive ethnic-racial identities and strong interracial relations Today's young people are growing up in an increasingly ethnically and racially diverse society. How do we help them navigate this world productively, given some of the seemingly intractable conflicts we constantly hear about? In *Below the Surface*, Deborah Rivas-Drake and Adriana Umaña-Taylor explore the latest research in ethnic and racial identity and interracial relations among diverse youth in the United States. Drawing from multiple disciplines, including developmental psychology, social psychology, education, and sociology, the authors demonstrate that young people can have a strong ethnic-racial identity and still view other groups positively, and that in fact, possessing a solid ethnic-racial identity makes it possible to have a more genuine understanding of other groups. During adolescence, teens reexamine, redefine, and consolidate their ethnic-racial identities in the context of family, schools, peers, communities, and the media. The authors explore each of these areas and the ways that ideas of ethnicity and race are implicitly and explicitly taught. They

provide convincing evidence that all young people—ethnic majority and minority alike—benefit from engaging in meaningful dialogues about race and ethnicity with caring adults in their lives, which help them build a better perspective about their identity and a foundation for engaging in positive relationships with those who are different from them. Timely and accessible, *Below the Surface* is an ideal resource for parents, teachers, educators, school administrators, clergy, and all who want to help young people navigate their growth and development successfully.
