Race, Class and the Changing Division of Labour Under Apartheid Owen Crankshaw 2002-06-01 As the only comprehensive empirical analysis of the changing racial and occupational structure of the urban workforce in South Africa under apartheid, this study will make an invaluable contribution to our understanding of the complex inter-relations of past and present racial inequality and economic development in South Africa. Identity and Affect John R. Campbell 1999 A rethinking of popular political movements, this book looks at new, emerging, mass visions and analyses their impact and potential in new ways.

Africa's 'agitators' Jonathan Derrick 2008 The period between the two World Wars were troubling years for colonial empire. Individuals and organizations called for major reforms and an end to white supremacy and colonial rule, contributing first to local unrest and protest and then to anticolonial activity not only in Africa but the United States and

Europe as well. In this ... history, Jonathan Derrick recounts the opposition to British and French rule practised both by Africans living on the continent and by European anticolonialists and members of the Black Diaspora. He covers campaigns waged by an early incarnation of the ANC and other groups in South Africa who fought against legal and other aspects of white minority rule. He also analyses the Kikuyu protests against the settler regime in Kenya; Marcus Garvey's African American movement and its role in sparking interest in Africa; the Etoile Nord Africaine, formed mainly by Algerians in France, that called for the independence of French North Africa; protests led by European critics against forced labor in Kenya and French Equatorial Africa; and the activity of small militant groups like the Ligue de Defense de la Race Negre (LDRN) in France and George Padmore's International African Service Bureau (IASB) in Britain. Derrick also examines the role of the Comintern and Western Communist parties that were opposed to Western colonialism and ready to support militant action against it. He shows that, although colonial rulers greatly feared the specter of Communism in Africa, actual Communist activity was in fact quite small. The onset of the Second World War pushed colonial issues to the background, but as Derrick argues, in the long term the anticolonialists

of the interwar era helped pave the way for later decolonisation.

Quest for Equality Robert G. Gregory 1993 A Study Of The Role Of Immigrants From The Indian Subcontinent In The Development Of Political Consciousness In Kenya, Tanganyika, Uganda And Zanzibar. The Author Believes That With Their Great Economic Strength, Industriousness And Ability To Articulate, The Asians Played A Pivotal Role In The Transition Of These Countries From Colonies To Independent States. This Is Apparently The First Book Which Comprehensively Covers The Role Of Asians In East African History Until Independence Came To These Territories.

Framing a Radical African Atlantic Holger Weiss 2013-11-14 In Framing a Radical African Atlantic Holger Weiss presents the first analysis of the International Trade Union Committee of Negro Workers and the attempts by the Communist International to infiltrate in the Caribbean and Sub-Saharan Africa during the interwar period.

Farm Labor Struggles in Zimbabwe Blair Rutherford 2016-12-19 In the early twenty-first century, white-owned farms in Zimbabwe were subject to large-scale occupations by black urban dwellers in an increasingly violent struggle between national electoral politics, land reform, and contestations over democracy. Were the black occupiers being freed from racist bondage as cheap laborers by the state-supported massive land redistribution, or were they victims of state violence who had been denied access to their homes, social services, and jobs? Blair Rutherford examines the unequal social and power relations shaping the lives, livelihoods, and struggles of some of the farm workers during this momentous period in Zimbabwean history. His analysis is anchored in the time he spent on a horticultural farm just east of Harare, the capital of Zimbabwe, that was embroiled in the tumult of political violence associated with jambanja, the democratization movement. Rutherford complicates this analysis by showing that there was far more in play than political oppression by a corrupt and authoritarian regime and a movement to rectify racial and colonial land imbalances, as dominant

narratives would have it. Instead, he reveals, farm worker livelihoods, access to land, gendered violence, and conflicting promises of rights and sovereignty played a more important role in the political economy of citizenship and labor than had been imagined.

Rethinking Labour in Africa, Past and Present Lynn Schler 2013-09-13 This book offers a broad range of perspectives on major transformations in the research of labor in Africa contexts over the last twenty years. This is a groundbreaking work by social scientists and historians; adopting innovative paradigms in the study of African laborers, working classes and economies, it moves away from stringent Marxist perspectives towards more localized and fluid conceptions of materiality and productivity. Against the backdrop of increasing mobility of labor and capital, the authors demonstrate the need for a simultaneous consideration of local, national and transnational contexts. The collection of essays provides multiple perspectives on how African workers have negotiated changes and exploited opportunities in increasingly globalized workplaces, while at the same time confronting the impact of global capitalist expansion on local settings in Africa. This book was previously published as a Special Issue of African Identities.

The Development of an African Working Class Richard Sandbrook 2023-08-18 Originally published in 1975, this volume reassesses the historical, political and social role of African workers and examines the extent to which a working class has formed and undertaken collective action in various parts of Africa. The book is based on primary historical sources or first-hand experiences. The contributors are linked by their belief in the legitimacy of action by organised workers to create a more

just society.

Decolonization and African Society Frederick Cooper 1996-08-28 This detailed and authoritative volume changes our conceptions of 'imperial' and 'African' history. Frederick Cooper gathers a vast range of archival sources in French and English to achieve a truly comparative study of colonial policy toward the recruitment, control, and institutionalization of African labor forces from the mid 1930s, when the labor question was first posed, to the late 1950s, when decolonization was well under way. Professor Cooper explores colonial conceptions of the African worker and shows how African trade union and political leaders used the new

language of social change to claim equality and a share of power. This helped to persuade European officials that the 'modern' Africa they imagined was unaffordable. Britain and France could not reshape African society. As they left the continent, the question was how they had affected the ways in which Africans could reorganize society themselves.

Para-States and Medical Science Paul Wenzel Geissler 2015-01-19 In *Para-States and Medical Science*, P. Wenzel Geissler and the contributors examine how medicine and public health in Africa have been transformed as a result of economic and political liberalization and globalization, intertwined with epidemiological and technological changes. The resulting fragmented medical science landscape is shaped and sustained by transnational flows of expertise and resources. NGOs, universities, pharmaceutical companies and other nonstate actors now play a significant role in medical research and treatment. But as the contributors to this volume argue, these groups have not supplanted the primacy of the nation-state in Africa. Although not necessarily stable or responsive, national governments remain crucial in medical care, both as employers of health care professionals and as sources of regulation, access, and - albeit sometimes counterintuitively - trust for their people. "The state" has morphed into the "para-state" — not a monolithic and predictable source of sovereignty and governance, but a shifting, and at

times ephemeral, figure. Tracing the emergence of the "global health" paradigm in Africa in the treatment of HIV, malaria, and leprosy, this book challenges familiar notions of African statehood as weak or illegitimate by elaborating complex new frameworks of governmentality that can be simultaneously functioning and dysfunctional. Socialism C. M. Hann 2003-09-02 Socialism as a political system may be on the wane, yet no one can doubt that its cultural legacies will make themselves felt for years to come, and on a worldwide scale. The contributors to this volume adopt a variety of anthropological approaches to illuminate changes which have removed socialists from power in many countries. Presenting detailed ethnographic accounts across a wide range of countries, they bring out the factors which have given socialism such a profound worldwide impact, including a substantial impact upon the discipline of anthropology itself. The first sustained and wide-ranging investigation of socialism by social anthropologists, this volume will enable readers to understand better how socialism has been experienced by millions of people and thereby to now better understand how they may cope with post-socialist dilemmas.
