Advances in Clinical Child Psychology Thomas H. Ollendick 2012-12-06

As in past volumes, the current volume of *Advances in Clinical Child Psychology* strives for a broad range of timely topics on the study and treatment of children, adolescents, and families. Volume 18 includes a new array of contributions covering issues pertaining to treatment, etiology, and psychosocial context. The first two contributions address conduct problems. Using qualitative research methods, Webster-Stratton and Spitzer take a unique look at what it is like to be a parent of a young child with conduct problems as well as what it is like to be a participant in a parent training program. Chamberlain presents research on residential and foster-care treatment for adolescents with conduct disorder. As these chapters well reflect, Webster-Stratton, Spitzer, and Chamberlain are all veterans of programmatic research on treatment of child and adolescent conduct problems. Wills and Filer describe an emerging stress-coping model that has been applied to adolescent substance use and is empirically well justified. This model has implications for furthering intervention strategies as well as enhancing our scientific understanding of adolescents and the development of substance abuse. Foster, Martinez, and Kulberg confront the issue that researchers face pertaining to race and ethnicity as it relates to our understanding of peer relations. This chapter addresses some of the measurement and conceptual challenges relative to assessing ethnic variables and relating these to social cognitions of peers, friendship patterns, and peer acceptance.

The Free-market Family Maxine Eichner 2019-12-19 A steady drumbeat of bad news about the state of our nation has convinced Americans that our country has gone off the rails. But where, exactly, did we go wrong? Maxine Eichner argues that the problem is that market pressures are overwhelming American families today. Eichner links "free-market family policy," a system in which families must fend for themselves without help from the government, to unstable relationships, reduced lifespans, kids' declining academic achievement, and low levels of happiness, compared with other wealthy countries. What's called for, she argues, is market regulation and an economy structured around supporting families.

The Politics of Parenthood Laurel Elder 2012-07-17 Traces the rising emphasis on parenthood in contemporary American politics. Certain events in one's life, such as marriage, joining the workforce, and growing older, can become important determinants of political attitudes and voting choice. Each of these events has been the subject of considerable study, but in *The Politics of Parenthood*, Laurel Elder and Steven Greene look at the political impact of one of life's most challenging adult experiences—having and raising children. Using a comprehensive array of both quantitative and qualitative analyses, Elder and Greene systematically reveal for the first time how the very personal act of raising a family is also a politically defining experience, one that shapes the political attitudes of Americans on a range of important policy issues. They document how political parties, presidential candidates, and the news media have politicized parenthood and the family over not just one

election year, but the last several decades. They conclude that the way the themes of parenthood and the family have evolved as partisan issues at the mass and elite levels has been driven by, and reflects fundamental shifts in, American society and the structure of the American family. Laurel Elder is Associate Professor of Political Science at Hartwick College. Steven Greene is Associate Professor of Political Science at North Carolina State University.

Embattled Paradise Arlene S. Skolnick 1991-12-04 Skolnick offers a lucid and compassionate appraisal of the crisis of the American family, arguing that while the great economic and cultural transformations of the past generation are irreversible, they need not irreparably undermine our most precious family values.

One Great Family: Domestic Relationships in Samuel Richardson's Novels Simone Höhn 2021-01-25 This study examines concepts of morality and structures of domestic relationships in Samuel Richardson's novels, situating them in the context of eighteenth-century moral writings and reader reactions. Based on a detailed analysis of Richardson's work, this book maintains that he sought both to uphold hierarchical concepts of individual duty, and to warn of the consequences if such hierarchies were abused. In his final novel, Richardson aimed at a synthesis between social hierarchy and individual liberty, patriarchy and female self-fulfilment. His work, albeit rooted in patriarchal values, paved the way for proto-feminist conceptions of female character.

Performance-Based Family Therapy H. Charles Fishman 2022-03-07 In this groundbreaking book, Charles Fishman uniquely incorporates and develops results-based accountability (RBA) into the framework of structural family therapy. Collaborating with the founder of RBA, Mark Friedman, this approach aims to transform the field of family therapy by allowing clinicians to track performance effectively and efficiently with their clients. The book begins by reviewing the historical foundations of family therapy and evaluates why challenges in the field, alternative methods, and the reliance on evidence-based medicine (EBM) have meant that family therapy may not have flourished to the extent that many of us expected. It then explores how RBA can be integrated into intensive structural therapy (IST), with chapters examining how RBA can be applied in context, such as in treating eating disorders, supervision, and how it can be used to transform the professional's clinical contexts. Relevant and practical, the book also introduces the community resource specialist to help in the treatment of socially disadvantaged families, as well as practical appendices and "tracking tools" to empower clinicians to track their data and choose treatment models that obtain best outcomes. This new approach offers transparent and measurable outcomes for both clinicians and training family therapists, lending a helping hand in making family therapy the gold standard in psychotherapy. It is essential reading for undergraduate and graduate students of family therapy, course leaders, and all clinicians in professional contexts, such as social workers, psychotherapists, and marriage, couple, and family therapists.

Justice Bertha Wilson Kim Brooks 2010-07-01 Bertha Wilson's appointment to the Supreme Court of Canada in 1982 capped off a career of firsts. Wilson had been the first woman lawyer and partner at a prominent Toronto law firm and the first woman appointed to the Ontario Court of Appeal. Her career and passing in 2007 provoked reflection on her contributions to Canadian society and raised the question, what difference do women judges make? Justice Bertha Wilson examines Wilson's career through three distinct frames—foundations, controversy, and reflections—and a wide range of feminist perspectives. Taken together, these provocative essays paint an intriguing portrait of a complex, controversial woman who made a deep impression on the Canadian legal landscape.

Father's Influence on Children Marshall L. Hamilton 1977 Presents a view of the role of the American father which differs from the views set forth by the media and social critics, revealing a father's impact on his

children's development

Understanding Children's Development Anne B. Smith 1998 This fully revised and updated edition of a fundamental New Zealand psychology text examines how and why children develop and how they are influenced by the people and events in their lives. Discussed are theories of development and learning, the importance of early experience, intelligence and assessment, and the family. The development of social behavior, gender roles, language, and thinking are also covered. The question of mainstreaming--the integration of children with special educational needs into regular preschools and classrooms--is also debated. There is a strong emphasis on local conditions and the New Zealand historical and social context. This new edition addresses the important issue of giving children themselves a voice, in order to better understand their development and to involve them in decisions about their lives.

How Children Develop Robert S. Siegler 2003 An highly anticipated new text for the topically-organized child development course, written by three of the field's most accomplished researchers.

The Embattled Northeast Kenneth M. Morrison 1984-01-01 "The Embattled Northeast breaks with established wisdom concerning the dynamics of Indian-white relations. It shows that Euramericans' technological superiority did not undermine the Abenaki's self-confidence, but that trade pushed the tribes toward reaching an alliance among themselves as the first step in dealing with colonials. The study also tells how the Abenaki adapted to the post-contact world in order to secure their lives in religious terms, combining their own religious beliefs with compatible French Jesuit teachings"--Jacket.

After Child Dedication What Next? Francis Akpaekong 2015-10-23 The book, *After Child Dedication What Next?* decries the failure of parents to train up their child in the way he should go after dedicating him to God. It sees training as a command from God and proffers biblical method of child training that guarantees safety and upright living from cradle to adulthood. The book is a must read for every parent that means well for the child. Our society would be a haven and our world totally transformed, if all parents were to imbibe the principles outlined in this book. Every parent who adopts them will find parenting not only as a grave responsibility but also a very fulfilling venture.

The War on Welfare Marisa Chappell 2010 Focusing on the fate of the federal Aid to Families with Dependent Children (AFDC) program, this comprehensive history of the thirty year war over welfare shows how stubborn allegiance to the male-headed household undermined the struggle for economic justice.

Negotiating Parent-Adolescent Conflict Arthur L. Robin 2002-12-18 Parent-adolescent discord is often handled from a unitary perspective, whether the focus is on enhancing parenting skills, resolving conflicts in family relationships, or working to improve the behavior of the individual child. This important work shows the clinician how to incorporate all of these crucial elements into a single, research-based treatment program. Presented is the authors' influential integration of cognitive-behavioral constructs and family systems theory, grounded in consideration of adolescent developmental concerns. The book describes effective ways to conceptualize and assess the problems of embattled parents and teens; use assessment data in treatment planning; overcome resistance and other therapeutic hurdles; and implement carefully sequenced skills training, cognitive restructuring, and functional/structural interventions. The theoretical and empirical bases of the treatment approach are also discussed in depth.

Psychoanalytic Memoirs Jeffrey Berman 2022-11-17 The first book-length study of the psychoanalytic memoir, this book examines key examples of the genre, including Sigmund Freud's mistitled *An Autobiographical Study*, Helene Deutsch's *Confrontations with Myself: An Epilogue*, Wilfred Bion's *War Memoirs 1917-1919*, Masud Khan's *The Long Wait*, Sophie Freud's *Living in the Shadow of the Freud Family*, and Irvin D. Yalom and Marilyn Yalom's *A Matter of Death and Life*. Offering in each chapter a brief character sketch of the memoirist, the book shows how personal writing fits into their other work, often demonstrating the continuities and discontinuities in an author's life as well as discussing each author's contributions to psychoanalysis, whether positive or negative.

Munchausen by Proxy Syndrome Teresa F. Parnell 1997-07-30 Munchausen by Proxy Syndrome (MBPS), a form of child abuse in which a primary carer - usually a mother - fabricates and/or induces illness in a child, is one of the least understood forms of child abuse and mental illness. Examining the current knowledge about the manifestations and consequences of this perplexing behaviour, this book assists all

professionals working with chronically ill children in identifying and intervening with this bizarre and often deadly form of abuse. Drawing from their firsthand experience with the complexities of such cases, the editors and contributors address critical issues of not only identification and assessment but also long-term psychotherapy. Therapy with the mother/perpetrator has tra

Karmath Jeevan Krishan Aneja 2015-09-09 The first most pertinent question I faced before I could start narrating my story was, what title would sum up the essence of my journey? I thought the title should be apt and inspiring enough for me to stay focused on basic nuances that formed my core belief. A lot of churning spread over few weeks helped and I zeroed in on Karmath Jeevan. To me it means a world and is the most apt description of my life. Simply put, Karmath Jeevan means an action-oriented life; a life dedicated to sincere hard work as a dharma (duty) without undue anxiety for the results. I consider I lived in practice by this principle though not as an articulated thought. The house-hold environment during my childhood days and formative years led me to follow the elders especially my mother, my brother-in-law and two sisters whose daily routines, though apparently ordinary and simple, greatly impacted my mind and my thought process. The visits to temples along with them and listening to discourses of holy men/women influenced me. I learnt; one should focus on the task ahead, act sincerely with honesty of purpose and be satisfied. That was said to be a clear path to leading a meaningful, satisfying and fulfilling life.

The Parent's Poetical Anthology: Being a Selection of English Poems, Primarily Designed to Assist in Forming the Taste and the Sentiments of Young Readers. [Compiled by E. Mant.] Mrs. Elizabeth MANT 1814

Challenging Parental Alienation Jean Mercer 2021-12-02 This book addresses the concept of parental alienation - the belief that when a child of divorced parents avoids one parent, it may be because the preferred parent has persuaded the child to do this. It argues against the unquestioning use of parental alienation concepts in child custody conflicts. Increasing use of this concept in family courts has led at times to placement of children with abusive or violent parents, damage to the lives of preferred parents, and the use of treatments that have not been shown to be safe or effective. The 13 chapters cover the history and theory of "parental alienation" principles and practices. Methodological and research issues are considered, and diagnostic and treatment methods associated with "parental alienation" beliefs as well as those recommended by research and ethical evidence are analyzed. The connections of "parental alienation" with gender and domestic violence issues are discussed as are the experiences of individuals who have experienced "parental alienation" treatments. The book argues that "parental alienation" principles and practices should be avoided by family courts, in the best interests of children in custody disputes. This book will be useful reading for lawyers, judges, children's services workers including social workers, child protection court workers, and mental health professionals involved in child custody decisions.

The Adolescent in Group and Family Therapy Max Sugar 1999 A new printing of a 1975 work by Sugar presenting 18 papers which present varied techniques and theories as experienced in case studies by the contributors from their own experiences. These papers are a psychoanalytic framework and take cognizance of the structural theory, developmental lines, and phase-specific needs of the adolescent. They are organized into two sections detailing the topic in group therapy and family therapy settings..

Parental Alienation and Factitious Disorder by Proxy Beyond DSM-5: Interrelated Multidimensional Diagnoses Michael R. Butz 2020-06-01 Using Munchausen's Syndrome by Proxy / Factitious Disorder by Proxy and Parental Alienation as examples, this book advances a new diagnostic category for addressing complex pathological phenomena that integrates individual characteristics and symptoms, family as well as other system dynamics, under one diagnosis. The author examines why current diagnostic categories within the DSM-5 are inadequate and provides a framework for this new category—Interrelated Multidimensional Diagnosis—to better capture the complexity of MSBP / FDBP and Parental Alienation. The book begins with case studies and other examples to make the material accessible, and then proposes step-wise processes of examining family systems to determine if the phenomena exist to a reasonable degree of scientific certainty. After new diagnostic process and criteria are provided, several interventions and recommendations for treatment are offered in a novel way that attends

to the core aspects of these pathologies. This text will provide practitioners, professionals, and researchers with a unique vantage point from which to understand and treat these pathologies.

[Cotton Wool Kids](#) Stella O'Malley 2015-02-13 What has happened to Irish childhood? Parents are keeping their children indoors for fear of predators lurking around every corner and children are spending their days in front of screens or in supervised activities, over-controlled and growing steadily fatter and more unhappy. But it doesn't have to be like this. Commercial interests ensure parents feel anxious and filled with fear simply to sell them more stuff, when in fact childhood has never been safer; the rates of child mortality, injury and sexual abuse are lower today than at any time since records began. Cotton Wool Kids exposes the truth behind the scary stories and gives parents the information and the confidence to free themselves from the treadmill of after-school activities and over-supervision that has become common today. The author provides parents with strategies to learn how to handle the relentless pressure from society and the media to provide a 'perfect' childhood and instead to raise their children with a more relaxed and joyful approach, more in touch with the outdoors and the community around them.

[The Orphan in Eighteenth-century Law and Literature](#) Cheryl Nixon 2011

Examining novels by authors such as Haywood, Smollett, and Inchbald, and uncovering new manuscript and print case records, Cheryl Nixon compares tales of fictional orphans to narratives of legal orphans. Focusing on the eighteenth-century construction of the valued orphan, her book shows this figure's centrality to the development of new novelistic subgenres, new ideologies of the individual, and new understandings of property, family, and gender.

[Family-centered Treatment with Struggling Young Adults](#) Brad Sachs

2013 Family-Centered Treatment With Struggling Young Adults is an indispensable guidebook to the unique set of problems and opportunities that families face when young adults are experiencing difficulty pulling anchor and setting sail. Renowned clinician Brad Sachs, PhD, provides both a conceptual framework for understanding the reasons behind the increasing number of young adults who are unable to achieve

psychological and financial self-reliance and a treatment framework that will enable practitioners to help these young adults and their families to get unstuck and experience age/stage-appropriate growth and development. In Family-Centered Treatment With Struggling Young Adults, clinicians will gain an in-depth understanding of the complex psychological challenges that parents and young adults face as the latter forges a path towards success and self-reliance. Moreover, they'll come away from the book having learned an innovative approach to sponsoring family engagement and the launching stage—one that reduces tension, resolves conflicts, and promotes evolution and differentiation on both generations' parts.

[Mothers on Trial](#) Phyllis Chesler 2011-07-01 Updated and revised with seven new chapters, a new introduction, and a new resources section, this landmark book is invaluable for women facing a custody battle. It was the first to break the myth that mothers receive preferential treatment over fathers in custody disputes. Although mothers generally retain custody when fathers choose not to fight for it, fathers who seek custody often win—not because the mother is unfit or the father has been the primary caregiver but because, as Phyllis Chesler argues, women are held to a much higher standard of parenting. Incorporating findings from years of research, hundreds of interviews, and international surveys about child-custody arrangements, Chesler argues for new guidelines to resolve custody disputes and to prevent the continued oppression of mothers in custody situations. This book provides a philosophical and psychological perspective as well as practical advice from one of the country's leading matrimonial lawyers. Both an indictment of a discriminatory system and a call to action over motherhood under siege, Mothers on Trial is essential reading for anyone concerned either personally or professionally with custody rights and the well-being of the children involved.

Mad Muse Jeffrey Berman 2019-09-03 Many of the well-respected scholarly studies of autobiographical writing have little or nothing to say about mental illness. This book uncovers the mysterious relationship between mood disorders and creativity through the lives of seven writers, demonstrating how mental illness is sometimes the driving force behind creativity.

Parental Development Jack Demick 2014-02-25 This volume seeks to identify and define the parameters of a relatively new problem area -- parental development. Drawing on the grand developmental theories of Sigmund Freud, Lawrence Kohlberg, Jean Piaget, Lev Vygotsky, Heinz Werner, and their descendants, this book has the potential to generate an area of common concern for those interested in either child/adolescent or adult development through the novel application of developmental principles and considerations to the ecological context of parenting. To that end, this volume brings together theory and research from the subfields of adult and child/adolescent development. Chapter authors place the problem area of parental development in theoretical context and examine selected psychological part-processes implicated by focusing on cognitive and psychosocial development. The authors then deal with a range of issues that are perhaps less traditional and/or more in line with the complex character of everyday life. That is, they utilize either relatively novel comparison groups or treat parents at later stages of development rather than those in young adulthood as is often the case. Finally, the authors uncover both similarities and differences among their theoretical perspectives with an eye toward delineating some possible future research directions.

[All About Children - Questions Parents Ask](#) Tony Humphreys 2004-10-19

Being a parent is more challenging today than it's ever been. In *All About Children*, this thoroughly reliable and effective handbook, clinical psychologist Dr Tony Humphreys outlines effective ways of parenting and positive responses to difficult behaviour by children. Sometimes the task of parenting seems overwhelming. At others it provides great fulfilment and joy. It is always unpredictable; the challenges are forever changing and much of what we might have learned from our own parents seems quite irrelevant now. Parenting is not learned by instinct; it requires many complex skills. Parents have responsibility for the physical, emotional, social, sexual, behavioural, educational, creative and spiritual development of their children, and at the same time they must love them unconditionally. Tony Humphreys recognises the many and varied challenges faced by parents today. In *All About Children*, he provides an invaluable resource for parents by taking the questions they most frequently ask and providing thoughtful and comprehensive answers. He begins by pointing out that in order to develop parenting skills, each parent must first understand themselves and be prepared to continually update their knowledge as the needs of their children alter as they grow older. He goes on to deal with the practical aspects of everyday parenting skills and then looks at different aspects of challenging behaviour, both by children and parents. The book concludes with a chapter on learning and education, two core concerns of every parent. In a helpful question-and-answer format, *All About Children* provides today's parents with not only the vital information they require but also points out the skills they need to carry out their demanding task effectively. *All About Children: Table of Contents Introduction - Where does parenting begin? - What roles do parents need to play? - What are the skills needed for everyday parenting? - How can parents best respond to children's challenging behaviours? - How can parents resolve their own challenging behaviours? - How can parents prepare children for living their lives fully?*

Raising Real People Andrew Fuller 2002 Annotation. This bestselling Australian book explores the delights, frustrations and dilemmas facing parents of adolescents. Author and clinical psychologist Andrew Fuller offers parents practical solutions to common problems adolescents face, with a refreshing emphasis on parents being there for their children, rather than on the need to adopt particular parenting skills. Fuller's approach is light-hearted and supportive of parents. His awareness that adolescence is a time of enjoyment, as well as being anxiety-provoking for parents, is humorously illustrated in advice sheets around 38 typical, and some more difficult, parenting issues.
