Best Websites for Financial Professionals, Business Appraisers, and Accountants Eva M. Lang 2003-07-07 A no-nonsense guide to quickly finding and evaluating the quality and usefulness of a site. Written by two of the industry's leading researchers, this book helps professionals evaluate, target, and locate the best financial and business Web sites. The authors reveal tips and traps and recommend favorite sites, including a comprehensive review of the most important financial sites on the Internet. Eva Lang (Memphis, TN) is a nationally recognized expert on electronic research for business valuation and litigation support services. She currently serves as Chief Operating Officer of the Financial Consulting Group, the largest alliance of business valuation and consulting firms in the U.S. Jan Tudor (Portland, OR) is President of JT Research and a popular speaker on research strategies on the Internet.

Business Statistics on the Web Paula Berinstein 2003 This practical guide shows researchers how to tap the Internet for statistics about companies, markets, and industries; how to organize and present statistics; and how to evaluate them for reliability.

Net.people Thomas E. Bleier 2000 The art of creating a Web site is one that has emerged and been refined since the explosion of the Internet as a communications medium. But unlike authors, filmmakers, musicians, and visual artists, the faces behind even the most popular Web sites remain hidden. This book goes behind the Web curtain to reveal the personalities behind 35 of the most interesting Web sites on the Internet today. Interviews with the creators of sites for everything from wedding resources and action figure collecting to misheard song lyrics and movie reviews reveal the motivations for and experiences in starting and growing Web sites. This book provides insights for people-watchers who are curious about the faces behind the sites and for anyone interested in building an original Web site.

Super Searchers Cover the World Mary Ellen Bates 2001 This book asks experts to reveal strategies for finding international business information on the Web. Through a series of interviews, exploration of the challenges of reaching outside a researchers area of knowledge is detailed.

Managing Frontiers in Competitive Intelligence David L. Blenkhorn 2000-11-30 For specialists and nonspecialists alike, this perceptive selection of the newest and up and coming tools and techniques of competitive intelligence, offering a well balanced combination of theory and practice. It shows how advances in computers and technology have accelerated progress in CI management, and the ways in which CI has affected (and been affected by) all major business functions and processes. It explores applications to organizations of various sizes and types, in both the public and private sectors. Editors Fleisher and Blenkhorn link leading-edge research in CI to advances in current practice, and balance pragmatic against conceptual concerns. Analysts, strategists and organizational decision makers at higher levels will find the book especially valuable, as they seek to make sense of the business environment and assess their organizations' evolving, dynamic places in it. The pace of change in today's global, competitive economy is greater than at any time in recorded history. Thus, as never before, companies need better tools for business and competitive analysis. The book surveys applications of CI that are critical to business processes, such as mergers and acquisitions, and to evolving industries, such as biotechnology. They focus on how push and pull Internet technologies affect data gathering and analysis and how CI can be managerially assessed using multiple evaluative approaches, unavailable until now in the public domain. They then turn to the future, and lay out some startling yet plausible viewpoints on what the next frontiers of competitive intelligence will be and how organizations can and must ready themselves for them.

Searcher 2007

Super Searchers Do Business Mary Ellen Bates 1999 Bates, who does the same sort of work, interviews 11 researchers who use the Internet and online services to find critical business information. They reveal how they choose sources, evaluate search results, and tackle projects. The collection launches a series treating online research in different subject areas. Annotation copyrighted by Book News, Inc., Portland, OR. **Introduction to Online Legal, Regulatory, & Intellectual Property Research** Genie Tyburski 2004 *Introduction to Online Legal, Regulatory & Intellectual Property Research* provides practical, step-by-step guidelines for researching legal issues ? from the simple to complex. In addition to helping readers determine the scope of the research they need, the book also offers detailed coverage of potential resources ? including the difference between public and private information, free vs. fee-based resources, and insight into determining the quality of sources.

It highlights sources for ?novices? as well as ?experts,? and it offers valuable tips for reporting research results. Like all the titles in the Business Research Series, this book is conveniently divided into four sections containing a number of business research applications that can be used for both in-house research training and reference. Internet research can be quick, easy, and abundant ? but also challenging. Research sites sometimes come and go, and sources can be questionable. The Business Research Solutions Series provides comprehensive business and financial research reference guides and online training manuals to bridge a major gap in the field of online research methodology. This resourceful and innovative multi-volume series of reference guides teaches readers how to approach a research problem, how to select the best online sources, and how to effectively use these sources. It also suggests alternate low-cost solutions for many standard questions and problems. A must-have for professionals involved in company research, these invaluable tools provide step-by-step advice on how to analyze, interpret, and present data for informed decision-making.

Design Wise Alison J. Head 1999 "Design Wise" explains what interface design is and how to evaluate it. Information is included on the importance of interface design to users, how a product gets designed, a design evaluation template, and design analyses of CD-ROMs, Web sites, and online providers.

Tales of People Who Get It Avil Beckford 2007-06 Tales of People Who Get It is based on the ideas, actions and beliefs that were uncovered in interviews of 34 highly successful individuals from Canada, the United States, Sweden, Switzerland, Jamaica and South Africa. The responses to the interviews form each individual story. And the effect is startling: when you've finished reading the stories, you get the sense that every thing is connected - that we're all connected. There is also a sense of comfort in knowing that any of the stories could be your story because while these are successful people who "get it" they are also ordinary people with the same challenges and struggles we all face. It's a chance to learn from the way they resolve these struggles and apply the lessons when those same challenges arise in your life.

Encyclopedia of Business Information Sources Linda D. News and the Net Barrie Gunter 2015-07-16 Originally published in 2003. This book examines the growth of news provision on the internet and its implications for news presentation, journalism practice, news consumers, and the business of running news organizations. Much of the focus is placed on the migration of newspapers onto the internet, but references are also made to the establishment of news websites by other organizations. The book examines the growth of online technology as a source of information and entertainment and considers how this development can be framed within models of communication and comments, on the apparent shortage of new models to explain the use, role, effectiveness, and impact of online communications.
