Crisis Translation Cards

Nick Schmitt, 3rd 2013-11-25 The Crisis Translation Cards are a easy to use, color driven system for getting critical information from the moment contact is made at any emergency incident. The Spanish CTC fire deck translate the important emergency services questions into Spanish and translate the answers back into English. Using the Spanish CTC fire deck, the initial officer on a scene can begin putting together an incident management plan in situations

where the language barrier, stress and/or acute trauma might otherwise make communication difficult or impossible and leave important information out of reach.

Critical decisions no longer have to be made based on a best guess, a rule of thumb or by waiting for translation services to be established. Using "yes", "no" and "point to the answer" cards, immediate rescue decisions and plans can be made and life safety issues addressed before risking the lives of firefighters and civilians.

Language Hacking Spanish

Benny Lewis 2017-03-28 It's true that some people spend years studying Spanish before they finally get around to speaking the language. But here's a better idea. Skip the years of study and jump right to the speaking part. Sound crazy? No, it's language hacking. Unlike most traditional language courses that try to teach you the rules

of Spanish, #LanguageHacking shows you how to learn and speak Italian through proven memory techniques, unconventional shortcuts and conversation strategies perfected by one of the world's greatest language learners, Benny Lewis, aka the Irish Polyglot. Using the language hacks -shortcuts that make learning simple - that Benny mastered while learning his 11 languages and his 'speak from the start' method, you will crack the language code and exponentially increase your language abilities so that you can get fluent faster. It's not magic. It's not a language gene. It's not something only "other people" can do. It's about being smart with how you learn, learning what's indispensable, skipping what's not, and using what you've learned to have real conversations in Spanish from day one. The Method #LanguageHacking takes a modern approach to language learning, blending the power of online social collaboration with traditional methods. It focuses

on the conversations that learners need to master right away, rather than presenting language in order of difficulty like most courses. This means that you can have conversations immediately, not after years of study. Each of the 10 units culminates with a speaking 'mission' that prepares you to use the language you've learned to talk about yourself. Through the language hacker online learner community, you can share your personalized speaking 'missions' with other learners - getting and giving feedback and extending your learning beyond the pages of the book . You don't need to go abroad to learn a language any more.

Spanish for Emergency

Personnel David B. Dees 2002-01-01 Spanish for Emergency Personnel SEP is a phrase booklet for police officers. It can also be used by firefighters and paramedics and departments of public safety. It provides basic vocabulary, conversation, expressions and important terms: weapons, drugs, vehicles, etc. It includes scenarios: field interview, vehicle stop, arrest warrant, etc. It also has a pronunciation guide, commands, key terms, survival tips and culture and a conversational dictionary. As California P.O.S.T. and Fire Marshal certified classroom material, it has been developed

over a decade with emergency personnel and cadets at a Southern California sheriff's department and several fire departments. This booklet can be used for a quickie Spanish class or for self-study. For more comprehensive classroom use, it may be used with the textbook, Breezing Through Emergency Spanish, Books 1 & 2 and BTES, Book 1, Law Enforcement Instructor Manual. Other publications by the author are Quick Spanish for Law Enforcement and Quick Spanish for Emergency Responders, McGraw-Hill. *Spanish for First Responders* Command Spanish (Firm) 2011 "This program is designed to teach non-Spanish-speaking first responders to use Spanish language commands and phrases that will enable them to assist Spanish-speaking persons in emergencies. Emphasis is placed on concise Spanish to assess the nature of the emergency, determine the patient's chief complaint, nature of injury or illness, aid in movement or extraction of the involved person, as well as

explain basic procedures and treatment."--Publisher description.

Strategies to Improve Cardiac Arrest Survival Institute of Medicine 2015-09-29 Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to

decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. *Strategies to Improve Cardiac Arrest Survival* examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of *Strategies to Improve Cardiac Arrest Survival* provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.
