These concepts are investigated in terms of their general statements, current occurrence and if they are

suitable for a common national identity.

America: Greatest Country in the World?

See What the Facts Say William Blank

2021-02-19 We are constantly reminded that the United States is the greatest country in the world--even the greatest country in the history of civilization! Most agree that America is the most exceptional and most privileged nation on Earth. Presidents proclaim it and politicians remind us. Some believe this land was ordained by God to be the most dominant influence throughout the world. These are bold claims indeed. The United States of America is certainly a powerful, prosperous and influential nation but is it favored above all others? Is it truly the greatest country on the planet as we've always been told? Quick Quiz:What country has meddled in more national elections around the world than any other country and has pumped the most CO2 into the atmosphere? Can you name a country that has transferred billions of dollars in wealth from its working people to an elite class of billionaires? Which nation has the highest percentage of its citizens locked behind bars and the most adults earning poverty wages? Which country has the worst gun violence in the world, has kept its workers' wages stagnant for three

decades and crushed its unions? Are you able to name the country that carried out a campaign of brutal indigenous genocide while it held four million people in bondage and still continues to skirt its responsibilities to address the human devastation left behind? Which country has rigged its economic system for over a century so that people of color can only amass ten percent of the wealth of those in the majority Can you identify which nation developed the most destructive weapons in human history, has been engaged in war for 90 percent of its history, bombed dozens of countries since WW II and spends more on its military than any other country? What nation banned immigration based on religion and spread an obesity epidemic to nations around the globe? Which one exploded over 200 nuclear bombs in the atmosphere just to see how well they worked, spreading radioactive fallout worldwide? Can you identify a country where racism permeates every part of its society while its leaders pretend it's not so? What's the only affluent country that allows thousands of its citizens to die due to lack of health insurance? And which one had the worst response and highest COVID-19 death rate and experienced the first attempted coup in its history? Answer: That country is the United States of America. Surprised? Did you always believe America was the greatest country in history? Most Americans and all politicians do. But believing we're a nation above all others doesn't do much to encourage improvement. America: The Greatest Country in the World? See What the Facts Say. Bold Ideas for Making it Better poses some difficult questions about America's greatness and presents an Everest of evidence exposing why America might not be the greatest country on planet Earth and asks readers to look at the facts and decide for themselves. It concludes with bold ideas for changes in our policies to make America a better country for more of its citizens including a new U.S. Constitution to transform how this nation functions. This book is not anti-America or anti-democracy...it's simply anti-unfairness and anti-injustice!

America at the Mall Lisa Scharoun 2014-01-10 Since the construction of the first fully enclosed shopping center in 1952, the shopping mall has evolved into the heart of many suburban areas across the United States. More than simply a place to purchase goods, this veritable “temple

of consumerism” has become a primary place for community and social interaction and an essential element in many citizens' day-to-day lives. This study explores the spiritual, emotional and physical effects of the enclosed shopping mall on the public, chronicling the growth of the mall, its role in shaping urban and suburban life, its positive and negative impacts on society and the environment, and its future viability. As this work shows, the mall remains rich in symbolic influence, and in many ways mirrors the American condition.

[The Social Health of the Nation: How America Is Really Doing](#) Marc Miringoff 1999-07-01
 This book is written for people who are skeptical and uneasy when they hear politicians, economists, and reporters tell Americans "You're never had it so good" as they recite lists of leading economic indicators. The Social Health of a Nation, as its subtitle indicates, tell us, "How America is Really Doing." The facts in this book confirm what many Americans know intuitively - they are not better off now, not with income inequality at its worst level in fifty years, not with more and more Americans dropped from insurance rolls, not with thousands of Americans feeling the effects of corporate downsizing, not with real wages on a long term decline. This book provides the facts to see the rest of the picture, the condition of the American national spirit that can never be revealed by economic indicators alone. It also provides a forceful argument that, without the social side of the picture, Americans are in the dark about the nation's progress. This book is not an ideological tract, however. Its purpose is portrayal, not prescription. Not everything reported is bad news; an entire chapter is devoted to indicators of improving social performance. Because it does not advocate, for example, a return to big government or any quick-fix solution, this book

will be welcomed by readers from all parts of the political spectrum or of no particular political persuasion. It will appeal to concerned individuals from business, government, clergy, and other professions, and to those who represent no interest group. It will also be widely used as supplemental text in a variety of sociology, economics, and political science courses. The Social Health of the Nation is written by two sociologists, Marc and Luisa Miringoff. Marc is currently the Professor of Social Welfare Policy at Fordham University Graduate Center, and the founder and Director of the Fordham Institute for Innovation in Social Policy. Luisa is Professor of Sociology at Vassar College, where she has served as Department Chair and Director of its Urban Studies Program. Both earned Ph.D. degrees from the University of Chicago. Since 1987, Marc has headed a research team to develop the Index of Social Health, a nationally recognized social barometer that has been featured in ten New York Times and four Washington Post articles. This index has commanded increasingly large electronic and print media attention because of its powerful presentation of trends in family life, income, health, housing, child poverty, and other social indicators of everyday life in the United States. The Social Health of the Nation will include the previously unreleased and very newsworthy Index for 1998. But it will contain much more. Influenced by the effectiveness of the Index of Social Health, in the summer of 1996, the Ford Foundation approached the authors with a plan. Alarmed by a lack of government attention in the United States to monitoring the nation's social health, the Foundation had a vision of creating a book building on the Index of Social Health, to show what is needed to advance this field and deepen its impact. To that end, the Foundation provided financial assistance for the book's development by funding Miringoff's Fordham Institute for Innovation in Social Policy to convene a twenty-five member team, the Working Group on Social Indicators, including nationally known pollster, Daniel Yankelovich, and Director of Research and Vice President of CNN, Judy Milestone. Each member of the Working Group was motivated to improve social reporting in the United States. They came from the media, universities, and

government, representing fields as diverse as law, medicine, sociology, and economics. The vision of the Ford Foundation, with the assistance of this working group, has now become a reality in *The Social Health of the Nation*, a nine chapter book written by Marc and Marque Luisa Miringoff. This book does show the other side of the Official Portrait of How America is Doing, providing comprehensive coverage of improving, shifting, and worsening social performance. It fills in the blanks after all the economic indicators are posted. The book contains surprises, the same kind that have been made the yearly release of the Social Index of Health a subject of media attention for twelve years, an index whose 1998 figures will be released exclusively in this book. While some of the indicators will shock, other will give reason for hope, as we see evidence of improved performance in unlikely places. For those whose livelihoods and well-being depend on the social health of the United States, this book provides the information necessary to find creative solutions for improved performance. For students in a wide range of courses this book will become required reading.

The Fracking Debate Jonathan M. Fisk
2017-08-07 The disputes around fracking, and oil and gas policy, follow a long tradition of complicated intergovernmental relationships. Proponents argue that fracking supports new and well-paying jobs, revitalizes state and local economies, and that it can help replace reliance on other fossil fuels. Skeptics and opponents contend that oil and gas production via fracking contaminates air and water resources, causes earthquakes, and can ruin the character of many communities. Examining the intergovernmental politics of the first oil and natural gas boom of the 21st century, *The Fracking Debate*, Second edition offers a holistic understanding of the politics that characterize oil and natural gas operations, including why local governments are challenging their state's preemptive authority, in order to initiate a larger conversation about improving intergovernmental relationships. Author Jonathan Fisk presents a novel argument about the ways in which local, state, regional, and national approaches to governance of shale gas development can work together to reduce conflict and forward the interests of the

communities exposed to development, asking important questions such as: What state structures govern state-local relations? What state institutions impact and shape oil and gas production? What is the policymaking context in the state? What are the costs and benefits of hydraulic fracturing at the national, state, and local levels? How are risks and rewards distributed within states? What local policies have challenged the state, and why would local communities challenge the state? The result is a book that demonstrates that when stakeholders acknowledge their interdependencies and one another's expertise, they create, design, and implement more responsive, strategic, and targeted public policies. The Fracking Debate, Second edition will be required reading for courses on oil and gas policy in the United States, environmental politics, and domestic energy politics, as well as a vital reference for practitioners and policymakers working in these fields.
