2021-07-26 The prescient book that first linked specific weather disasters with man-made global warming . . . now in its second edition. “The most readable and intelligent summary of global warming science and politics I have read... a valiant effort to make people actually care about global warming.” — Bill McKibben, New York Observer “What Bob Reiss did to elevate our awareness of the destruction of the rain forest in *The Road to Extrema*, he has now done for global warming... Reiss bypasses political rhetoric and engages us in storytelling, showing us how the greenhouse effect is changing our lives, person by person, community by community, nation by nation.” — Terry Tempest Williams, author of *Leap and Refuge*, and winner of the John Muir Award and the Robert Marshall Award “From massive waves in the Maldives to tornadoes over Tennessee, from the halls of Congress to the hard disks of scientists, Bob Reiss has taken climate change and made it

personal. *The Coming Storm* is the layman’s guide to global warming—fair, urgent, and deeply unsettling.” — Ted Conover, winner of the National Book Critics’ Circle Award for *Newjack* “With a storyteller’s gifts, Bob Reiss shows how a series of freakish and colossally destructive weather events awakened scientists, politicians, and ordinary people to the momentous stakes of a changing climate... a compelling narrative of the people and events that have shaped this ever more urgent debate.” — Eugene Linden, author of *The Future in Plain Sight* and *The Parrot’s Lament* Free of unnecessary scientific jargon and filled with the human and political dimensions of this story, this book reads like a mystery novel where you already know the terrifying outcome. Adding a new preface by the author, this edition brings back to life the compelling account of the link between climate and weather disasters.

of the New Sun is unanimously acclaimed as Gene Wolfe's most remarkable work, hailed as "a masterpiece of science fantasy comparable in importance to the major works of Tolkien and Lewis" by Publishers Weekly, and "one of the most ambitious works of speculative fiction in the twentieth century" by The Magazine of Fantasy and Science Fiction. The Shadow of the Torturer introduces young Severian, an apprentice in the Guild of Torturers on the world called Urth, who has been exiled for committing the ultimate sin of his profession—showing mercy toward his victim. The Claw of the Conciliator continues the saga of Severian, banished from his home, as he undertakes a mythic quest to discover the awesome power of an ancient relic, and learn the truth about his hidden destiny. The Sword of the Lictor is the third volume in Wolfe's remarkable epic, chronicling the odyssey of the wandering pilgrim called Severian, driven by a powerful and

unfathomable destiny, as he carries out a dark mission far from his home. The Citadel of the Autarch brings The Book of the New Sun to its harrowing conclusion, as Severian clashes in a final reckoning with the dread Autarch, fulfilling an ancient prophecy that will forever alter the realm known as Urth. The Urth of the New Sun is the long awaited sequel to Gene Wolfe's four-volume classic, The Book of the New Sun. We return to the world of Severian, now the Autarch of Urth, as he leaves the planet on one of the huge spaceships of the alien Hierodules to travel across time and space to face his greatest test yet. ### **Recent Climate Change Impacts on Mountain**

**Glaciers** Mauri Pelto

2017-01-17 Glaciers are considered a key and an iconic indicator of climate change.

The World Glacier Monitoring Service has noted that global alpine balance has been negative for 35 consecutive years. This highlights the dire future that alpine glaciers face. The goal of this volume is to tell the story, glacier by glacier, of response to climate change from 1984-2015. Of the 165 glaciers examined in 10 different alpine regions, 162 have retreated significantly. It is evident that the changes are significant, not happening at a "glacial" pace, and are profoundly affecting alpine regions. There is a consistent result that reverberates from mountain range to mountain range, which emphasizes that

although regional glacier and climate feedbacks differ, global changes are driving the response. This book considers ten different glaciated regions around the individual glaciers, and offers a different tune to the same chorus of glacier volume loss in the face of climate change.

*Invented History, Fabricated*

*Power* begins with an examination of prehistoric beliefs (in spirits, souls, mana, orenda) that provided personal explanation and power through ritual and shamanism among tribal peoples. On this foundation, spiritual power evolved into various kinds of divine sanction for kings and emperors (Sumerian, Egyptian, Greek, Roman, Indian, Chinese and Japanese). As kingships expanded into empires, fictional histories and millennia-long genealogies

developed that portrayed imperial superiority and greatness. Supernatural events and miracles were attached to religious founders (Hebrew, Hindu, Buddhist, Christian, Islamic). A unique variation developed in the Roman Church which fabricated papal power through forgeries in the first millennium CE and the later “doctrine of discovery” which authorized European domination and conquest around the world during the Age of Exploration. Elaborate fabrications continued with epic histories and literary cycles from the Persians, Ethiopians, Franks, British, Portuguese, and Iroquois Indians. Both Marxists and Nazis created doctrinal texts which passed for economic or political explanations but were in fact self-aggrandizing narratives that eventually collapsed. The book ends with the idealistic goals of the current liberal democratic way of life, pointing to its limitations as a sustaining narrative, along with numerous problems threatening its

viability over the long term. For more than two centuries, Egypt was ruled by the most powerful, successful, and richest dynasty of kings in its long end epic history. They included the female king Hatshepsut, the warrior kings Thutmose III and Amenhotep II, the religious radical Akhenaten and his queen, Nefertiti, and most famously of all—for the wealth found in his tomb—the short-lived boy king, Tutankhamun. The power and riches of the Pharaohs of the 18th Dynasty came at enormous cost to Egypt’s enemies—and to most of its people. This was an age of ruthless absolutism, exploitation, extravagance,

brutality, and oppression in a culture where not only did Egypt plunder its neighbors, but Egyptian kings (and their people) robbed one another. 3,500 years ago, ancient Egypt began two centuries of growth where it became richer and more powerful than any other nation in the world, ruled by the kings of the 18th Dynasty. They presided over a system built on war, oppression, and ruthlessness, pouring Egypt's wealth into grandiose monuments, temples, and extravagant tombs. Tutankhamun was one of the last of the line—and one of the most obscure. Among his predecessors were some of the most notorious and enigmatic figures of all of Egypt's history. Pharaohs of the Sun is the story of these famed rulers, showing how their glamour and gold became tainted by selfishness, ostentation, and the systematic exploitation of Egypt's people and enemies. *The American Philatelist* 1944
