Computers and Astrology is a unique keep-by-your-computer reference for astrologers. There is no other book of its kind that tells you in graphic detail the many options available in today's high-powered astrological computing programs. Here you can find answers to such questions as: what's the difference between the 20+ different house systems - and which one is best to use when? What are progressed angles and primary directions? What is the significance of planetary patterns such as kite, grand cross, yod, etc. How to read a 90° sort graphic ephemeris? The answers are all here - often graphically with over 100 diagrams and tables to clarify confusing concepts. Computers and Astrology is actually four books in one: (1) a Universal Software User's Guide that describes the many options available when electronically casting charts. This section includes examples of chart output types, house systems, coordinates, points, city databases, ephemeris, asteroids, uranians and more; (2) a software comparison methodology that explains how to assess commercially available astrology programs to find the most suitable one based upon your needs and budget, (3) an astrological dictionary that offers an encyclopedia presentation of hard to find astrology and astronomy related facts and definitions; (4) information useful for casting charts such as time zones, major life transits, and a listing of over 1,000 major world city coordinates. Software programs evolve daily, but almost all the information in this book remains timelessly current. You can find more about Computers and Astrology, including the table of contents,

Dreams Olive Schreiner 2022-11-13 Dreams is a collection of beautifully written short stories based on author's dreams and life on a farm in South Africa. In Dreams depicts Olive Schreiner her fascinating looks on the world. Olive Schreiner (1855 -1920) was a South African author, anti-war campaigner and intellectual. Since the late 20th century, scholars have also credited Schreiner as an advocate for the Afrikaners, and other South African groups who were excluded from political power for decades, such as indigenous Blacks, Jews and Indians. Although she showed interest in socialism, pacifism, vegetarianism and feminism amongst other topics, her views escaped restrictive categorizations. Her published works and

other surviving writings promote implicit values such as moderation, friendship, and understanding amongst all peoples, and avoid the pitfalls of political radicalism.

The Production of Space Henri Lefebvre 1992-04-08 Henri Lefebvre has considerable claims to be the greatest living philosopher. His work spans some sixty years and includes original work on a diverse range of subjects, from dialectical materialism to architecture, urbanism and the experience of everyday life. The Production of Space is his major philosophical work and its translation has been long awaited by scholars in many different fields. The book is a search for a reconciliation between mental space (the space of the philosophers) and real space (the physical and social spheres in which we all live). In the course of his exploration, Henri Lefebvre moves from metaphysical and ideological considerations of the meaning of space to its experience in the everyday life of home and city. He seeks, in other words, to bridge the gap between the realms of theory and practice, between the mental and the social, and between philosophy and reality. In doing so, he ranges through art, literature, architecture and economics, and further provides a powerful antidote to the sterile and obfuscatory methods and theories characteristic of much recent continental philosophy. This is a work of great vision and incisiveness. It is also characterized by its author's wit and by anecdote, as well as by a deftness of style which Donald Nicholson-Smith's sensitive translation precisely captures.

Distant Valor C. X. Moreau 2012-07-01 Out of the crucible of war has come a long list of best-selling, award-winning, and long-remembered novels: The Red Badge Of Courage, All Quiet on the Western Front, The Caine Mutiny, Fields of Fire and The Thirteenth Valley. But none so far has ever captured the power

and drama of the United States Marine Corps's ill-fated mission to end the war for Lebanon, which ended in the barracks bombing that killed almost three hundred Marines. For Sergeant David Griffin, a "peace-time" Marine, Beirut was the chance to prove himself capable to the generation of Marines who had been bloodied in the Vietnam War. For Corporal Steven Downs, Beirut was a struggle to separate the civilian from the soldier, his distrust of the politicians' decisions from the military mission. For all of the Marines serving in Lebanon, it was another war in a foreign country where the enemy could be anywhere or anyone. Faced with Griffin's court-martial for engaging the enemy against orders, these two young men find themselves questioning their faith in themselves, their commanders, and eventually that which above all else they must have faith in--the Corps. With the insight that only a Marine Corps veteran could have, C. X. Moreau portrays the men who fought and died in Beirut with skill and ability that bring home to the reader the true meaning of Semper Fi. "Affecting . . . A haunting slice of military life that unsparingly catalogues the risks, rewards, pain and joys of casting one's lot with warriors."--Kirkus Reviews "Moreau uses the building block of authentic detail to craft a solid take about a little-known, undeclared war. His debut should attract readers seeking to understand how the U.S. military is waging peace in the Middle East."--Publishers Weekly "Outstanding! A classic in, yet above and beyond, the war genre. Thank you, C. X. Moreau, for an enlightening work."--John M. Del Vecchio, New York Times best-selling author of *The Thirteenth Valley* and *For The Sake Of All Living Things* "With his first book, *Distant Valor*, C. X. Moreau, joins the company of top rank military novelists. He shows the reader what it really means to be a Marine."--W.E.B. Griffin, New York Times best-selling author of "The Corps" and "The Brotherhood of War" series "A clear picture of Marines in action and the politicization that often causes bungled operations. The picture is harsh; but it depicts the anguish and humanity of the Marines who so gallantly bear the brunt of carrying the flag to foreign shores. This first novel rings with the authenticity that only a serving Marine could supply."--The Florida Times-Union "A novel of character, as are all great war novels...cuts to the heart of the military experience in our time . . ."--San Jose Mercury News "An absolutely authentic portrayal of the Marines who endured the mud and the blood in Beirut. As captain of a ship offshore, I watched it; C. X. Moreau obviously lived it, up close and personal."--P.T. Deutermann, best-selling author of *Scorpion in the Sea* "C. X. Moreau has seen the military future first-hand in Beirut. In an age of fateful involvements in the wars of others, the terrible dilemmas described so ably in *Distant Valor* are too often the essence of duty for today's Marines and soldiers. This book is as authentic as they come, heartrending and true, exciting and brutally tragic. It is a worthy monument to heroes cast aside."--Ralph Peters, New York Times best-selling author of *The War In 2020*

The Evolving Universe and the Origin of Life Pekka Teerikorpi 2020-09-26 Regarding his discoveries, Sir Isaac Newton famously said, "If I have seen further it is by standing upon the shoulders of giants." *The Evolving Universe and the Origin of Life* describes, complete with fascinating biographical details of the thinkers involved, a history of the universe as interpreted by the expanding body of knowledge of humankind. From subatomic particles to the protein chains that form life, and expanding in scale to the entire universe, this book covers the science that explains how we came to be. This book contains a great breadth of knowledge, from astronomy and physics to chemistry and biology. The second edition brings this story up to date, chronicling scientific achievements in recent years in such fields of research as cosmology, the large-scale architecture of the universe, black holes, exoplanets, and the search for extraterrestrial life. With over 250 figures, this is a non-technical, easy-to-read textbook at an introductory college level that is ideal for anyone interested in science as well as its history.

Astrology and Popular Religion in the Modern West Dr Nicholas Campion 2012-09-01 This book explores an area of contemporary religion, spirituality and popular culture which has not so far been investigated in depth, the phenomenon of astrology in the modern west. Locating modern astrology historically and sociologically in its religious, New Age and millenarian contexts, Nicholas Campion considers astrology's relation to modernity and draws on extensive fieldwork and interviews with leading modern astrologers to present an invaluable contribution to our understanding of the origins and nature of

New Age ideology. This book challenges the notion that astrology is either 'marginal' or a feature of postmodernism. Concluding that astrology is more popular than the usual figures suggest, Campion argues that modern astrology is largely shaped by New Age thought, influenced by the European Millenarian tradition, that it can be seen as an heir to classical Gnosticism and is part of the vernacular religion of the modern west.

Crinkle, Crinkle, Little Star Justin Krasner 2017-10-31 Take an interactive journey through the night sky in an innovative, tactile board book, a special book that engages three senses—seeing, touching, and hearing. With its gorgeous, full-spread illustrations of constellations and beloved bedtime lullaby reimagined, *Crinkle, Crinkle, Little Star* is the perfect book to rock babies to sleep. Here's Taurus the bull, strong and fast. Cetus the whale, waving a mighty tail. Orion, with bow and arrow in hand. Babies can trace the imaginary lines that turn random stars into ancient constellations—and, in a special treat, create a crinkling sound by tracing the channel of shimmering material underneath the last illustration in the book. That same mysterious, compelling crinkling sound persists when baby and parents hold the book and rub the crinkly material on the back cover.
