1177 B.C. Eric H. Cline 2021-02-02 A bold reassessment of what caused the Late Bronze Age collapse. In 1177 B.C., marauding groups known only as the "Sea Peoples" invaded Egypt. The pharaoh's army and navy managed to defeat them, but the victory so weakened Egypt that it soon slid into decline, as did most of the surrounding civilizations. After centuries of brilliance, the civilized world of the Bronze Age came to an abrupt and cataclysmic end. Kingdoms fell like dominoes over the course of just a few decades. No more Minoans or Mycenaeans. No more Trojans, Hittites, or Babylonians. The thriving economy and cultures of the late second millennium B.C., which had stretched from Greece to Egypt and Mesopotamia, suddenly ceased to exist, along with writing systems, technology, and monumental architecture. But the Sea Peoples alone could not have caused such widespread breakdown. How did it happen? In this major new account of the causes of this "First Dark Ages," Eric Cline tells the gripping story of how the end was brought about by multiple interconnected failures, ranging from invasion and revolt to earthquakes, drought, and the cutting of international trade routes. Bringing to life the vibrant multicultural world of these great civilizations, he draws a sweeping panorama of the empires and globalized peoples of the Late Bronze Age and shows that it was their very interdependence that hastened their dramatic collapse and ushered in a dark age that lasted centuries. A compelling combination of narrative and the latest scholarship, 1177 B.C. sheds new light on the complex ties that gave rise to, and ultimately destroyed, the flourishing civilizations of the Late Bronze Age—and that set the stage for the emergence of classical Greece.

Under Osman's Tree Alan Mikhail 2017-03-13 The early modern Middle East was a crucial zone of connection between Europe and the Mediterranean world, on the one hand, and South Asia, the Indian Ocean, and sub-Saharan Africa, on the other. Accordingly, global trade, climate, and disease both affected and were affected by what was happening in the Middle East's many environments. The trans-territorial and trans-temporal character of environmental history helps shed new light on the history of the region, and Alan Mikhail's latest tackles major topics in environmental history: natural resource management, climate, human and animal labor, water control, disease, and the politics of nature. It also reveals how one of the world's most important religious traditions, Islam, has related to the natural world. This is a model book that sets the course for Middle East environmental history."

Understanding Collapse Guy D. Middleton 2017-06-26 In this lively survey, Guy D. Middleton critically examines our ideas about collapse—how we explain it and how we have constructed potentially misleading myths around collapses—showing how and why collapse of societies was a much more complex phenomenon than is often admitted.

The Arts of Making in Ancient Egypt Gianluca Miniaci 2018 This book provides an innovative analysis of the conditions of ancient Egyptian craftsmanship in the light of the archaeology of production, linguistic analysis, visual representation and ethnographic research. During the past decades, the "imaginative" figure of ancient Egyptian material producers has moved from "workers" to "artisans" and, most recently, to "artists". In a search for a fuller understanding of the pragmatics of material production in past societies, and moving away from a series of modern preconceptions, this volume aims to analyse the mechanisms of material production in Egypt during the Middle Bronze Age (2000-1550 BC), to approach the profile of ancient Egyptian craftsmen through their own words, images and artefacts, and to trace possible modes of circulation of ideas among craftsmen in material production. The studies

in the volume address the mechanisms of ancient production in Middle Bronze Age Egypt, the circulation of ideas among craftsmen, and the profiles of the people involved, based on the material traces, including depictions and writings, the ancient craftsmen themselves left and produced.

Pottery and Economy in Old Kingdom Egypt Leslie Anne Warden 2013-10-10 In *Pottery and Economy in Old Kingdom Egypt*, Leslie Anne Warden analyzes utilitarian ceramics to provide a framework for the Egyptian economy which is fluid, full of agents, and defined by small scale, face-to-face relationships rather than the state.

A History of Ancient Egypt Volume 2 John Romer 2017-03-07 "Another solid work of history from an author and historian who truly grasps the mysteries of ancient Egypt." - Kirkus Reviews Drawing on a lifetime of research, John Romer chronicles the history of Ancient Egypt from the building of the Great Pyramid through the rise and fall of the Middle Kingdom: a peak of Pharaonic culture and the period when writing first flourished. Through extensive research over many decades of work, reveals how the grand narratives of 19th and 20th century Egyptologists have misled us by portraying a culture of cruel monarchs and chronic war. Instead, based in part on discoveries of the past two decades, this extraordinary account shows what we can really learn from the remaining architecture, objects, and writing: a history based on physical reality.

Abydos Charles River Editors 2019-02-05 *Includes pictures *Includes ancient accounts *Includes online resources and a bibliography for further reading Africa may have given rise to the first human beings, and Egypt probably gave rise to the first great civilizations, which continue to fascinate modern societies across the globe nearly 5,000 years later. From the Library and Lighthouse of Alexandria to the Great Pyramid at Giza, the Ancient Egyptians produced several wonders of the world, revolutionized architecture and construction, created some of the world's first systems of mathematics and medicine, and established language and art that spread across the known world. With world-famous leaders like King Tut and Cleopatra, it's no wonder that today's world has so many Egyptologists. In ancient Egypt, cities held political and religious significance, which meant that if the political or religious tides changed, so too could the fortunes of particular cities. Memphis is perhaps the best known of ancient Egypt's cities because it was fortunate enough to be the political capital of the Egyptian state for most of its history. Hundreds of miles to Memphis' south, Thebes became an important city during the Middle Kingdom and its stature grew during the New Kingdom when many of the pharaohs came from there and the national god, Amun, had its cult center in the city. Other cities, such as Tanis and Sais, were important for much shorter periods in Egyptian history. The city of Abydos, which was known as Abydos to the Greeks, and later became known simply as "Abydos" had a history that was as long as Memphis', and although its influence on pharaonic culture may not have been as apparent, it was no less profound. The city of Abydos was the most important political city in ancient Egypt's "Archaic" or Early Dynastic Period, which encompassed the first two dynasties of Egyptian history (ca. 3100-2650 BC). All of the kings of the First Dynasty and two of the kings of the Second Dynasty are believed to have resided in the nearby, but as of yet unlocated, city of Thinis and were buried in the necropolis of Abydos, making it one of the holiest sites in early pharaonic history. After the Archaic Period, Abydos lost much of its political influence to Memphis, Thebes, and other cities, but retained its significance by becoming an important religious center. Beginning in the Old Kingdom (ca. 2686-2181 BC), the first major temples were built near

the city, attracting priests and pilgrims alike, but it was in the Middle Kingdom (ca. 2055-1650 BC) when Abydos became the center of the Osiris cult. As the importance and popularity of Osiris grew throughout Egypt, so too did the city. Several kings in the New Kingdom (ca. 1550-1069 BC) and Late Period built mortuary temples to their own cults and added to the existing monuments to Osiris in order to ensure their immortality and to prove their piety to their people. Eventually, though, when the Greeks took control of Egypt, the importance of Abydos waned and so too did its size. *Abydos: The History and Legacy of the Ancient Egyptian Holy City and Burial Site* examines the history of the city, and what life and death were like there. Along with pictures depicting important people, places, and events, you will learn about Abydos like never before.

Ancient Egypt Transformed Adela Oppenheim 2015-10-12 The Middle Kingdom (ca. 2030-1650 B.C.) was a transformational period in ancient Egypt, during which older artistic conventions, cultural principles, religious beliefs, and political systems were revived and reimagined. *Ancient Egypt Transformed* presents a comprehensive picture of the art of the Middle Kingdom, arguably the least known of Egypt's three kingdoms and yet one that saw the creation of powerful, compelling works rendered with great subtlety and sensitivity. The book brings together nearly 300 diverse works— including sculpture, relief decoration, stelae, jewelry, coffins, funerary objects, and personal possessions from the world's leading collections of Egyptian art. Essays on architecture, statuary, tomb and temple relief decoration, and stele explore how Middle Kingdom artists adapted forms and iconography of the Old Kingdom, using existing conventions to create strikingly original works. Twelve lavishly illustrated chapters, each with a scholarly essay and entries on related objects, begin with discussions of the distinctive art that arose in the south during the early Middle Kingdom, the artistic developments that followed the return to Egypt's traditional capital in the north, and the renewed construction of pyramid complexes. Thematic chapters devoted to the pharaoh, royal women, the court, and the vital role of family explore art created for different strata of Egyptian society, while others provide insight into Egypt's expanding relations with foreign lands and the themes of Middle Kingdom literature. The era's religious beliefs and practices, such as the pilgrimage to Abydos, are revealed through magnificent objects created for tombs, chapels, and temples. Finally, the book discusses Middle Kingdom archaeological sites, including excavations undertaken by the Metropolitan Museum over a number of decades. Written by an international team of respected Egyptologists and Middle Kingdom specialists, the text provides recent scholarship and fresh insights, making the book an authoritative resource.

The Egyptian Kingdoms A. Rosalie David 1990 Illustrates a summary of the history of ancient Egypt and an account of the discoveries made by scholars, explorers, and archaeologists concerning Egyptian civilization
Ancient Egypt 39,000 BCE Edward F. Malkowski 2010-05-14 A view into the sophisticated and highly advanced civilization that preceded the world of the pharaohs • Presents historical evidence of the civilization ruled by the "gods" that the Egyptians claimed preceded their own • Explains who these prehistoric people were, what happened to them, and why they built a series of pyramids along the west bank of the Nile River Traditional Egyptologists have long resisted the notion that the architectural achievements of the Ancient Egyptians required the existence of a much more sophisticated technology than would have existed at that time. Yet, no records exist explaining how, why, or who built Egypt's megalithic monuments and statues. The ancient Egyptians did, however, record that their civilization resided in the shadow of a kingdom of "gods" whose reign ended many thousands of years before their first dynasty. What was this Civilization X that antiquity's most accomplished people revered as gods? The recent discovery of a large stone at one of Egypt's oldest ruins presents physical evidence that

clearly and distinctly shows the markings of a machining process far beyond the capabilities of the Ancient Egyptians. Likewise, experimental modeling of the Great Pyramid's subterranean chambers and passageways gives scientific evidence to further support the theory that the civilization responsible for such magnificent monuments is much older than presently believed. Ancient Egypt 39,000 BCE examines this evidence from historical and technical points of view, explaining who these prehistoric people were, what happened to them, why they built their civilization out of granite, and why they built a series of pyramids along the west bank of the Nile River.

Imagined Empires Zeinab Abul-Magd 2013-07-12 Through a microhistory of a small province in Upper Egypt, this book investigates the history of five world empires that assumed hegemony in Qina province over the last five centuries. Imagined Empires charts modes of subaltern rebellion against the destructive policies of colonial intruders and collaborating local elites in the south of Egypt. Abul-Magd vividly narrates stories of sabotage, banditry, flight, and massive uprisings of peasants and laborers, to challenge myths of imperial competence. The book depicts forms of subaltern discontent against Òimagined empiresÓ that failed in achieving their professed goals and brought about environmental crises to Qina province. As the book deconstructs myths about early modern and modern world hegemony, it reveals that imperial modernity and its market economy altered existing systems of landownership, irrigation, and tradeÑ leading to such destructive occurrences as the plague and cholera epidemics. The book also deconstructs myths in Egyptian historiography, highlighting the problems of a Cairo-centered idea of the Egyptian nation-state. The book covers the Ottoman, French, Muhammad AliÓs, and the British informal and formal empires. It alludes to the U.S. and its failed market economy in Upper Egypt, which partially resulted in QinaÓs participation in the 2011 revolution. Imagined Empires is a timely addition to Middle Eastern and world history.

The Egyptians Jack Shenker 2012-07-31 The award-winning journalist and longtime Cairo resident delivers a "meticulous, passionate study" of the ongoing battle for contemporary Egypt (The Guardian). On January, 25, 2011, a revolution began in Egypt that succeeded in ousting the country's longtime dictator Hosni Mubarak. In *The Egyptians*, journalist Jack Shenker uncovers the roots of the uprising and explores the country's current state, divided between two irreconcilable political orders. Challenging conventional analyses that depict a battle between Islamists and secular forces, *The Egyptians* illuminates other, equally important fault lines: far-flung communities waging war against transnational corporations, men and women fighting to subvert long-established gender norms, and workers dramatically seizing control of their own factories. Putting the Egyptian revolution in its proper context as an ongoing popular struggle against state authority and economic exclusion, *The Egyptians* explains why the events since 2011 have proved so threatening to elites both inside Egypt and abroad. As Egypt's rulers seek to eliminate all forms of dissent, seeded within the rebellious politics of Egypt's young generation are big ideas about democracy, sovereignty, social justice, and resistance that could yet change the world. "I started reading this and couldn't stop. It's a remarkable piece of work, and very revealing. A stirring rendition of a people's revolution as the popular forces that Shenker vividly depicts carry forward their many and varied struggles, with radical potential that extends far beyond Egypt." —Noam Chomsky

Togo Mizrahi and the Making of Egyptian Cinema Prof. Deborah A. Starr 2020-09-22 A free open access ebook is available upon publication. Learn more at www.lumino.org. In this book, Deborah A. Starr recuperates the work of Togo Mizrahi, a pioneer of Egyptian cinema. Mizrahi, an

Egyptian Jew with Italian nationality, established himself as a prolific director of popular comedies and musicals in the 1930s and 1940s. As a studio owner and producer, Mizrahi promoted the idea that developing a local cinema industry was a project of national importance. Togo Mizrahi and the Making of Egyptian Cinema integrates film analysis with film history to tease out the cultural and political implications of Mizrahi's work. His movies, Starr argues, subvert dominant notions of race, gender, and nationality through their playful—and queer—use of masquerade and mistaken identity. Taken together, Mizrahi's films offer a hopeful vision of a pluralist Egypt. By reevaluating Mizrahi's contributions to Egyptian culture, Starr challenges readers to reconsider the debates over who is Egyptian and what constitutes national cinema. **Egypt's Making** Michael Rice 1991 *Egypt's Making* examines the first 3000 years of Egyptian history, from c.5000 BC - c.2000 BC, down to the collapse of the old Kingdom. Evoking the magic and wonder of ancient Egypt, Michael Rice explains the essentially African character of the historic Egyptian society, institutions and art. He augments his text with many superb illustrations of the art and architecture of this fascinating and relatively little-known period of Egypt's history. The book considers the emergence of Egypt's ancient political institutions such as the kingship, and the complex problem of the influences which streamed into the Nile Valley from Western Asia in the late fourth millennium BC. Evidence is reviewed for the existence of connections between Egypt and the Arabian Gulf, including Eastern Arabia and the island of Bahrain in remote antiquity and at times during the Old Kingdom. It is suggested in particular that the art of the early periods throws light directly on the psychology of the people of the time. Early Egypt gives the opportunity to examine one of the very few examples (perhaps the only one) of an important civilization in its pristine state, largely free from external influences, until eventually overwhelmed by them. It also relates some of the precepts of Jungian psychology to the Egyptian personality.

Never Had the Like Occurred John Tait 2016-09-16 "Never Had the Like Occurred" examines Ancient Egypt's own multifaceted encounters with its past. As Egyptian culture constantly changed and evolved, this book follows a chronological arrangement, from early Egypt to the attitudes of the Coptic population in the Byzantine Period. Within this framework, it asks what access the Egyptians had to information about the past, whether deliberately or accidentally acquired; what use was made of the past; what were the Egyptians attitudes to the past; what sense of past time did the Egyptians have; and what kinds of reverence for the past did they entertain? This is the first book dedicated to the whole range of these themes. It provides an explanatory context for the numerous previous studies that have dealt with particular sets of evidence, particular periods, or particular issues. It provides a case study of how civilizations may view and utilize their past.

Gold and Gold Mining in Ancient Egypt and Nubia Rosemarie Klemm 2012-12-13 The book presents the historical evolution of gold mining activities in the Egyptian and Nubian Desert (Sudan) from about 4000 BC until the Early Islamic Period (~800-1350 AD), subdivided into the main classical epochs including the Early Dynastic - Old and Middle Kingdoms - New Kingdom (including Kushitic) - Ptolemaic - Roman and Early Islamic. It is illustrated with many informative colour images, maps and drawings. An up to date comprehensive geological introduction gives a general overview on the gold production zones in the Eastern Desert of Egypt and northern (Nubian) Sudan, including the various formation processes of the gold bearing quartz veins mined in these ancient periods. The more than 250 gold production sites presented, are described both, from their archaeological (as far as surface inventory is concerned) and geological environmental conditions, resulting in an evolution scheme of prospection and mining methods within the main periods of mining activities. The book offers for the first time a complete catalogue of the many gold production sites in Egypt and Nubia under geological and archaeological aspects. It provides information about the importance of gold for the Pharaohs and the spectacular gold rush in Early Arab times.

Egypt's Legacy Michael Rice 2004-03-01 Drawing on Jungian psychology to show why Egypt has been so important in the history of Western civilisation, Michael Rice explains the majesty and enduring appeal of Egyptian civilization. Jung claimed that there exist certain psychological drives dormant in our shared unconscious: these are the archetypes. From the omnipotent god to the idea of the nation state, the formulation of most of these archetypes is owed to ancient Egypt. Michael Rice sets out to recover the sense of wonder that the Egyptians themselves felt as they contemplated the world in which they lived, and the way they expressed that wonder in the religion, art and literature. He

traces the story of Egyptian civilization from its emergence in the third millennium BC to its transformation following the Macedonian conquest in 30 BC.

Genesis of the Pharaohs Toby A. H. Wilkinson 2003 Traces the history of Egyptian civilization, which began in the Eastern Desert over six thousand years ago.

Dynamics of Production in the Ancient Near East Juan Carlos Moreno Garcia 2016-10-11 The transition between the 2nd and the 1st millennium BC was an era of deep economic changes in the ancient Near East. An increasing monetization of transactions, a broader use of silver, the management of the resources of temples through [entrepreneurs], the development of new trade circuits and an expanding private, small-scale economy, transformed the role previously played by institutions such as temples and royal palaces. The 17 essays collected here analyze the economic transformations which affected the old dominant powers of the Late Bronze Age, their adaptation to a new economic environment, the emergence of new economic actors and the impact of these changes on very different social sectors and geographic areas, from small communities in the oases of the Egyptian Western Desert to densely populated urban areas in Mesopotamia. Egypt was not an exception. Traditionally considered as a conservative and highly hierarchical and bureaucratic society, Egypt shared nevertheless many of these characteristics and tried to adapt its economic organization to the challenges of a new era. In the end, the emergence of imperial super-powers (Assyria, Babylonia, Persia and, to a lesser extent, Kushite and Saite Egypt) can be interpreted as the answer of former palatial organizations to the economic and geopolitical conditions of the early Iron Age. A new order where competition for the control of flows of wealth and of strategic trading areas appears crucial.

How did Egyptian techniques of wine production change during the course of the pharaonic period? Holger Skorupa 2009-01-27 Essay from the year 2008 in the subject History - World History - Early and Ancient History, grade: 70 Punkte = 2,0, The University of Liverpool (School of Archaeology, Classics and Egyptology), course: Ancient Egyptian Materials and Technologies, 20 entries in the bibliography, language: English, abstract: How did Egyptian techniques of wine production (harvesting, treading, pressing, fermentation and storage) change during the course of the pharaonic period? "Il est vrai néanmoins, que ce vin [the Egyptian wine] n'est pas beaucoup estimé des Francs, à cause qu'il reste toujours un tiers de lie, qui le rend trouble aussitôt qu'on en veut verser. Mais si on avoit trouvé l'invention de la bien faire purifier, ce suroit assurément un vien très délicieux (...)" Although wine could not be indicated to be a typical element of the fauna of Egypt, skilled wine-makers of the Seventeenth Century proofed to produce a well-tasting juice, according to French traveller Vansleb. As archaeologists and historians - representing modern scholarship - have pointed out, that the wine-making process and its techniques have not been changed dramatically regarding the wine production utilized in Nineteenth and Twentieth Century, it is widely interesting to get to know more about Egyptian wine-manufacturing. Which tools were used to fulfil the difficult wine-making? How did a typical vineyard look like? Were there various types of wine and was it possible to get its taste throughout the whole society of ancient Egypt? Which role was played either by the reigning king or rather the gods - especially the goddess of harvest Renenutet? By investigating and trying to answer these questions, it is certainly necessary to indicate possible sources stressing illustrations as well as textual evidence and archaeological basis. Obviously a huge amount of sources are available regarding the Middle and the New Kingdom, while, concerning the Early Dynasty and the Old Kingdom, useful information are rare. However several scenes taken from tombs dated from both periods give little evidence of techniques being utilized to success the wine-manufacturing. These artistic, textual, and archaeological evidence are highly important to observe, if ancient Egyptian wine could actually be described as "(...) excellent, white, pleasant, fragrant, easily assimilated, thin, not likely to go to the head (...)", as it was signified by

It is a full-bodied re-creation of a largely forgotten era in the world's history: an Egypt when pharaohs contended with the near-collapse of history's greatest empire. This epic tale encompasses the whole of the then-known world, from Babylon to Crete, from Thebes to Jerusalem, while centering around one unforgettable figure: Sinuhe, a man of mysterious origins who rises from the depths of degradation to get close to the Pharaoh... *The Rise and Fall of Ancient Egypt* Toby Wilkinson 2011-03-15 NEW YORK TIMES BESTSELLER • "Magisterial . . . [A] rich portrait of ancient Egypt's complex evolution over the course of three millenniums."—Los Angeles Times NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • Publishers Weekly In this landmark volume, one of the world's most renowned Egyptologists tells the epic story of this great civilization, from its birth as the first nation-state to its absorption into the Roman Empire. Drawing upon forty years of archaeological research, award-winning scholar Toby Wilkinson takes us inside a tribal society with a pre-monetary economy and decadent, divine kings who ruled with all-too-recognizable human emotions. Here are the legendary leaders: Akhenaten, the "heretic king," who with his wife Nefertiti brought about a revolution with a bold new religion; Tutankhamun, whose dazzling tomb would remain hidden for three millennia; and eleven pharaohs called Ramesses, the last of whom presided over the militarism, lawlessness, and corruption that caused a political and societal decline. Filled with new information and unique interpretations, *The Rise and Fall of Ancient Egypt* is a riveting and revelatory work of wild drama, bold spectacle, unforgettable characters, and sweeping history. "With a literary flair and a sense for a story well told, Mr. Wilkinson offers a highly readable, factually up-to-date account."—The Wall Street Journal "[Wilkinson] writes with considerable verve. . . . [He] is nimble at conveying the sumptuous pageantry and cultural sophistication of pharaonic Egypt."—The New York Times
