From the calling macaw and the roaring lion to the dancing lyrebird, animals all around us can be heard and seen communicating with each other and, occasionally, with us. Why they do so, what their utterances mean, and how much we know about them are the subject of *Songs, Roars, and Rituals*. This is a concise, yet comprehensive, introduction to the complexities of communication in animals. Rogers and Kaplan take us on an exciting journey through communication in the animal world, offering insights on how animals communicate by sight, sound, smell, touch, and even electrical signaling. They explore a wide variety of communication patterns in many species of

mammals and birds and discuss in detail how communication signals evolved, how they are learned, and what song and mimicry may mean. An up-to-date account of the science of animal communication, this book also considers modern concepts (such as that of deceptive communication) and modern controversies, primarily those surrounding the evolution of human language and the use of symbolic language by apes. It concludes with a thought-provoking look at the future of communication between humans and animals.

Excerpt from *Sulton Stork, and Other Stories and Sketches* That so exquisite and finished a product of Thackeray's mature genius and humour as *Sulton Stork* should have escaped the author's attention when republishing his *Miscellanies* thirty years ago is perhaps more easily intelligible than its omission from the two supplementary volumes, containing pieces hitherto uncollected, issued in the winter of last year by the publishers of his collected Works, and which must be taken to represent and include their final gleanings in that field. In neither case is the omission of the radiant and sunny little jeu d'esprit which gives its leading title to the present volume easily explicable, except on the assumption of forgetfulness of its existence on the one hand on the part of the writer, or of ignorance of its existence on the other on the part of his posthumous publishers - a supposition rendered all the more likely in the

latter case by the fact that "Sultan Stork" does not happen to be recorded in the original edition of the "Bibliography of Thackeray." It begins with some of Thackeray's lesser-known journalistic work and travel writings and moves on to key works written about the author in the second half of the 19th century and at the turn of the 20th century. Each volume begins with an informative introduction by Richard Pearson, providing a brief analysis of each text and presenting the context in which it was written. This set will be of keen interest to those studying William Thackeray and nineteenth-century literature more broadly.
