**Smashing System** Mark Clayton Graham 2002-08 The poems in Blackberries were for the most part written in the 1990's and the early 2000's. The title poem is a declaration of the poet's intent to let his poems mature prior to publication, an action occurring a decade later. The poems in this volume differ from his earlier work in that they are more intensely personal, technically more accomplished, and more consistent in voice, rhythm and sound. The stories are still there. The most developed series of poems concerns his son's suicide.

[When the Earth Had Two Moons](#) Erik Asphaug 2019-10-29 An astonishing exploration of planet formation and the origins of life by one of the world's most innovative planetary geologists. In 1959, the Soviet probe Luna 3 took the first photos of the far side of the moon. Even in their poor resolution, the images stunned scientists: the far side is an enormous mountainous expanse, not the vast lava-plains seen from Earth. Subsequent missions have confirmed this in much greater detail. How could this be, and what might it tell us about our own place in the universe? As it turns out, quite a lot. Fourteen billion years ago, the universe exploded into being, creating galaxies and stars. Planets formed out of the leftover dust and gas that coalesced into larger and larger bodies orbiting around each star. In a sort of heavenly survival of the fittest, planetary bodies smashed into each other until solar systems emerged. Curiously, instead of being relatively similar in terms of composition, the planets in our solar system, and the comets, asteroids,

satellites and rings, are bewitchingly distinct. So, too, the halves of our moon. In *When the Earth Had Two Moons*, esteemed planetary geologist Erik Asphaug takes us on an exhilarating tour through the farthest reaches of time and our galaxy to find out why. Beautifully written and provocatively argued, *When the Earth Had Two Moons* is not only a mind-blowing astronomical tour but a profound inquiry into the nature of life here—and billions of miles from home.

**Launching While Female** Susanne Althoff 2020-10-27 An exposé of the gender gap in entrepreneurship and a road map for a more inclusive and economically successful future for us all Journalist and professor Susanne Althoff investigates the obstacles women and nonbinary entrepreneurs—especially those of color—face when launching, funding, and growing their companies, obstacles that persist because the current start-up world was engineered by and for white men. Through interviews with over a hundred founders across the country and in all industries, Althoff paints a picture of an entrepreneurial system rife with bias and discrimination, where women receive less than 3 percent of this country's venture capital, struggle to find mentors in the wake of #MeToo, and are dismissed as “mompreneurs.” The effects of this unequal system—a weaker economy, fewer jobs, less innovation—are felt by all of us, and Althoff explains how more equitable structures in business and entrepreneurship will benefit all people, not just those hoping to fund a startup. By exploring some of the practical ways we can open the entrepreneurial system to everyone, Althoff provides a rallying cry and a way forward for women entrepreneurs and their allies, showing that change is urgent and within our reach.
