Computer Networking and

Scholarly Communication in

the Twenty-First-Century

University Teresa M. Harrison

This book explores the various ways in which computer networking, and more specifically the Internet, is

The Electronic Campus An Information Strategy Library

And Information Research Report 73

changing the practices, the structure, and the products of academic scholarship. It considers research, teaching, and dissemination of knowledge across a range of disciplines in the humanities, sciences, and social sciences in order to identify particular uses of networking that will come to constitute the academic world of the future.

Achieving Cultural Change in Networked Libraries William Foster 2017-03-02

The advent of globally networked information is a historic change. Educational, commercial and industrial institutions depend on its effective exploitation for their success, but cultural and human factors are the biggest obstacles. This book looks at the roots of these problems and how they may be overcome, through understanding recent developments in technical services, the difference between service and technical

orientation, organizational culture, the role of subject expertise and the cultural heritage of the information profession. The book provides guidance and outlines best practice in: managing converging technologies; supporting change with organizational models; using cultural audits; the role of focus groups in implementing change; characterizing a learning organization; succeeding as a change agent, and managing change through technical services. Several chapters discuss the Electronic Libraries programme and the TAPin (Training and Awareness Programme in networks) model as examples of how cultural change takes place, particularly in the academic environment; one chapter concentrates exclusively on the characteristics of special libraries. This illuminating insight into the evolution of information cultures and how they do or don't adapt to networked services will help information and library managers to achieve change

The Electronic Campus An Information Strategy Library

And Information Research Report 73

with deeper understanding, their fields.

and will provide useful advice for senior managers restructuring IT and information departments. The book is core reading for students of Information Studies.

Digital Convergence - Libraries

of the Future Rae Earnshaw
2007-09-20 The convergence of IT, telecommunications, and media is changing the way information is collected, stored and accessed. This revolution is having effects on the development and organisation of information and artefact repositories such as libraries and museums. This book presents key aspects in the rapidly moving field of digital convergence in the areas of technology and information sciences. Its chapters are written by international experts who are leaders in

Cost Containment for Higher Education William B.

Simpson 1991-11-30 .Simpson identifies strategies for cost containment or cost reduction in higher education and discusses these strategies in light of their effect on the quality of the learning experience, the future of the academic profession, and the implications for society. This differs from most of the current literature on cost, which tends only to describe it, explain factors underlying its increase, and how it may be financed. Particular concern is given to options that could be followed over the long term without impairing the quality of educational opportunities, the academic profession, or society in general. The emphasis is thus on the objectives to be served, rather than the resolution of financial difficulties on the revenue side

The Electronic Campus An Information Strategy Library

And Information Research Report 73

or on crisis management. Some management and development.

of the strategies discussed are applicable at particular levels of government; some relate to interinstitutional arrangements; and some are options for individual institutions. This book is recommended for university trustees and administrators, educational administration courses, and government policymakers and concerned faculty.

Digital Library Economics

Wendy Evans 2009-04-20
Digital Library Economics covers key aspects of the management and development of the digital library from an economic viewpoint. The work is a collection of essays by leading international authorities and provides an overview of current and future positions with regard to the economics of digital library

Key contextual aspects are described, providing a history of the growth of digital libraries, with special reference to financial issues, current and possible future economic models and costing methodologies and challenges, themes and issues in the field.

Incorporates past developments, current good practice and future trends
Written by recognized national and international authorities
There is little else in the field: it fills a major gap in the literature

A Disciplinary Blueprint for the Assessment of Information Literacy Dorothy Anne Warner 2008-06-30 Have you ever worried that literature on library instruction deals more with methods of assessing student attitude than student learning? If so, you'll be glad to know someone is doing something about it! Eight unique disciplinary modules are presented, each identifying a series of information literacy objectives developed in accordance with Bloom's Taxonomy of Cognitive Objectives. A substantive curriculum map embedded within each module lists the sequence of courses required for the disciplinary major and

~~the level at which the course is taught (sophomore, junior, etc.), notes whether information literacy instruction is currently taught by the library for that particular course, and delineates the specific information literacy learning objectives the students must master in order to fulfill the course assignments. Collaborative responsibility for teaching the information literacy skills is also outlined, with specific recommendations for ways the library can strengthen its support for the specific discipline. In addition, assessment methodologies are identified; including scoring rubrics designed specifically for the disciplinary information literacy objectives. An indispensable resource for academic librarians ready to take the leap from episodic reactive response to programmatic sequenced integration into the curriculum.~~
