Smoke Rings Howard Hull 2005-08-02 This book is divided into three distinct parts and an epilogue. Each is related to and dependent upon the others for continuity and meaning. Part one is set primarily in a 1950s era Diner in Syracuse, New York. The plot of that part revolves around the relationships of Ruby Hart, a beautiful dark haired waitress to various people who move in and out of her life. Part two is set in Mitchell School near the small town of McMinnville, Tennessee during the 1960s. It is concerned with the day to day activities of school personnel, including the principal, several coaches and teachers, and some of the students. In part three, two primary characters from Mitchell School, a third grade teacher and a basketball coach leave middle Tennessee and travel to Nachitoches, Louisiana where the coach, Ray Canfield, has been given a one year college teaching appointment. This is a novel that teachers and other school personnel will enjoy reading. In many instances they will visualize themselves in the roles of the primary characters. They will hear echoes of footsteps in the hallways they have walked down, and see the faces of the children they have taught. They will share the laughter of good times and the tears of times not so good. And finally, they will remember how it feels to love and be loved by someone in return, and maybe, when nobody is listening, they will smile while reading a certain passage, and say softly, "Yes. That's the way it was."

How Tobacco Smoke Causes Disease 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the

potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

The 1964-1965 New York World's Fair Bill Cotter 2004 The 1964-1965 New York World's Fair was the largest international exhibition ever built in the United States. More than one hundred fifty pavilions and exhibits spread over six hundred forty-six acres helped the fair live up to its reputation as "the Billion-Dollar Fair." With the cold war in full swing, the fair offered visitors a refreshingly positive view of the future, mirroring the official theme: Peace through Understanding. Guests could travel back in time through a display of full-sized dinosaurs, or look into a future where underwater hotels and flying cars were commonplace. They could enjoy Walt Disney's popular shows, or study actual spacecraft flown in orbit. More than fifty-one million guests visited the fair before it closed forever in 1965. The 1964-1965 New York

World's Fair captures the history of this event through vintage photographs, published here for the first time.

Nicotine Gregor Hens 2017-01-10 NAMED A BEST BOOK OF THE YEAR BY THE ECONOMIST By turns philosophical and darkly comic, an ex-smoker's meditation on the nature and consequences of his nearly lifelong addiction. Written with the passion of an obsessive, Nicotine addresses a lifelong addiction, from the thrill of the first drag to the perennial last last cigarette. Reflecting on his experiences as a smoker from a young age, Gregor Hens investigates the irreversible effects of nicotine on thought and patterns of behavior. He extends the conversation with other smokers to meditations on Mark Twain and Italo Svevo, the nature of habit, and the validity of hypnosis. With comic insight and meticulous precision, Hens deconstructs every facet of dependency, offering a brilliant analysis of the psychopathology of addiction. This is a book about the physical, emotional, and psychological power of nicotine as not only an addictive drug, but also a gateway to memory, a long trail of streetlights in the rearview mirror of a smoker's life. Cigarettes are sometimes a solace, sometimes a weakness, but always a witness and companion. This is a meditation, an ode, and a eulogy, one that will be passed hand-to-hand between close friends.

Franklin Barbecue Aaron Franklin 2015-04-07 NEW YORK TIMES BESTSELLER • A complete meat and brisket-cooking education from the country's most celebrated pitmaster and owner of the wildly popular Austin restaurant Franklin Barbecue. When Aaron Franklin and his wife, Stacy, opened up a small barbecue trailer on the side of an Austin, Texas, interstate in 2009, they had no idea what they'd gotten themselves into. Today, Franklin Barbecue has grown into the most popular, critically lauded, and obsessed-over barbecue joint in the country (if not the world)—and Franklin is the winner of every major barbecue award there is. In this much-anticipated debut, Franklin and coauthor Jordan Mackay unlock the secrets behind truly great barbecue, and share years' worth of hard-won knowledge. *Franklin Barbecue* is a definitive resource for the backyard pitmaster, with chapters dedicated to building or customizing your own smoker; finding and curing the right wood; creating and tending perfect fires; sourcing top-quality meat; and of course, cooking mind-blowing, ridiculously delicious barbecue, better than you ever thought possible.

Ten Poems to Last a Lifetime Roger Housden 2007-12-18 The fourth volume in the popular series that began with *Ten Poems to Change Your Life*, *Ten Poems to Last a Lifetime* focuses on what it means to be truly human. In it, Roger Housden offers us poems on life and death, happiness, seeing ourselves in relation to the world, and, of course, the ineffable—the things that really matter when the chips are down. He describes these passionate poems as "bread for the soul and fire for the spirit." The poets Housden has chosen are Billy Collins, Hayden Carruth, Dorianne Laux, James Wright, Naomi Shihab Nye, and Mary Oliver from the United States, D. H. Lawrence and John Keats from England, Rainer Maria Rilke from Germany, Fleur Adcock from New Zealand, and Seng-Ts'an from sixth-century China. And yes, that adds up to eleven, not ten.

Housden decided to include a bonus poem for his faithful readers in this, the final volume of the series. As before, Housden's luminous essays provide an elegant and easy passage into the sometimes daunting world of poetry, enabling readers to feel that in him they have found a trusted guide and mentor.

Physics on the Fringe Margaret Wertheim 2011-11-01 For the past fifteen years, acclaimed science writer Margaret Wertheim has been collecting the works of "outsider physicists," many without formal training and all convinced that they have found true alternative theories of the universe. Jim Carter, the Einstein of outsiders, has developed his own complete theory of matter and energy and gravity that he demonstrates with experiments in his backyard,—with garbage cans and a disco fog machine he makes smoke rings to test his ideas about atoms. Captivated by the imaginative power of his theories and his resolutely DIY attitude, Wertheim has been following Carter's progress for the past decade. Centuries ago, natural philosophers puzzled out the laws of nature using the tools of observation and experimentation. Today, theoretical physics has become mathematically inscrutable, accessible only to an elite few. In rejecting this abstraction, outsider theorists insist that nature speaks a language we can all understand. Through a profoundly human profile of Jim Carter, Wertheim's exploration of the bizarre world of fringe physics challenges our conception of what science is, how it works, and who it is for.

Feasibility of Portable Smoke Ring Generators WALDEN RESEARCH CORP CAMBRIDGE MA. 1970 It was found that explosively powered vortex ring generators with diameters between 2 and 18 inches can be built which generate high speed vortex rings reproducibly. Also, it was found that aerosol introduced into these vortex rings during ring formation is transported over considerable distance at high speed within the vortex ring. Preliminary sketches of full scale field devices are presented. (Author).
