How Many Ducks? Kim Mitzo Thompson 2016-07-16 Read the story. Then sing the story! It isn't a secret that using songs to teach children pre-reading skills is fun and successful. This original song is featured as a read-along and a sing-along. Count along as the playful little ducks swim around the pond and find their friends! How many will they find? "How many ducks are swimming in the pond? How many ducks are swimming in the pond? How many ducks are swimming in the pond? One, two, three, four, five little ducks!" Adorably-illustrated ducks are playful and sweet and the repetitive text encourages young readers to read-along and learn to count from one to five. The fun Sing A Story series includes: Five Little Monkeys Jumping On The Bed, Old MacDonald Had A Farm, Ten In The Bed, B-I-N-G-O, Down By The Bay, Humpty Dumpty & Other Nursery Rhymes, Six Little Ducks, Five Little Skunks, ABC Nursery Rhymes, The Wheels On The Bus, This Old Man, How Many Ducks?, Old MacDonald's Letter Farm, The ABCs, Singing The Consonant Sounds, The Farmer In The Dell and It's Silly Time!

A New Duck Pamela Hickman 1999-04-01 In A New Duck, Paul visits a city park through the seasons and observes Mallard ducks as they develop from egg to duckling to fledgling. Children will enjoy reading the cumulative, sing-song verse patterned after "The House that Jack Built," and then peering under the flaps to learn interesting science facts. This book in the My First Look at series also contains a note to parents suggesting ways of exploring nature --- without disturbing it.

My First Years in the Fur Trade George Nelson 2002-01-17 Captivated by tales of adventure, fifteen-year-old George Nelson left his family in Quebec in 1802 and headed to the Northwest Territory to work for Sir Alexander Mackenzie's XY Company, one of the major fur trade companies of the time. Required to keep a daily log as a fur trade clerk, his growth from homesick lad to experienced fur trader forms the heart of this unique and fascinating journal. He recorded his feelings and thoughts, and was a vital witness to all that

went on around him. Nelson's journals are particularly valuable for their candid observations on the customs and culture of the Ojibwa people and provide some of the most detailed descriptions available of Ojibwa spiritual practices. Long treasured by fur trade historians, the early journals of George Nelson are published here in their entirety for the first time. Careful editing and annotation by Laura Peers and Theresa Schenck explain references to people and Ojibwa culture and provide context on the North American fur trade.

Duck Michelle Hawkins 2021-01-28 Do you know that Ducks can see in color? And do you know that Ducks can fly in five to eight weeks after they are born? It is sometimes difficult to make our children understand the beauty of nature, to make them appreciate the small things, the beauty of a flower, the freshness of the air, the scent of grass. Many times we are not fortunate to be in contact with nature, far from a meadow, closed in the cities. Still, so often, while looking out from our balcony in a beautiful country house, we know how to observe but do not appreciate creation's beauty. Know the details and habits of a Duck as common as it is surprising, through a simple path, which fuels your child's interest and curiosity. That's the purpose of this book. But beware, prepare for the challenge! You will have to be able to answer the questions that your child will ask you by showing off their deep knowledge in the microworld of the Duck: -Mom, do you know what Ducks favorite color is? I do! -Hey dad, do you know when Ducks produce the most eggs? I do! -Grandpa, do you know where the only place that you can't find Ducks at? I do! -Grandma, do you know who were the first to make Ducks pets? I do! -Sarah, you're my big sister, and you've studied a lot, but I bet you don't know what a Ducks nest is made up of! I know that. You don't need anything else; just one click on "Buy Now," and you will let your child live a magical new adventure with his new friend Duck and the magic natural world of birds.

The Wild Girl, Natural Man, and the Monster Julia V. Douthwaite 2010-11-15 This study looks at the lives of the most famous "wild children" of eighteenth-century Europe, showing how they open a window onto European ideas about the potential and perfectibility of mankind. Julia V. Douthwaite recounts reports of feral children such as the wild girl of Champagne (captured in 1731 and baptized as Marie-Angélique Leblanc), offering a fascinating glimpse into beliefs about the difference between man and beast and the means once used to civilize the uncivilized. A variety of educational experiments failed to tame these feral children by the standards of the day. After telling their stories, Douthwaite turns to literature that reflects on similar experiments to perfect human subjects. Her examples range from utopian schemes for progressive childrearing to philosophical tales of animated statues, from revolutionary theories of regenerated men to Gothic tales of scientists run amok. Encompassing thinkers such as Rousseau, Sade,

Defoe, and Mary Shelley, Douthwaite shows how the Enlightenment conceived of mankind as an infinitely malleable entity, first with optimism, then with apprehension. Exposing the darker side of eighteenth-century thought, she demonstrates how advances in science gave rise to troubling ethical concerns, as parents, scientists, and politicians tried to perfect mankind with disastrous results.
