**South East Asia Colonial History V2** Paul Kratoska 2021-12-17 The six volumes that make up this set provide an overview of colonialism in South East Asia. The first volume deals with Portuguese, Spanish and Dutch Imperialism before 1800, the second with empire-building during the Nineteenth Century, and the third with the imperial heyday in the early Twentieth Century. The remaining volumes are devoted to the decline of empire, covering nationalism and the Japanese challenge to the Western presence in the region, and the transition to independence. The authors whose works are anthologised include both official participants, and scholars who wrote about events from a more detached perspective. Wherever possible, authors have been chosen who had first-hand experience in the region

**The Cambridge World History: Volume 7, Production, Destruction and Connection, 1750-Present, Part 1, Structures, Spaces, and Boundary Making** J. R. McNeill 2015-04-30 Since 1750, the world has become ever more connected, with processes of production and

destruction no longer limited by land- or water-based modes of transport and communication. Volume 7 of the Cambridge World History series, divided into two books, offers a variety of angles of vision on the increasingly interconnected history of humankind. The first book examines structures, spaces, and processes within which and through which the modern world was created, including the environment, energy, technology, population, disease, law, industrialization, imperialism, decolonization, nationalism, and socialism, along with key world regions. **European Empires and the People** John M. MacKenzie 2017-02-01 This is the first book to survey in comparative form the transmission of imperial ideas to the public in six European countries in the nineteenth and twentieth centuries. The chapters, focusing on France, Britain, the Netherlands, Belgium, Germany and Italy, provide parallel studies of the manner in which colonial ambitions and events in the respective European empires were given wider popular visibility. The international group of contributors, who are all scholars working at the cutting edge of these fields, place their work in the context of governmental policies, the

economic bases of imperial expansion, major events such as wars of conquest, the emergence of myths of heroic action in exotic contexts, religious and missionary impulses, as well as the new media which facilitated such popular dissemination. Among these media were the press, international exhibitions, popular literature, educational institutions and methods, ceremonies, church sermons and lectures, monuments, paintings and much else.

**The Earth and Its Peoples: A Global History, Volume II** Richard Bulliet 2010-01-01 THE EARTH AND ITS PEOPLES, Fifth Edition, presents world history in a balanced, global framework, shifting the focus away from political centers of power. This truly global text for the world history survey course employs fundamental themes of environment and technology and diversity and dominance to explore patterns of human interaction with their surroundings and with each other. The authors' approach reveals how humanity continues to shape and be shaped by the environment and how dominant structures and traditions are balanced and challenged by alternate beliefs. Special emphasis is given to technological development and how it underlies all human activity. **The Popular Front and the Global Circulation of Marxism through Calcutta, 1920s-1970s** Prasanta Dhar 2022-11-29 This book examines the global circulation of Marxism seen from one of its most highly charged sites: Calcutta in India. Building on but also revising existing approaches to global intellectual history, the book presents the circulation of Marxism through Calcutta as a historically-sited problem of mass mediation. Using tools from media studies, the book explores the way that Marxism was presented to the public, the technologies used, and the meanings of Marxism in twentieth-century Calcutta. Demonstrating how the Popular Front was split between the so-called 'people's group' and those whom were called 'intellectuals', the book argues that the people's group generally identified themselves as Marxists and preferred audio-visual media such as theatre, while the so-called intellectuals privileged academic rigour and print media, usually

referring to themselves as Marxians. Thus, the author reveals a polyphony of Marxisms in the Popular Front. Tracing Marxism back to the Bengal Renaissance and the Swadeshi and Naxal movements, this book shows how debate around the meaning of 'Marxism' continued throughout the 1970s in Calcutta, and eventually engendered the historiographical movement that has come to be known as Subaltern Studies.

*The Earth and Its Peoples - To 1550* Richard Bulliet 2006-10-27 Student Achievement Series: The Earth and Its Peoples is an innovative survey text and part of a program developed in partnership with teachers and students to meet the learning, study, and assessment goals necessary for student success. Through extensive research and focus groups conducted with a diverse cross-section of students, Houghton Mifflin presents a groundbreaking solution for skills mastery, understanding, and retention. Feedback from students has been instrumental in all aspects of development, from design and pedagogy to testing and assessment to title and cover. These elements culminate in a textbook program that reflects the way students learn and study best. As with all texts in this series, Student Achievement Series: The Earth and Its Peoples incorporates concise, to-the-point coverage; eliminates extraneous material; integrates pedagogy that reinforces key concepts; features a strong, supporting web component for review, testing, and assessment purposes; and provides students with real value for their educational dollar. Like the corresponding full-length version, Student Achievement Series: The Earth and Its Peoples takes a global approach to the study of world history. With its thematic focus on "environment and technology" and "diversity and dominance," the text offers a balanced perspective and a comparative approach.

*Imperialism in East Africa (Volume 2)* Dan Nabudere 1981 Professor Nabudere is one of the most prominent social theorists working in Africa. In this work, he applies the general theory developed in his Political Economy of Imperialism (1980) to the region of East Africa, and shows empirically how the East African economy has responded developments within Imperialism over the past century. This volume deals with the

issues of regional cooperation within East Africa, the new forms of integration within the framework of multilateral imperialism, and the role of the nation state, By examining East Africa as a single region and relating the internal forces for change to worldwide historical factors, Nabudere provides a new approach to the modern history of East Africa. For an understanding of the contrasting predicaments of Kenya, Uganda, and Tanzania today, Nabudere's work is indispensable.

**A Culture of Growth** Joel Mokyr 2016-11-15 Why Enlightenment culture sparked the Industrial Revolution During the late eighteenth century, innovations in Europe triggered the Industrial Revolution and the sustained economic progress that spread across the globe. While much has been made of the details of the Industrial Revolution, what remains a mystery is why it took place at all. Why did this revolution begin in the West and not elsewhere, and why did it continue, leading to today's unprecedented prosperity? In this groundbreaking book, celebrated economic historian Joel Mokyr argues that a culture of growth specific to early modern Europe and the European Enlightenment laid the foundations for the scientific advances and pioneering inventions that would instigate explosive technological and economic development. Bringing together economics, the history of science and technology, and models of cultural evolution, Mokyr demonstrates that culture—the beliefs, values, and preferences in society that are capable of changing behavior—was a deciding factor in societal transformations. Mokyr looks at the period 1500–1700 to show that a politically fragmented Europe fostered a competitive "market for ideas" and a willingness to investigate the secrets of nature. At the same time, a transnational community of brilliant thinkers known as the "Republic of Letters" freely circulated and distributed ideas and writings. This political fragmentation and the supportive intellectual environment explain how the Industrial Revolution happened in Europe but not China, despite similar levels of

technology and intellectual activity. In Europe, heterodox and creative thinkers could find sanctuary in other countries and spread their thinking across borders. In contrast, China's version of the Enlightenment remained controlled by the ruling elite. Combining ideas from economics and cultural evolution, *A Culture of Growth* provides startling reasons for why the foundations of our modern economy were laid in the mere two centuries between Columbus and Newton.

First published in 1988, this title is part of the Bloomsbury Academic Collections series.

**The Continuing Imperialism of Free Trade** Jo Grady 2018-10-08 In 1953, John Gallagher and Ronald Robinson shook the foundations of imperial history with their essay 'The Imperialism of Free Trade'. They reshaped how historians saw the British empire, focussing not on the 'red bits on the map' and the wishes of policy makers in London, but rather on British economic and political influence globally. Expanding on this analysis, this volume provides an examination of imperialism which brings the reader right up to the present. This book offers an innovative assessment and analysis of the history and contemporary status of imperial control. It does so in four parts, examining the historical emergence and traditions of imperialism; the relationships between the periphery and the metropolitan; the role of supranational agencies in the extension of imperial control; and how these connect to financialisation and international political economy. The book provides a dynamic and unique perspective on imperialism by bringing together a range of contributors - both established and up-and-coming scholars, activists,

and those from industry - from a wide range of disciplines and backgrounds. In providing these authors a space to apply their insights, this engaging volume sheds light on the practical implications of imperialism for the contemporary world. With a broad chronological and geographical sweep, this book provides theoretical and empirical engagements with the nature of imperialism and its effects upon societies. It will be of great interest to a broad range of disciplines across the humanities and social sciences, especially those working in History, Politics, and Management and Organisation Studies.

**Exiting war** Romain Fathi 2022-01-18 Exiting war explores a particular 1918-20 'moment' in the British Empire's history, between the First World War's armistices of 1918, and the peace treaties of 1919 and 1920. That moment, we argue, was a challenging and transformative time for the Empire. While British authorities successfully answered some of the post-war tests they faced, such as demobilisation, repatriation, and fighting the widespread effects of the Spanish flu, the racial, social, political and economic hallmarks of their imperialism set the scene for a wide range of expressions of loyalties and disloyalties, and anticolonial movements. The book documents and conceptualises this 1918-20 'moment' and its characteristics as a crucial three-year period of transformation for and within the Empire, examining these years for the significant shifts in the imperial relationship that occurred and as laying the foundation for later change in the imperial system.

*Export Empire* Stephen G. Gross 2016-01-05 German imperialism in Europe evokes images of military aggression and ethnic cleansing. Yet, even under the Third Reich, Germans deployed more subtle forms of influence that can be called soft power or informal imperialism. Stephen G. Gross examines how, between 1918 and 1941, German businessmen and academics turned their nation - an economic wreck after World War I - into the single largest trading partner with the Balkan states, their primary source for development aid and their diplomatic patron. Building on traditions from the 1890s and working through transnational trade fairs, chambers of commerce, educational exchange programmes and development projects, Germans collaborated with Croats, Serbians and Romanians to create a continental bloc, and to exclude Jews from commerce. By gaining access to critical resources during a global depression, the proponents of soft power enabled Hitler to militarise the German economy and helped make the Third Reich's territorial conquests after 1939 economically possible.

**Spanish Economic Growth, 1850-2015** Leandro Prados de la Escosura 2018-08-10 This book is open access under a CC BY 4.0 license.

This text offers a comprehensive and nuanced view of the economic development of Spain since 1850. It provides a new set of historical GDP estimates for Spain from the demand and supply sides, and presents a reconstruction of production and expenditure series for the century prior to the introduction of modern national accounts. The author splices available national accounts sets over the period 1958–2015 through interpolation, as an alternative to conventional retropolation. The resulting national accounts series are linked to the historical estimates providing yearly series for GDP and its components since 1850. On the basis of new population estimates, the author derives GDP per head, decomposed into labour productivity and the amount of work per person, and placed into international perspective. With theoretical reasoning and historiographical implications, Prados de la Escosura provides a useful methodological reference work for anyone interested in national accounting. Open Access has been made possible thanks to Fundación Rafael del Pino's generous support. Like the corresponding full-length version, SAS: The Earth and Its Peoples takes a global approach to the study of world history. With its thematic focus on "environment and technology" and

"diversity and dominance," the text offers a balanced perspective and a comparative approach. Each chapter opens with a set of Focus Questions that correspond to a designated section of the chapter. These questions provide a framework for the material to follow and promote active reading. Where appropriate, key information—such as section-ending Checking In summaries—appears in bulleted format for quick and clear presentation and ample opportunity for students to check their understanding. Tying It Together chapter summaries provide a brief response to each chapter-opening Focus Question, helping students synthesize chapter themes and directing them to areas that may require further study. Key terms are highlighted and defined throughout the text, and appear as a group at the end of each chapter with page references that direct students to the definitions. Pronunciation guides, which immediately follow difficult or unfamiliar words, give students the confidence they need to discuss what they've read in the chapter. The fully integrated SAS technology program promotes review, retention, and skills assessment. Icons in the margins of the text link students to web site material such as online quizzing, audio pronunciation guides, and chapter summaries. A range of course management tools further enhances learning and instruction. Titles in the Student Achievement Series are affordably priced, making them ideal for student learning—and student budgets. The Earth and Its Peoples is also available in comprehensive and brief versions.

**Imperialism in the Twenty-First Century** John Smith 2016-01-22  
 Winner of the first Paul A. Baran-Paul M. Sweezy Memorial Award for an original monograph concerned with the political economy of imperialism, John Smith's *Imperialism in the Twenty-First Century* is a seminal examination of the relationship between the core capitalist countries and the rest of the world in the age of neoliberal globalization. Deploying a sophisticated Marxist methodology, Smith begins by tracing the production of certain iconic commodities—the T-shirt, the cup of coffee, and the iPhone—and demonstrates how these generate enormous outflows of money from the countries of the Global South to transnational corporations headquartered in the core capitalist nations of the Global

North. From there, Smith draws on his empirical findings to powerfully theorize the current shape of imperialism. He argues that the core capitalist countries need no longer rely on military force and colonialism (although these still occur) but increasingly are able to extract profits from workers in the Global South through market mechanisms and, by aggressively favoring places with lower wages, the phenomenon of labor arbitrage. Meticulously researched and forcefully argued, *Imperialism in the Twenty-First Century* is a major contribution to the theorization and critique of global capitalism.

Empire De/Centered Dr Maxim Waldstein 2013-10-28 In 1991 the Soviet

empire collapsed, at a stroke throwing the certainties of the Cold War world into flux. Yet despite the dramatic end of this 'last empire', the idea of empire is still alive and well, its language and concepts feeding into public debate and academic research. Bringing together a multidisciplinary and international group of authors to study Soviet society and culture through the categories empire and space, this collection demonstrates the enduring legacy of empire with regard to Russia, whose history has been marked by a particularly close and ambiguous relationship between nation and empire building, and between national and imperial identities. Parallel with this discussion of empire, the volume also highlights the centrality of geographical space and spatial imaginings in Russian and Soviet intellectual traditions and social practices; underlining how Russia's vast geographical dimensions have profoundly informed Russia's state and nation building, both in practice and concept. Combining concepts of space and empire, the collection offers a reconsideration of Soviet imperial legacy by studying its cultural and societal underpinnings from previously unexplored perspectives. In so doing it provides a reconceptualization of the theoretical and methodological foundations of contemporary imperial and spatial studies, through the example of the experience provided by Soviet society and culture.

The Shadows of Empire Samir Puri 2021-02-02 A masterful, thought-provoking, and wide-ranging study of how the vestiges of the imperial era shape society today. In this groundbreaking narrative, *The Shadows of Empire* explains (in the vein of *The Silk Roads* and *Prisoners of Geography*) how the world's imperial legacies still shape our lives—as well as the thorniest issues we face today. For the first time in millennia we live without formal empires. But that doesn't mean we don't feel their presence rumbling through history. From Russia's incursions in the Ukraine to Brexit; from Trump's America-First policy to China's forays into Africa; from Modi's India to the hotbed of the Middle East, Samir Puri provides a bold new framework for understanding the world's complex rivalries and politics. Organized by region, and covering vital topics such as security, foreign policy, national politics and commerce,

*The Shadows of Empire* combines gripping history and astute analysis to explain why the history of empire affects us all in profound ways; it is also a plea for greater awareness, both as individuals and as nations, of how our varied imperial pasts have contributed to why we see the world in such different ways.

Spanish Economic Growth, 1850–2015 Leandro Prados de la Escosura 2017-09-04 This book is open access under a CC BY 4.0 license. This text offers a comprehensive and nuanced view of the economic development of Spain since 1850. It provides a new set of historical GDP estimates for Spain from the demand and supply sides, and presents a reconstruction of production and expenditure series for the century prior to the introduction of modern national accounts. The author splices available national accounts sets over the period 1958–2015 through interpolation, as an alternative to conventional retropolation. The resulting national accounts series are linked to the historical estimates providing yearly series for GDP and its components since 1850. On the basis of new population estimates, the author derives GDP per head, decomposed into labour productivity and the amount of work per person, and placed into international perspective. With theoretical reasoning and historiographical implications, Prados de la Escosura provides a useful methodological reference work for anyone interested in national accounting. Open Access has been made possible thanks to Fundación Rafael del Pino's generous support. You can find the full dataset here: <http://espacioinvestiga.org/bbdd-chne/?lang=en> 'This book stands among the classics for the Kuznetian paradigm in empirical economics. This is the definitive study of Spain's transition to a modern economy.' —Patrick Karl O'Brien, Emeritus Fellow at St. Antony's College, the University of Oxford, UK, and Professor Emeritus of Global Economic History at the London School of Economics and Political Science, UK 'The definitive account of Spanish economic growth since 1850, based firmly on a magisterial reconstruction of that country's national accounts and an unrivalled knowledge of both Spanish and global economic history of the period.' —Stephen Broadberry, Professor of Economic History at Nuffield College, the University of Oxford, UK

The Earth and Its Peoples: A Global History, Volume I: To 1550 Richard Bulliet 2014-01-01 Featuring a beautiful new design, THE EARTH AND ITS PEOPLES, Sixth Edition, presents world history in a balanced, global framework, shifting the focus away from political centers of power. This truly global text for the world history survey course employs fundamental themes of “environment and technology” and “diversity and dominance” to explore patterns of humans' interactions with their surroundings and with each other. The authors' approach reveals how humanity continues to shape and be shaped by the environment and how dominant structures and traditions are balanced and challenged by alternate beliefs. Special emphasis is given to technological development and how it underlies all human activity. Highly acclaimed in their fields of study, the authors bring a wide array of expertise to the program. A combination of strong scholarship and detailed pedagogy gives the book its reputation for rigor and student accessibility.
