*Flat Earth for Dummies* 101 Elaine Chadwick  
Clanton 2018-09-16 We live in a world that is constantly changing. Governments and media demand conformity in our beliefs and behavior. But, what if our beliefs are based on disinformation and lies that are perpetuated to

control the general population while only a few elite guard the truth, intent on keeping it corralled in obscurity? *Flat Earth for Dummies* 101 covers the major topics of the Flat Earth comparing it to the heliocentric theory of a spinning ball. Topics include Space Travel, Astronomy, the ISS, Antarctica, Gravity, Extraterrestrials, Meteors, Tides, the Sun, the

Moon, Circumnavigation, Curvature, Freemasons, Gravity, Religion, and Why the Subterfuge? Illustrations make each topic easy to understand. Cartoons at the end of each chapter provide humor that contributes to the enjoyment of understanding the Flat Earth movement. Each chapter is annotated with a list of references, many in the form of web addresses. A recommended reading list, You Tube Channels, and a metric conversion chart are included as appendices. This book is a stepping stone to further research into Flat Earth. However, once you have read it, you may actually become a Flat Earther!

while novice fishermen will gain a view of the world as Middleton saw it: "There are so few left, so few who believe the earth is enough." *Going-to-the-Sun* Vachel Lindsay 2021-11-05 This is a collection of poems written by a founder of modern singing poetry, Vachel Lindsay. It is inspired by his experience trekking the Going-to-the-Sun Mountain, a 9,647-foot mountain peak located in Glacier National Park in the U.S. state of Montana. Several of the works featured include The Fairy Circus, The Battle-Ax of the Sun, and the Pheasant Speaks of His Birthday.

Flat Earth: Investigations Into a Massive 500-Year Heliocentric Lie James W. Lee 2017-03-25 Full COLOR Book This book is like no other book about our modern history. For open minds, it may begin a whole new awakening as to our understanding of who we are, where we came from, and a very profound and powerful re-connection to our common Theocosmology, that has been occulted from most for over 500 years.

How can it be that for over 5,000 years, as far back as modern history allows us, that nearly every single culture on Earth believed the land we all have lived upon since our birth was known to be mostly flat, motionless and the center of just one creation we call a uni-verse, just one of many verses, of many creations? Nearly all ancient cultures previous to the current Roman Dynasty (310 AD - present) held Flat Earth Theocosmological belief systems. I am not just speaking about one or two civilizations of our common past, but the cultures of most civilizations covering thousands of years, across all lands and races. From the Ancient Chinese, with their Ying/Yang symbolism of the dance of the Sun and Moon in circle above, to the Indian Vedic's, Buddhists, Sumerians, Chaldeans, Babylonians, Egyptians, Ancient Hebrews, Greeks and Nordic Vikings. All had geocentric Flat Earth theocosmology. That all stars, the Sun and the Moon, were centered around our Earth signified the cosmic importance of humans in

the really big picture of our universal make up. That Earth was the center for all of this creation. The word "world" comes from the energy vortex created by the electromagnetic battery of our Flat Earth connected through the North Pole and Antarctic Circles positive and negative charges. The salt in the ocean providing the electrolyte catalyst to charge Earth's plasma battery field. We all are contained in a plasma toroidal field of perpetual regeneration inside a closed system energy vortex which causes a "whirling" action, hence the word whirled or world. We call it a sunrise and sunset, yet, according to the most basic of heliocentric theory, this is a grossly incorrect term, that has never been corrected for over 100 years from academia to the science community. Why? One possible reason was when heliocentrism was introduced to the public education systems of Western world, most worked and lived outdoors. Even peasants knew the Earth was still and the Sun was moving and if anyone tried to sell them

that the Sun was not moving would have been met with complete disbelief and derided for sheer stupidity and the ruling governance would lose instant credibility. So what would be the correct terms for a Flat Earth movement of the Sun instead of "Sunrise" and "Sunset"? For over the past 100 years, most world education systems continue to this day to teach little-to-none of Flat Earth history and cosmology connecting to this rich history of all our common pasts. Why would they not want us to know a narrative of our existence where the Sun, the Moon, and the Stars were placed in the sky above to help guide and assist us in our own evolution of consciousness? What would anyone gain by creating a myth so that we would feel insignificant, small and just one of billions and billions and billions of other planets, stars and life? If you were in power, would you want the minions one day to take over your power base that has been created over hundreds, if not thousands of years. The powers in charge of

world propaganda, monetary policy, religion and infotainment wish to keep us fully disempowered as to our highest potential of humanities, and our own, evolutions. From Copernicus, all the way to the creation of the Big Bang Theory by Jesuit priest, Father Gorge Lemaitre, the Vatican and the Society of Jesus have had, and still to this day, have large influence in all things Astronomy and space observation. In fact, it was Father Lamaitre, not Albert Einstein, who in 1922 created the scientific "provable" science of our common Theocosmology created an atheistic explanation of how our world came to be.

*The Ultimate Guide to Navigating without a Compass* Christopher Nyerges 2020-04-14 Learn how to navigate without a compass, even when it seems impossible! Whether we are walking or driving, whether in the woods, on the water, or in the city, it's vital that we know where we are and are able to find our way around. But with society's current dependence on modern tools and technology, many persons would have no

idea how to navigate without a compass or GPS. In an emergency situation, that lack of knowledge could easily prove fatal. In *The Ultimate Guide to Navigating without a Compass*, survival expert Christopher Nyerges provides readers with all the skills that they may need to navigate naturally. The book begins by describing the meaning of natural navigation, and then moves on to describe, in detail, the methods of natural navigation, including using the sun, the stars, the moon, and shadows. Additional topics include: How to read a map  
How to make a sun dial  
How to make a star dial  
How to use clouds to predict weather patterns  
How to track celestial changes  
How to gauge time through natural observation  
And much more! With helpful diagrams, illustrations, and sidebars, *The Ultimate Guide to Navigating without a Compass* is the fundamental reference book for learning how to navigate by natural methods.
