Last Man Down Richard Picciotto 2003-05-06 A first responder's harrowing account of 9/11—the inspirational true story of an American hero who gave nearly everything for others during one of New York City's darkest hours. On September

11, 2001, FDNY Battalion Chief Richard “Pitch” Picciotto answered the call heard around the world. In minutes, he was at Ground Zero of the worst terrorist attack on American soil, as the Twin Towers of the World Trade Center began to burn—and then to buckle. A veteran of the 1993 bombing of the World Trade Center, Picciotto was eerily familiar with the inside of the North Tower. And it was there that he concentrated his rescue efforts. It was in its smoky stairwells where he heard and felt the South Tower collapse. He made the call for firemen and rescue workers to evacuate, while he stayed behind with a skeleton team of men to help evacuate a group of disabled and infirm civilians. And it was in the rubble of the North Tower where Picciotto found himself buried—for more than four hours after the building’s collapse.

Paradise Lizzie Johnson 2022-08-16 The definitive firsthand account of California’s Camp Fire, the nation’s deadliest wildfire in a century, Paradise is a riveting examination of what went

wrong and how to avert future tragedies as the climate crisis unfolds. “A tour de force story of wildfire and a terrifying look at what lies ahead.”—San Francisco Chronicle (Best Books of the Year) On November 8, 2018, the people of Paradise, California, awoke to a mottled gray sky and gusty winds. Soon the Camp Fire was upon them, gobbling an acre a second. Less than two hours after the fire ignited, the town was engulfed in flames, the residents trapped in their homes and cars. By the next morning, eighty-five people were dead. As a reporter for the San Francisco Chronicle, Lizzie Johnson was there as the town of Paradise burned. She saw the smoldering rubble of a historic covered bridge and the beloved Black Bear Diner and she stayed long afterward, visiting shelters, hotels, and makeshift camps. Drawing on years of on-the-ground reporting and reams of public records, including 911 calls and testimony from a grand jury investigation, Johnson provides a minute-by-minute account of the Camp Fire, following

residents and first responders as they fight to save themselves and their town. We see a young mother fleeing with her newborn; a school bus full of children in search of an escape route; and a group of paramedics, patients, and nurses trapped in a cul-de-sac, fending off the fire with rakes and hoses. In *Paradise*, Johnson documents the unfolding tragedy with empathy and nuance. But she also investigates the root causes, from runaway climate change to a deeply flawed alert system to Pacific Gas and Electric's decades-long neglect of critical infrastructure. A cautionary tale for a new era of megafires, *Paradise* is the gripping story of a town wiped off the map and the determination of its people to rise again.

[Granite Mountain](#) Brendan McDonough
2016-05-03 The true story behind the events that inspired the major motion picture *Only the Brave*. A "unique and bracing" (Booklist) first-person account by the sole survivor of Arizona's disastrous 2013 Yarnell Hill Fire, which took the

lives of 19 "hotshots"--firefighters trained specifically to battle wildfires. Brendan McDonough was on the verge of becoming a hopeless, inveterate heroin addict when he, for the sake of his young daughter, decided to turn his life around. He enlisted in the Granite Mountain Hotshots, a team of elite firefighters based in Prescott, Arizona. Their leader, Eric Marsh, was in a desperate crunch after four hotshots left the unit, and perhaps seeing a glimmer of promise in the skinny would-be recruit, he took a chance on the unlikely McDonough, and the chance paid off. Despite the crew's skepticism, and thanks in large part to Marsh's firm but loving encouragement, McDonough unlocked a latent drive and dedication, going on to successfully battle a number of blazes and eventually win the confidence of the men he came to call his brothers. Then, on June 30, 2013, while McDonough--"Donut" as he'd been dubbed by his team--served as lookout, they confronted a freak,

3,000-degree inferno in nearby Yarnell, Arizona. The relentless firestorm ultimately trapped his hotshot brothers, tragically killing all 19 of them within minutes. Nationwide, it was the greatest loss of firefighter lives since the 9/11 attacks. Granite Mountain is a gripping memoir that traces McDonough's story of finding his way out of the dead end of drugs, finding his purpose among the Granite Mountain Hotshots, and the minute-by-minute account of the fateful day he lost the very men who had saved him. A harrowing and redemptive tale of resilience in the face of tragedy, Granite Mountain is also a powerful reminder of the heroism of the people who put themselves in harm's way to protect us every day.

Breathing Fire Jaime Lowe 2021-07-27 A dramatic, revelatory account of the female inmate firefighters who battle California wildfires. Shawna was overcome by the claustrophobia, the heat, the smoke, the fire, all just down the canyon and up the ravine. She was

feeling the adrenaline, but also the terror of doing something for the first time. She knew how to run with a backpack; they had trained her physically. But that's not training for flames. That's not live fire. California's fire season gets hotter, longer, and more extreme every year — fire season is now year-round. Of the thousands of firefighters who battle California's blazes every year, roughly 30 percent of the on-the-ground wildland crews are inmates earning a dollar an hour. Approximately 200 of those firefighters are women serving on all-female crews. In *Breathing Fire*, Jaime Lowe expands on her revelatory work for *The New York Times Magazine*. She has spent years getting to know dozens of women who have participated in the fire camp program and spoken to captains, family and friends, correctional officers, and camp commanders. The result is a rare, illuminating look at how the fire camps actually operate — a story that encompasses California's underlying catastrophes of climate change,

economic disparity, and historical injustice, but also draws on deeply personal histories, relationships, desires, frustrations, and the emotional and physical intensity of firefighting. Lowe's reporting is a groundbreaking investigation of the prison system, and an intimate portrayal of the women of California's Correctional Camps who put their lives on the line, while imprisoned, to save a state in peril. Firefighter Exam and Interview Prep William Peltz 2016-01-01 Firefighter Exam and Interview Prep helps candidates prepare for every area of the career fire service entry-level examination, regardless whether the exam is written, video, or computer-based and regardless of test publisher. It helps individuals who have only

begun contemplating whether to become a firefighter as well as people who have some experience in the application process. It is the only prep book that explains psychology evaluation questions and science concepts, and it is the only one that contains an extensive math remediation section. Written in a clear, easy to understand style, Amatrudo and Peltz offer proven, score-raising, test-taking strategies. Sample questions and practice tests are accompanied by explanations as to how the correct answers were obtained. This book also helps the applicant begin to prepare for the interview. Written by a highly respected officer and instructor in the career fire service and an award-winning master educator with specialties in the application of brain science and high stakes test taking, this book strives to create the best prepared, best informed applicant possible. *Smoke Your Firefighter Written Exam* Paul S. testing process. Since there are usually an enormous number of candidates who apply for the position, difficult written examinations are an effective way to narrow the field. There is no excuse for a firefighter candidate to fail a written exam. Those who are committed to their goal will plan and prepare for the written exam to improve their chances of success. While there are other self-help books devoted to helping aspiring firefighters, they only provide questions and answers. These books are useless if you do not understand how to work out the problems. *Smoke Your Firefighter Written Exam* goes beyond providing sample questions and answers. It teaches the reader the basic rules and principles behind the questions; in other words, how to solve each complex problem. Each section begins with an overview of how to solve the problem. The reasoning behind the correct answer is presented in clear, easy-to-understand language. The reader will become proficient in: mathematics (word problems, geometry,

addition, subtraction, multiplication); mechanical aptitude (gears, levers, pulleys, incline planes, screws); language (reading, spelling, grammar, vocabulary); perceptual ability; spatial relations; matching parts and figures; map reading. Illustrations are used throughout the book to teach basic principles and present problems to solve.

[Smokejumper](#) Jason A. Ramos 2015-07-14 A rare inside look at the thrilling world of smokejumpers, the airborne firefighters who parachute into the most remote and rugged areas of the United States, confronting the growing threat of nature's blazes. Forest and wildland fires are growing larger, more numerous, and deadlier every year — record drought conditions, decades of forestry mismanagement, and the increasing encroachment of residential housing into the wilderness have combined to create a powder keg that threatens millions of acres and thousands of lives every year. of men and women are part of America's front-line defense: smokejumpers. The smokejumper program operates through both the U.S. Forest Service and the Bureau of Land Management. Though they are tremendously skilled and only highly experienced and able wildland firefighters are accepted into the training program, being a smokejumper remains an art that can only be learned on the job. Forest fires often behave in unpredictable ways: spreading almost instantaneously, shooting downhill behind a stiff tailwind, or even flowing like a liquid. In this extraordinarily rare memoir by an active-duty jumper, Jason Ramos takes readers into his exhilarating and dangerous world, explores smokejumping's remarkable history, and explains why their services are more essential than ever before.

The Library Book Susan Orlean 2019-10-01
Susan Orlean's bestseller and New York Times Notable Book is "a sheer delight...as rich in insight and as varied as the treasures contained

on the shelves in any local library" (USA TODAY)—a dazzling love letter to a beloved institution and an investigation into one of its greatest mysteries. "Everybody who loves books should check out *The Library Book*" (The Washington Post). On the morning of April 28, 1986, a fire alarm sounded in the Los Angeles Public Library. The fire was disastrous: it reached two thousand degrees and burned for more than seven hours. By the time it was extinguished, it had consumed four hundred thousand books and damaged seven hundred thousand more. Investigators descended on the scene, but more than thirty years later, the mystery remains: Did someone purposefully set fire to the library—and if so, who? Weaving her lifelong love of books and reading into an investigation of the fire, award-winning New Yorker reporter and New York Times bestselling author Susan Orlean delivers a "delightful...reflection on the past, present, and future of libraries in America" (New York

magazine) that manages to tell the broader story of libraries and librarians in a way that has never been done before. In the “exquisitely written, consistently entertaining” (The New York Times) *The Library Book*, Orlean chronicles the LAPL fire and its aftermath to showcase the larger, crucial role that libraries play in our lives; delves into the evolution of libraries; brings each department of the library to vivid life; studies arson and attempts to burn a copy of a book herself; and reexamines the case of Harry Peak, the blond-haired actor long suspected of setting fire to the LAPL more than thirty years ago. “A book lover’s dream...an ambitiously researched, elegantly written book that serves as a portal into a place of history, drama, culture, and stories” (Star Tribune, Minneapolis), Susan Orlean’s thrilling journey through the stacks reveals how these beloved institutions provide much more than just books—and why they remain an essential part of the heart, mind, and soul of our country.

The Fireman Joe Hill 2016-05-17 From the award-winning, New York Times bestselling author of *NOS4A2* and *Heart-Shaped Box* comes a chilling novel about a worldwide pandemic of spontaneous combustion that threatens to reduce civilization to ashes and a band of improbable heroes who battle to save it, led by one powerful and enigmatic man known as the Fireman. The fireman is coming. Stay cool. No one knows exactly when it began or where it originated. A terrifying new plague is spreading like wildfire across the country, striking cities one by one: Boston, Detroit, Seattle. The doctors call it *Draco Incendia Trychophyton*. To everyone else it’s *Dragonscale*, a highly contagious, deadly spore that marks its hosts with beautiful black and gold marks across their bodies—before causing them to burst into flames. Millions are infected; blazes erupt everywhere. There is no antidote. No one is safe. Harper Grayson, a compassionate, dedicated nurse as pragmatic as *Mary Poppins*, treated

hundreds of infected patients before her hospital burned to the ground. Now she's discovered the telltale gold-flecked marks on her skin. When the outbreak first began, she and her husband, Jakob, had made a pact: they would take matters into their own hands if they became infected. To Jakob's dismay, Harper wants to live—at least until the fetus she is carrying comes to term. At the hospital, she witnessed infected mothers give birth to healthy babies and believes hers will be fine too. . . if she can live long enough to deliver the child. Convinced that his do-gooding wife has made him sick, Jakob becomes unhinged, and eventually abandons her as their placid New England community collapses in terror. The chaos gives rise to ruthless Cremation Squads—armed, self-appointed posses roaming the streets and woods to exterminate those who they believe carry the spore. But Harper isn't as alone as she fears: a mysterious and compelling stranger she briefly met at the hospital, a man in a dirty yellow fire

fighter's jacket, carrying a hooked iron bar, straddles the abyss between insanity and death. Known as The Fireman, he strolls the ruins of New Hampshire, a madman afflicted with Dragonscale who has learned to control the fire within himself, using it as a shield to protect the hunted . . . and as a weapon to avenge the wronged. In the desperate season to come, as the world burns out of control, Harper must learn the Fireman's secrets before her life—and that of her unborn child—goes up in smoke.

Chasing Smoke Aaron Williams 2017-10-14 "At first I'm calm as the trees fall. But suddenly a rat's nest of wood, bent horizontal and cribbed into the trees above us, comes down in a rush of a hundred machine gun snaps. Trees caught in the nest flail around before hitting the ground. Our eyes dart everywhere, trying to keep track of every moment. Trees break free and swing themselves like catapults. Splintered chunks of wood slash through the air like propellers... Falling trees is the most dangerous job in North America." --Aaron Williams British Columbia's weather and geography--hot dry summers, steep terrain, and population density in forested areas--make it one of the most difficult places in the world to fight forest fires. Chasing Smoke is an enthralling insider-account of how a fire season unfolds. Experienced firefighter Aaron Williams offers a tangible window into the intensely physical, high-adrenalin lifestyle shared by his

crew of eccentrics, all eager to be on the front line. Williams shares what it's like to work sixteen-hour days in an apocalyptic landscape, where the smoke is so thick your snot runs black and you need to drink ten litres of water a day. What it's like to make a stupid mistake and singe your beard in front of your crew, or spend hours hosing a spot the size of a queen mattress and still not extinguish the burn. What it's like to hear a tree fall, a co-worker's shout, and imagine the worst. From the "curated gauntlet of abuse" that makes up rookie week, until the last length of hose is rolled up at the end of the burn season, Williams chronicles the seasonal existence of a firefighter, all while examining the wider world of firefighting--interweaving the history, mechanics and politics--as well as the micro-world of the small crew who willingly put their lives on the line.

Countless ordinary Americans also suffer from PTSD, following incidences of abuse, crime, natural disasters, accidents, or other trauma—yet in many cases their symptoms are still shrouded in mystery, secrecy, and shame. Deep Down Dark: The Untold Stories of 33 Men Buried in a Chilean Mine and the Miracle that Set Them Free. When a bolt of lightning ignited a hilltop in the sleepy town of Yarnell, Arizona, in June of 2013, setting off a blaze that would grow into one of the deadliest fires in American history, the twenty men who made up the Granite Mountain Hotshots sprang into action. An elite crew trained to combat the most challenging wildfires, the Granite Mountain Hotshots were a ragtag family, crisscrossing the American West and wherever else the fires took them. The Hotshots were loyal to one another and dedicated to the tough job they had. There's Eric Marsh, their devoted and demanding superintendent who turned his own personal demons into lessons he used to mold, train and guide his crew; Jesse Steed, their captain, a former Marine, a beast on the fire line and a family man who wasn't afraid to say "I love you" to the firemen he led; Andrew Ashcraft, a team leader still in his 20s who struggled to balance

his love for his beautiful wife and four children and his passion for fighting wildfires. We see this band of brothers at work, at play and at home, until a fire that burned in their own backyards leads to a national tragedy. Impeccably researched, drawing upon more than a hundred hours of interviews with the firefighters' families, colleagues, state and federal officials, and fire historians and researchers, New York Times Phoenix Bureau Chief Fernanda Santos has written a riveting, pulse-pounding narrative of an unthinkable disaster, a remarkable group of men and the raging wildfires that threaten our country's treasured wild lands. The Fire Line is the winner of the 2017 Spur Award for Best First Nonfiction Book, and Spur Award Finalist for Best Western Contemporary Nonfiction.
