Embracing the Beat of Appearance: An Mental Symphony within **Race Of The Century**

In a global consumed by screens and the ceaseless chatter of immediate communication, the melodic beauty and psychological symphony created by the prepared term usually fade into the backdrop, eclipsed by the relentless noise and distractions that permeate our lives. Nevertheless, set within the pages of **Race Of The Century** a wonderful literary treasure filled with natural thoughts, lies an immersive symphony waiting to be embraced. Crafted by an outstanding musician of language, that interesting masterpiece conducts visitors on a mental trip, skillfully unraveling the hidden tunes and profound affect resonating within each cautiously constructed phrase. Within the depths of this poignant evaluation, we will examine the book is central harmonies, analyze their enthralling writing design, and submit ourselves to the profound resonance that echoes in the depths of readers souls.

*Doing Race* Hazel Rose Markus 2010 *Doing Race* focuses on race and ethnicity in everyday life: what they are, how they work, and why they matter. Going to school and work, renting an apartment or buying a house, watching television, voting, listening to music, reading books and newspapers, attending religious services, and going to the doctor are all everyday activities that are influenced by assumptions about who counts, whom to trust, whom to care about, whom to include, and why. Race and ethnicity are powerful precisely because they organize modern society and play a large role in fueling violence around the globe. *Doing Race* is targeted to undergraduates; it begins with an introductory essay and includes original essays by well-known scholars. Drawing on the latest science and scholarship, the collected essays emphasize that race and ethnicity are not things that people or groups have or are, but rather sets of actions that people do. *Doing Race* provides compelling evidence that we are not yet in a "post-race" world and that race and ethnicity matter for everyone. Since race and ethnicity are the products of human actions, we can do them differently. Like studying the human genome or the laws of economics, understanding race and ethnicity is a necessary part of a twenty first century education.

**Race Unmasked** Michael Yudell 2014-09-09 *Race*, while drawn from the visual cues of human diversity, is an idea with a measurable past, an identifiable present, and an uncertain future. The concept of race has been at the center of both triumphs and tragedies in American history and has had a profound effect on the human experience. *Race Unmasked* revisits the origins of commonly held beliefs about the scientific nature of racial differences, examines the roots of the modern idea of race, and explains why race continues to generate controversy as a tool of classification even in our genomic age. Surveying the work of some of the twentieth century's most notable scientists, *Race Unmasked* reveals how genetics and related biological disciplines formed and preserved ideas of race and, at times, racism. A gripping history of science and scientists, *Race Unmasked* elucidates the limitations of a racial worldview and throws the contours of our current and evolving understanding of human diversity into sharp relief.

*Relative Races* Brigitte Fielder 2020-09-21 In *Relative Races*, Brigitte Fielder presents an alternative theory of how race is ascribed. Contrary to notions of genealogies by which race is transmitted from parents to children, the examples Fielder discusses from nineteenth-century literature, history, and popular culture

show how race can follow other directions: Desdemona becomes less than fully white when she is smudged with Othello's blackface, a white woman becomes Native American when she is adopted by a Seneca family, and a mixed-race baby casts doubt on the whiteness of his mother. Fielder shows that the genealogies of race are especially visible in the racialization of white women, whose whiteness often depends on their ability to reproduce white family and white supremacy. Using black feminist and queer theories, Fielder presents readings of personal narratives, novels, plays, stories, poems, and images to illustrate how interracial kinship follows non-heteronormative, non-biological, and non-patrilineal models of inheritance in nineteenth-century literary culture.

**Race Brokers** Elizabeth Korver-Glenn 2021-04-08 "Race Brokers examines how housing market professionals-including housing developers, real estate agents, mortgage lenders, and appraisers-construct 21st century urban housing markets in ways that contribute to or undermine racial segregation. Drawing on extensive ethnographic and interview data collected in Houston, Texas, *Race Brokers* shows that housing market professionals play a key role in connecting people-or refusing to connect people-to housing resources and opportunities. They make these brokering decisions through reference to racist or anti-racist ideas. Typically, housing market professionals draw from racist ideas that rank-order people and neighborhoods according to their perceived economic and cultural housing market value, entwining racism with their housing market activities and interactions. Racialized housing market routines encourage this entwinement by naturalizing racism as a professional tool. *Race Brokers* tracks how professionals broker racism across the housing exchange process-from the home's construction, to real estate brokerage, mortgage lending, home appraisals, and the home sale closing. In doing so, it shows that professionals make housing exchange a racialized process that contributes to neighbourhood inequality and racial segregation. However, in contrast to the racialized status-quo, a small number of housing market professionals draw on anti-racist ideas and strategies to extend equal opportunities to individuals and neighborhoods, de-naturalizing housing market racism. *Race Brokers* highlights the imperative to interrupt the racism that pervades housing market professionals' work, dismantle the racialized routines that underwrite such racism, and cultivate a truly fair housing market"--

**Joe Louis** Marcy S. Sacks 2018-04-17 This insightful study offers a fresh perspective on the life and career of champion boxer Joe Louis. The remarkable success and global popularity of the "Brown Bomber" made him a lightning rod for debate over the role and rights of African Americans in the United States. Historian Marcy S. Sacks traces both Louis's career and the criticism and commentary his fame elicited to reveal the power of sports and popular culture in shaping American social attitudes. Supported by key contemporary documents, *Joe Louis: Sports and Race in Twentieth-Century America* is both a succinct introduction to a larger-than-life figure and an essential case study of the intersection of popular culture and race in the mid-century United States.

**Race Manners for the 21st Century** Bruce A. Jacobs 2006 On a crowded bus, a solitary black man seethes while boarding passengers take every seat except the one next to his; in a cafeteria, whites wonder why blacks congregate at the same table every day; in front of a store, a white woman clutches her purse when a black man passes nearby. Each scenario suggests that how we act toward and react to each other on a day-to-day basis stems from racial assumptions, misunderstandings, and biases. Some we

acknowledge, others we are blind to. Talking about race relations in America is never easy. Bruce A. Jacobs has written a book that shows us how we can begin not with lofty abstractions or policy arguments, but with practicality and directness. Over the past six years, Jacobs, an indefatigable promoter, has traveled the country, learning and listening as people react to his book and add their own comments. The result is a completely revised work, bringing this increasingly important subject up to date, and to a much larger audience.

**Race on Display in 20th- and 21st-century France** Katelyn E. Knox 2016 *Race on Display in 20th- and 21st-Century France* argues that the way France displayed its colonized peoples in the twentieth century continues to inform how minority authors and artists make immigrants and racial and ethnic minority populations visible in contemporary France.

**The House I Live In** Robert J. Norrell 2005-02-01 In *The House I Live In*, award-winning historian Robert J. Norrell offers a truly masterful chronicle of American race relations over the last one hundred and fifty years. This scrupulously fair and insightful narrative--the most ambitious and wide-ranging history of its kind--sheds new light on the ideologies, from white supremacy to black nationalism, that have shaped race relations since the Civil War. For, Norrell argues, it is ideology, more than politics or economics, that has powerfully sculpted the landscape of race in America. Beginning with Reconstruction, Norrell shows how the democratic values of liberty and equality were infused with new meaning by Abraham Lincoln, yet soon became meaningless for generations of African Americans, as white supremacy drove a wedge between the races. Indeed, the heart of this book paints a vivid portrait of the long, dangerous struggle of African Americans to defeat this pernicious mode of thought. Along the way, Norrell offers fresh and at times controversial appraisals of figures such as Booker T. Washington, W.E.B. Du Bois, and Martin Luther King, Jr., and dissects the ideas of racists such as novelist Thomas Dixon. Most important, he offers striking new insights into black-white history, observing for instance that the Civil Rights movement really began as early as the 1930s, and that contrary to much recent writing, the Cold War was a setback rather than a boost to the quest for racial justice. He also breaks new ground on the role of popular culture and mass media in first promoting, but later helping defeat, notions of white supremacy. Though the struggle for equality is far from over, Norrell writes that today we are closer than ever to fulfilling the promise of our democratic values, a promise first made by Lincoln at the battlefield of Gettysburg.

**Yellow Fever, Race, and Ecology in Nineteenth-Century New Orleans** Urmi Engineer Willoughby 2017-12-13 Through the innovative perspective of environment and culture, Urmi Engineer Willoughby examines yellow fever in New Orleans from 1796 to 1905. Linking local epidemics to the city's place in the Atlantic world, *Yellow Fever, Race, and Ecology in Nineteenth-Century New Orleans* analyzes how incidences of and responses to the disease grew out of an environment shaped by sugar production, slavery, and urban development. Willoughby argues that transnational processes—including patterns of migration, industrialization, and imperialism—contributed to ecological changes that enabled yellow fever—carrying *Aedes aegypti* mosquitoes to thrive and transmit the disease in New Orleans, challenging presumptions that yellow fever was primarily transported to the Americas on slave ships. She then traces the origin and spread of medical and popular beliefs about yellow fever immunity, from the early nineteenth-century contention that natives of New Orleans were protected, to the gradual emphasis on race as a determinant of immunity, reflecting social tensions over the abolition of slavery around the world. As the nineteenth century unfolded, ideas of biological differences between the races calcified, even as public health infrastructure expanded, and race continued to play a central role in the diagnosis and prevention of the disease. State and federal governments began to create boards and organizations responsible for preventing new outbreaks and providing care during epidemics, though medical authorities ignored evidence of black victims of yellow fever. Willoughby argues that American imperialist ambitions also contributed to yellow fever eradication and the growth of the field of tropical medicine: U.S. commercial interests in the tropical zones that grew crops like sugar cane, bananas, and coffee engendered cooperation between medical professionals and American military forces in Latin America, which in turn enabled public health campaigns to research and eliminate yellow fever in New Orleans. A signal contribution to the field of disease ecology, *Yellow Fever, Race, and Ecology in Nineteenth-Century New Orleans* delineates events that shaped the Crescent City's epidemiological history, shedding light on the spread and eradication of

yellow fever in the Atlantic World.

**Race and the Shaping of Twentieth-Century Atlanta** Ronald H. Bayor 2000-11-09 Atlanta is often cited as a prime example of a progressive New South metropolis in which blacks and whites have forged "a city too busy to hate." But Ronald Bayor argues that the city continues to bear the indelible mark of racial bias. Offering the first comprehensive history of Atlanta race relations, he discusses the impact of race on the physical and institutional development of the city from the end of the Civil War through the mayorship of Andrew Young in the 1980s. Bayor shows the extent of inequality, investigates the gap between rhetoric and reality, and presents a fresh analysis of the legacy of segregation and race relations for the American urban environment. Bayor explores frequently ignored public policy issues through the lens of race--including hospital care, highway placement and development, police and fire services, schools, and park use, as well as housing patterns and employment. He finds that racial concerns profoundly shaped Atlanta, as they did other American cities. Drawing on oral interviews and written records, Bayor traces how Atlanta's black leaders and their community have responded to the impact of race on local urban development. By bringing long-term urban development into a discussion of race, Bayor provides an element missing in usual analyses of cities and race relations.

**Race and the Totalitarian Century** Vaughn Rasberry 2016-10-03 Vaughn Rasberry turns to black culture and politics for an alternative history of the totalitarian century. He shows how black writers reimagined the standard anti-fascist, anti-communist narrative through the lens of racial injustice, with the U.S. as a tyrannical force in the Third World but also an agent of Asian and African independence.

**The Race of the Century** 2008-01-08 Fed up with his incessant taunting, Tom Tortoise challenges Flash Harry Hare to the race of the century, which turns into a world-wide media event complete with television and newspaper coverage, photographers, and many other distractions.

**Race in 21st Century America** Curtis Stokes 2001 *Race in 21st Century America* tackles the problematic and emotionally laden idea of race in the United States; it brings together intellectuals and scholar activists who present critical and often conflicting appraisals of how race remains a central component of the nation's social landscape and political culture, and shows how Americans might begin to move beyond the strictures of race and racism.

**The Problem of Race in the Twenty-first Century** Thomas C. Holt 2002-04-30 "The problem of the twentieth century is the problem of the color-line," W. E. B. Du Bois wrote in 1903, and his words have proven sadly prophetic. As we enter the twenty-first century, the problem remains--and yet it, and the line that defines it, have shifted in subtle but significant ways. This brief book speaks powerfully to the question of how the circumstances of race and racism have changed in our time--and how these changes will affect our future. Foremost among the book's concerns are the contradictions and incoherence of a system that idealizes black celebrities in politics, popular culture, and sports even as it diminishes the average African-American citizen. The world of the assembly line, boxer Jack Johnson's career, and *The Birth of a Nation* come under Holt's scrutiny as he relates the malign progress of race and racism to the loss of industrial jobs and the rise of our modern consumer society. Understanding race as ideology, he describes the processes of consumerism and commodification that have transformed, but not necessarily improved, the place of black citizens in our society. As disturbing as it is enlightening, this timely work reveals the radical nature of change as it relates to race and its cultural phenomena. It offers conceptual tools and a new way to think and talk about racism as social reality.

**Fatal Invention** Dorothy Roberts 2011-06-14 An incisive, groundbreaking book that examines how a biological concept of race is a myth that promotes inequality in a supposedly "post-racial" era. Though the Human Genome Project proved that human beings are not naturally divided by race, the emerging fields of personalized medicine, reproductive technologies, genetic genealogy, and DNA databanks are attempting to resuscitate race as a biological category written in our genes. This groundbreaking book by legal scholar and social critic Dorothy Roberts examines how the myth of race as a biological concept--revived by purportedly cutting-edge science, race-specific drugs, genetic testing, and DNA databases--continues to undermine a just society and promote inequality in a supposedly "post-racial" era. Named one of the ten best black nonfiction books 2011 by AFRO.com, *Fatal Invention* offers a timely and "provocative analysis" (Nature) of race, science, and politics that "is consistently lucid . . . alarming but not alarmist, controversial

but evidential, impassioned but rational" (Publishers Weekly, starred review). "Everyone concerned about social justice in America should read this powerful book." —Anthony D. Romero, executive director, American Civil Liberties Union "A terribly important book on how the 'fatal invention' has terrifying effects in the post-genomic, 'post-racial' era." —Eduardo Bonilla-Silva, professor of sociology, Duke University, and author of *Racism Without Racists: Color-Blind Racism and the Persistence of Racial Inequality in the United States* "Fatal Invention is a triumph! Race has always been an ill-defined amalgam of medical and cultural bias, thinly overlaid with the trappings of contemporary scientific thought. And no one has peeled back the layers of assumption and deception as lucidly as Dorothy Roberts." —Harriet A. Washington, author of and *Deadly Monopolies: The Shocking Corporate Takeover of Life Itself*

*The Complexion of Race* Roxann Wheeler 2010-08-03 In the 1723 *Journal of a Voyage up the Gambia*, an English narrator describes the native translators vital to the expedition's success as being "Black as Coal." Such a description of dark skin color was not unusual for eighteenth-century Britons—but neither was the statement that followed: "here, thro' Custom, (being Christians) they account themselves White Men." *The Complexion of Race* asks how such categories would have been possible, when and how such statements came to seem illogical, and how our understanding of the eighteenth century has been distorted by the imposition of nineteenth and twentieth century notions of race on an earlier period. Wheeler traces the emergence of skin color as a predominant marker of identity in British thought and juxtaposes the Enlightenment's scientific speculation on the biology of race with accounts in travel literature, fiction, and other documents that remain grounded in different models of human variety. As a consequence of a burgeoning empire in the second half of the eighteenth century, English writers were increasingly preoccupied with differentiating the British nation from its imperial outposts by naming traits that set off the rulers from the ruled; although race was one of these traits, it was by no means the distinguishing one. In the fiction of the time, non-European characters could still be "redeemed" by baptism or conversion and the British nation could embrace its mixed-race progeny. In Wheeler's eighteenth century we see the coexistence of two systems of racialization and to detect a moment when an older order, based on the division between Christian and heathen, gives way to a new one based on the assertion of difference between black and white.

*Played Out* Brandon J. Manning 2022-02-11 Dating back to the blackface minstrel performances of Bert Williams and the trickster figure of Uncle Julius in Charles Chesnut's *Conjure Tales*, black humorists have negotiated American racial ideologies as they reclaimed the ability to represent themselves in the changing landscape of the early 20th century. Marginalized communities routinely use humor, specifically satire, to subvert the political, social, and cultural realities of race and racism in America. Through contemporary examples in popular culture and politics, including the work of Kendrick Lamar, Key and Peele and the presidency of Barack Obama and many others, in *Played Out: The Race Man in 21st Century Satire* author Brandon J. Manning examines how Black satirists create vulnerability to highlight the inner emotional lives of Black men. In focusing on vulnerability these satirists attend to America's most basic assumptions about Black men. Contemporary Black satire is a highly visible and celebrated site of black masculine self-expression. Black satirists leverage this visibility to trouble discourses on race and gender in the Post-Civil Rights era. More specifically, contemporary Black satire uses laughter to decenter Black men from the socio-political tradition of the Race Man.

**Race and Vision in the Nineteenth-Century United States** Shirley Samuels 2019-11-08 *Race and Vision in the Nineteenth-Century United States* is a collection of twelve essays by cultural critics that exposes how fraught relations of identity and race appear through imaging technologies in architecture, scientific discourse, sculpture, photography, painting, music, theater, and, finally, the twenty-first century visual commentary of Kara Walker. Throughout these essays, the racial practices of the nineteenth century are juxtaposed with literary practices involving some of the most prominent writers about race and identity, such as Herman Melville and Harriet Beecher Stowe, as well as the technologies of performance including theater and music. Recent work in critical theories of vision, technology, and the production of ideas about racial discourse has emphasized the inextricability of photography with notions of race and American identity. The collected essays provide a vivid sense of how imagery about race appears in the formative period of the nineteenth-century United States.

**CrossRoutes, the Meanings of "race" for the 21st Century** Paola Boi 2003 This collection reflects the still urgent project of historical recuperation, as well as an examination of literary representations and other cultural manifestations of the Black Diaspora. Disciplinary work within the boundaries of African American Studies has been enhanced by more general considerations of the history of "race" and racism in globalized contexts. The articles assembled here reflect recent empirical research as well as challenging theoretical considerations. Contributions address particular formations of racialized modernity owed to the impact of the Atlantic slave trade and slavery, and thus broaden the approach to the Middle Passage, to improve our understanding of it as a constitutive transatlantic phenomenon in the widest possible sense. *Race and Economic Opportunity in the Twenty-First Century* Marlene Kim 2007-06-19 Examining the crucial topic of race relations, this book explores the economic and social environments that play a significant role in determining economic outcomes and why racial disparities persist. With contributions from a range of international contributors including Edward Wolff and Catherine Weinberger, the book compares how various racial groups fare and are affected in different ways by economic and social institution. Themes covered in the book include: the economic status of various racial and ethnic groups, including their progress or retrenchment over the years how the law, economic motivations, and increased competition for jobs affect racial disparities. This is an invaluable resource for researchers and academics across a number of disciplines including political economy, ethnic and multicultural studies, Asian studies, and sociology.

*Race, Representation and Photography in 19th-century Memphis* Earnestine Jenkins 2016 *Egypt Land* Scott Trafton 2004-10-29 *Egypt Land* is the first comprehensive analysis of the connections between constructions of race and representations of ancient Egypt in nineteenth-century America. Scott Trafton argues that the American mania for Egypt was directly related to anxieties over race and race-based slavery. He shows how the fascination with ancient Egypt among both black and white Americans was manifest in a range of often contradictory ways. Both groups likened the power of the United States to that of the ancient Egyptian empire, yet both also identified with ancient Egypt's victims. As the land which represented the origins of races and nations, the power and folly of empires, despots holding people in bondage, and the exodus of the saved from the land of slavery, ancient Egypt was a uniquely useful trope for representing America's own conflicts and anxious aspirations. Drawing on literary and cultural studies, art and architectural history, political history, religious history, and the histories of archaeology and ethnology, Trafton illuminates anxieties related to race in different manifestations of nineteenth-century American Egyptomania, including the development of American Egyptology, the rise of racialized science, the narrative and literary tradition of the imperialist adventure tale, the cultural politics of the architectural Egyptian Revival, and the dynamics of African American Ethiopianism. He demonstrates how debates over what the United States was and what it could become returned again and again to ancient Egypt. From visions of Cleopatra to the tales of Edgar Allan Poe, from the works of Pauline Hopkins to the construction of the Washington Monument, from the measuring of slaves' skulls to the singing of slave spirituals—claims about and representations of ancient Egypt served as linchpins for discussions about nineteenth-century American racial and national identity.

*Blinded by the Whites* David H. Ikard 2013-10-28 The election of Barack Obama gave political currency to the (white) idea that Americans now live in a post-racial society. But the persistence of racial profiling, economic inequality between blacks and whites, disproportionate numbers of black prisoners, and disparities in health and access to healthcare suggest there is more to the story. David H. Ikard addresses these issues in an effort to give voice to the challenges faced by most African Americans and to make legible the shifting discourse of white supremacist ideology—including post-racialism and colorblind politics—that frustrates black self-determination, agency, and empowerment in the 21st century. Ikard tackles these concerns from various perspectives, chief among them black feminism. He argues that all oppressions (of race, gender, class, sexual orientation) intersect and must be confronted to upset the status quo.

*Seeking a Voice* David B. Sachsman 2009 This volume chronicles the media's role in reshaping American life during the tumultuous nineteenth century by focusing specifically on the presentation of race and gender in the newspapers and magazines of the time. The work is divided into four parts: Part I, "Race

Reporting," details the various ways in which America's racial minorities were portrayed; Part II, "Fires of Discontent," looks at the moral and religious opposition to slavery by the abolitionist movement and demonstrates how that opposition was echoed by African Americans themselves; Part III, "The Cult of True Womanhood," examines the often disparate ways in which American women were portrayed in the national media as they assumed a greater role in public and private life; and Part IV, "Transcending the Boundaries," traces the lives of pioneering women journalists who sought to alter and expand their gender's participation in American life, showing how the changing role of women led to various journalistic attempts to depict and define women through sensationalistic news coverage of female crime stories.

*In Media Res* James Braxton Peterson 2014 *In Media Res* is a collection of critical essays and creative works that wrestle with key issues in twenty-first-century popular culture, including race, technology, gender, media, and politics. Its scope and coverage of a wide range of popular issues make this book a powerful introduction to popular culture studies in the contemporary moment.

**Building a Better Race** Wendy Kline 2005-11-21 "Building a Better Race powerfully demonstrates the centrality of eugenics during the first half of the twentieth century. Kline persuasively uncovers eugenics' unexpected centrality to modern assumptions about marriage, the family, and morality, even as late as the 1950s. The book is full of surprising connections and stories, and provides crucial new perspectives illuminating the history of eugenics, gender and normative twentieth-century sexuality."—Gail Bederman, author of *Manliness and Civilization: A Cultural History of Gender and Race in the US, 1880-1917* "A strikingly fresh approach to eugenics.... Kline's work places eugenicists squarely at the center of modern reevaluations of females sexuality, sexual morality in general, changing gender roles, and modernizing family ideology. She insists that eugenic ideas had more power and were less marginal in public discourse than other historians have indicated."—Regina Morantz-Sanchez, author of *Conduct Unbecoming a Woman: Medicine on Trial in Turn-of-the-Century Brooklyn*

**Staging Race** Karen Sotiropoulos 2008 Drawing extensively on black newspapers and commentary of the period, Karen Sotiropoulos shows how black performers and composers participated in a politically charged debate about the role of the expressive arts in the struggle for equality. Despite the racial violence, disenfranchisement, and the segregation of virtually all public space, they used America's new businesses of popular entertainment as vehicles for their own creativity and as spheres for political engagement.

**Teaching Race in the 21st Century** L. Guerrero 2016-04-16 This collection brings together pedagogical memoirs on significant topics regarding teaching race in college, including student resistance, whiteness, professor identity, and curricula. Linking theory to practice, the essays create an accessible and useful way to look at teaching race for wide audiences interested in issues within education.

**The Beiging of America, Personal Narratives about Being Mixed Race in the 21st Century** Cathy J. Schlund Vials 2017-07-08 *THE BEIGING OF AMERICA, BEING MIXED RACE IN THE 21ST CENTURY*, takes on "race matters" and considers them through the firsthand accounts of mixed race people in the United States. Edited by mixed race scholars Cathy J. Schlund-Vials, Sean Frederick Forbes and Tara Betts, this collection consists of 39 poets, writers, teachers, professors, artists and activists, whose personal narratives articulate the complexities of interracial life. *THE BEIGING OF AMERICA* is an absorbing and thought-provoking collection of stories that explore racial identity, alienation, with people often forced to choose between races and cultures in their search for self-identity. While underscoring the complexity of the mixed race experience, these unadorned voices offer a genuine, poignant, enlightening and empowering message to all readers.

**Rape and Race in the Nineteenth-Century South** Diane Miller Sommerville 2005-10-12 Challenging notions of race and sexuality presumed to have originated and flourished in the slave South, Diane Miller Sommerville traces the evolution of white southerners' fears of black rape by examining actual cases of black-on-white rape throughout the nineteenth century. Sommerville demonstrates that despite draconian statutes, accused black rapists frequently avoided execution or castration, largely due to intervention by members of the white community. This leniency belies claims that antebellum white southerners were overcome with anxiety about black rape. In fact, Sommerville argues, there was great fluidity across racial and sexual lines as well as a greater tolerance among whites for intimacy between black males and white females. According to Sommerville, pervasive misogyny fused with class prejudices to shape white

responses to accusations of black rape even during the Civil War and Reconstruction periods, a testament to the staying power of ideas about poor women's innate depravity. Based predominantly on court records and supporting legal documentation, Sommerville's examination forces a reassessment of long-held assumptions about the South and race relations as she remaps the social and racial terrain on which southerners—black and white, rich and poor—related to one another over the long nineteenth century.

**A Century of Genocide** Eric D. Weitz 2015-04-27 Why did the twentieth century witness unprecedented organized genocide? Can we learn why genocide is perpetrated by comparing different cases of genocide? Is the Holocaust unique, or does it share causes and features with other cases of state-sponsored mass murder? Can genocide be prevented? Blending gripping narrative with trenchant analysis, Eric Weitz investigates four of the twentieth century's major eruptions of genocide: the Soviet Union under Stalin, Nazi Germany, Cambodia under the Khmer Rouge, and the former Yugoslavia. Drawing on historical sources as well as trial records, memoirs, novels, and poems, Weitz explains the prevalence of genocide in the twentieth century—and shows how and why it became so systematic and deadly. Weitz depicts the searing brutality of each genocide and traces its origins back to those most powerful categories of the modern world: race and nation. He demonstrates how, in each of the cases, a strong state pursuing utopia promoted a particular mix of extreme national and racial ideologies. In moments of intense crisis, these states targeted certain national and racial groups, believing that only the annihilation of these "enemies" would enable the dominant group to flourish. And in each instance, large segments of the population were enticed to join in the often ritualistic actions that destroyed their neighbors. This book offers some of the most absorbing accounts ever written of the population purges forever associated with the names Stalin, Hitler, Pol Pot, and Milosevic. A controversial and richly textured comparison of these four modern cases, it identifies the social and political forces that produce genocide.

**Race and Power** Gargi Bhattacharyya 2016-04-29 Reviewing cutting-edge debates around racial politics and the culture and economy of globalization, this book draws together a wide range of important contemporary debates in a clear and concise way for undergraduate students. Far from concluding that racism is over, the authors contend that the forces of globalization inhabit older cultures of racial division in order to safeguard the economic interests of the privileged. Arguing that the unspoken culture of whiteness informs much that passes in the name of globalization, the book suggests that we are witnessing a reformulation of economic relations around global racisms. Alongside these shifts in economic relations, racialized identities evolve to encompass mixed heritages and mixed cultures both in personal identities and in lifestyle choices. This is one of the few texts that concentrates on the theory of race rather than politics. It looks at race in global terms, and at 'whiteness' as a part of ethnic studies.

**The Race of the Century: The Battle to Break the Four-Minute Mile (Scholastic Focus)** Neal Bascomb 2022-04-05 Highly acclaimed author Neal Bascomb brings his peerless research and fast-paced narrative style to a young adult adaptation of one of his most successful adult books of all time, *The Perfect Mile*, an inspiring and moving story of three men racing to achieve the impossible -- the perfect four-minute mile. There was a time when running the mile in four minutes was believed to be beyond the limits of human foot speed. In 1952, after suffering defeat at the Helsinki Olympics, three world-class runners each set out to break this barrier: Roger Bannister was a young English medical student who epitomized the ideal of the amateur; John Landy the privileged son of a genteel Australian family; and Wes Santee the swaggering American, a Kansas farm boy and natural athlete. Spanning three continents and defying the odds, these athletes' collective quest captivated the world. Neal Bascomb's bestselling adult account adapted for young readers delivers a breathtaking story of unlikely heroes and leaves us with a lasting portrait of the twilight years of the golden age of sport.

**A Nation for All** Alejandro de la Fuente 2011-01-20 After thirty years of anticolonial struggle against Spain and four years of military occupation by the United States, Cuba formally became an independent republic

in 1902. The nationalist coalition that fought for Cuba's freedom, a movement in which blacks and mulattoes were well represented, had envisioned an egalitarian and inclusive country--a nation for all, as Jose Marti described it. But did the Cuban republic, and later the Cuban revolution, live up to these expectations? Tracing the formation and reformulation of nationalist ideologies, government policies, and different forms of social and political mobilization in republican and postrevolutionary Cuba, Alejandro de la Fuente explores the opportunities and limitations that Afro-Cubans experienced in such areas as job access, education, and political representation. Challenging assumptions of both underlying racism and racial democracy, he contends that racism and antiracism coexisted within Cuban nationalism and, in turn, Cuban society. This coexistence has persisted to this day, despite significant efforts by the revolutionary government to improve the lot of the poor and build a nation that was truly for all.
