Roo is often perceived by archaeologists as a blank spot on the map of the Maya world, a region generally assumed to hold little of interest thanks to its relative isolation from the rest of Mexico. But salvage archaeology required by recent development along the "Maya Riviera," along with a suite of other ongoing and recent research projects, have shown that the

region was critical in connecting coastal and inland zones, and it is now viewed as an important area in its own right from Preclassic through post-contact times. The first volume devoted to the archaeology of Quintana Roo, this book reveals a long tradition of exploration and discovery in the region and an increasingly rich recent history of study. Covering a time span from the Formative period through the early twentieth century, it offers a sampling of recent and ongoing research by Mexican, North American, and European archaeologists. Each of the chapters helps to integrate sites within and beyond the borders of the modern state, inviting readers to consider Quintana Roo as part of an interacting Maya world whose boundaries were entirely different from today's. In taking in the range of the region, the authors consider studies in the northern part of the state resulting from modern development around Cancún; the mid-state sites of Muyil and Yo'okop, both of which witnessed continual occupations from the Middle

Preclassic through the Postclassic; and new data from such southern sites as Cerros, Lagartera, and Chichmuul. The contributions consider such subjects as ceramic controversies, settlement shifts, site planning strategies, epigraphic and iconographic materials, the impact of recent coastal development, and the interplay between ancient, historic, and modern use of the region. Many of the chapters confirm the region as a cultural corridor between Cobá and the southern lowland centers and address demographic shifts of the Terminal Classic through Postclassic periods, while others help elucidate some of Peter Harrison's Uaymil Survey work of the 1970s. Quintana Roo Archaeology unfolds a rich archaeological record spanning 2,500 years, depicting the depth and breadth of modern archaeological studies within the state. It is an important touchstone for Maya and Mesoamerican archaeologists, demonstrating the shifting web of connections between Quintanarooense sites and their neighbors, and

confirming the need to integrate this region into a broader understanding of the ancient Maya.

and overhunting. Traditionally, the Yucatec Maya have regarded animals as fellow members of a wider society, and in their religion animals enjoy the status of spiritual beings. But in recent years, the breakdown of cultural restraints on hunting has spiraled so far out of control that almost everything edible within easy reach of a road has become fair game. This book combines the insights of an anthropologist with the hands-on experience of a Maya campesino with the aim of improving the management of Quintana Roo's wild lands and animal resources. E. N. Anderson and Felix Medina Tzuc pool their knowledge to document Yucatec Maya understanding and use of animals and to address practical matters related to wider conservation issues. Although the Yucatec Maya's ethnobotany has been well documented, until now little has been recorded about their animal lore. Anderson and Medina Tzuc have compiled a wealth of information about traditional knowledge of animals in this corner of the Maya

world. They have recorded most of the terms widely used for several hundred categories of animals in west central Quintana Roo, mapped them onto biological categories, and recorded basic information about wildlife management and uses. The book reflects a wealth of knowledge gathered from individuals regarded as experts on particular aspects of animal management, whether hunting, herding, or beekeeping. It also offers case studies of conservation successes and failures in various communities, pointing to the need for cooperation by the Mexican government and Maya people to save wildlife. Appendixes provide an extensive animal classification and a complete list of all birds identified in the area. Even though sustainable forestry has finally come to the Yucatán, sustainable game use is practiced by only a few communities. *Animals and the Maya in Southeast Mexico* is a complete ethnozoology for the region, offered in the hope that it will encourage the recognition of

Lalo of Chemuyil Barbara Khidirian 2006-09 The prologue describes a letter of complaint written by the author in 1988, addressed to the Secretary of Tourism, Mexico City, Mexico. The letter details a frightening event that had taken place at Chemuyil. The story then begins in December 1986 when BARBARA (49) and husband EDDY (58) cross the Rio Grande in a motor home prepared to spend months exploring Mexico. Brief travel descriptions are sprinkled with humor as they make their way to the Caribbean where they discover Chemuyil, a dream come true beach. At Chemuyil they meet LALO, the proprietor of the palapa beach bar concession. Intermittent details describe how the couple liquidated assets to prepare for a once in a lifetime adventure, traveling in their new motor home indefinitely. The gist of the narrative is a first person view of both ordinary

and extraordinary lives encountered during lengthy stays at Chemuyil, but the charismatic Lalo carries the book from the moment the readers meet him. A Don Juan character for sure, yet a much respected man, Lalo's personality defines the ebb and flow of the story. Barbara and Eddy become immersed in Lalo's web of passion, money, business, drugs, gambling, and government conflict. Lalo's biography is that of a hero/anti-hero who is very well known in Quintana Roo. However, Lalo suffered from delusional pain. His anguish revolved around losing his beloved Chemuyil, followed by mental conceptions of returning to Chemuyil, and finally psychological obsessions about how he would obtain another Chemuyil. Because Lalo's highs are both humorous and tragic, the author describes the book as a tragicomedy. Although Lalo's palapa bar is at the core of the drama, mixed into the story is nature at its best in an area of sea and jungle. Vivid descriptions also cover the after effects of

hurricane Gilbert, as well as the role of the modern day Maya in the Yucatan. Barbara's fascination with Maya culture, Mexican politics, and her newly adopted Mexican family, connected her to insider information about another society. Her writing is an objective view of her inside connection, a summary of journal entries recorded while living in a motor home for three years . . . wintering at Chemuyil.

*Tales of the Quintana Roo* James Tiptree (Jr.)

1986 "The Quintana Roo is a real and very strange place. It is the long, wild easternmost shore of the Yucatan Peninsula, officially but not psychologically part of Mexico. A diary of daily life on its jungle beaches could sometimes be taken for a log of life on an alien planet," writes James Tiptree, Jr., in the preface to this new collection of three talismanic tales of the supernatural. During the late 1970s, Tiptree -- one of the greatest American authors of short imaginative fiction -- lived for months on the eerie windswept shore of the Yucatan, and the true protagonist of this book is neither the Tiptree narrator nor the manifestations of ancient Maya civilization, but rather the Quintana Roo itself as a living, pulsating entity that envelops the reader within a uniquely alien ambience. Following Tiptree's introduction are these unforgettable nouvelles of weird fantasy: "What Came Ashore at Lirios," "The Boy Who Waterskied to Forever," and "Beyond the Dead Reef."

*The Found World of Quintana Roo* Wendy Morrill 2017-03-27 Have you ever visited Cancun or the Mayan Riviera, and wondered what was on the other side of the all-inclusive resorts, all-you-can-drink bars, and lavish swimming pools? Have you ever imagined the small, colorful, and cultural pueblos of coastal real Mexico? This is a true story about the adventures of a father/daughter team trekking the Mayan Coast of Mexico. They recently hiked 600 miles along the coastal Yucatan Mexico, from Cancun to Belize. She decided to donate the last 100 miles

to cancer research at Eastern Maine Healthcare Systems through a fundraiser once they crossed the Central American Border. While trekking the entire coastline enduring 110°F, in the sun, over miles and miles of limestone, sandy beaches, and mangrove swamps, they encountered obstacles, such as an inlet that required constructing a raft to get across, Montezuma's Revenge, a Mayan curse, and tropical storms. However, working together made those challenges worthwhile by rewarding them with exciting highlights like exploring remote cenotes and ruins, sleeping in a shed owned by a Mexican fisherman and his family, gathering wild coconuts as their sole source of hydration and food, and hiking the dangerous cliffs at Tulum. Follow this daughter and father team as they trudge through the sand and overcome their obstacles.

**Ancient Maya Cityscapes** Laura Paola Villamil 2009 This study examines the spatial organization and long-term development of two ancient Maya centres Lagartera and Margarita located in south-central Quintana Roo, Mexico, that were occupied from the Middle Preclassic (ca. 500 B.C.) to the Terminal Classic (ca. A.D. 1000). Archaeological research at these two sites was designed to investigate the socio-political factors responsible for their different layouts. Spatial data, obtained through survey and mapping, and chronological data, obtained through excavations, were used to identify patterns in the built environments and to reconstruct the history of occupation of each site. By comparing the layout, composition, temporal development, and regional context of Lagartera and Margarita, this study highlights various dimensions of variability among ancient

Maya centres and discusses the sources of this variability.

*Political Ecology in a Yucatec Maya Community* E. N. Anderson 2005-10-01 In Chunchuhub, the Conquest is not a done deal. Unlike many small tropical towns, Chunchuhub in rural Quintana Roo, Mexico, has not been a helpless victim of international forces. Its people are descendants of heroic Mayans who stood off the Spanish invaders. People in Chunchuhub continue to live largely through subsistence farming of maize and vegetables, supplemented by commercial orchard, livestock, and field crop cultivation. They are, however, also self-consciously “modernizing” by seeking better educational and economic opportunities. *Political Ecology in a Yucatec Maya Community* tells the story of Chunchuhub at the beginning of the twenty-first century, focusing on the resource management of plants and animals. Maya co-authors provide a detailed overview of Maya knowledge of and relationships with the environment, describing how these relationships have been maintained over the centuries and are being transformed by modernization. They show that the Quintana Roo Mayas have been working to find ways to continue ancient and sustainable methods of making a living while also introducing modern techniques that can improve that living. For instance, traditional subsistence agriculture is broadly sustainable at current population densities, but hunting is not, and modern mechanized agriculture has an uncertain future. Bringing the voice of contemporary Mayas to every page, the authors offer an encyclopedic overview of the region: history, environment, agriculture, medicine, social relations, and economy. Whether discussing the fine points of beekeeping or addressing the problem of deforestation, they provide a remarkably detailed account that immerses readers in the landscape. Maya of the

Yucatán Peninsula have had more than their share of successes—and some failures as well—and as a study in political and cultural ecology, *Political Ecology in a Yucatec Maya Community* has much to tell us about tropical development and about the human condition. Their experience tells us that if we wish to have not only farms but also mahogany, wildlife, and ecotourism, then further efforts are needed. As Anderson observes, traditional Maya management, with its immense knowledge base, remains the best—indeed, the only—effective system for making a living from the Yucatán’s harsh landscape. *Political Ecology in a Yucatec Maya Community* is a compelling testament to the daily life practices of modern peasant farmers that can provide us with clues about more efficient management techniques for the conservation of biodiversity worldwide.
