The Arms Trade and International Law Zeray Yihdego 2007-11-16 Shortlisted for the 2008 Young Authors Inner Temple Book Prize There are believed to be about 700 million small arms and light weapons (SALW) in the world, often contributing to highly destabilising security and other concerns in international law. SALW are the primary source of violations and abuses of humanitarian and human rights principles by states, rebels, terrorists and criminals. Many consider them the real weapons of mass destruction of our time, causing about half a million deaths annually. The unrestricted international transfer of SALW by states (99 states and 1000 companies involved in manufacturing and supply) is one of the major contributory and aggravating factors of this crisis; another is the illicit traffic in small arms. This book deals with the proliferation of SALW and their unregulated trade and transfer across borders. It addresses questions of definition, manufacturing, trade/transfer, and issues

relating to state responsibility. The primary focus is on conventional small arms, in particular military-style weapons. The book tackles the core and most divisive legal problem of whether or not the laws relating to arms control and relevant norms of international law provide substantive restrictions upon the transfer of small arms by states. The application of the norms of international peace and security, non-intervention, humanitarian and human rights laws, and evolved relevant customary rules of arms control relating to these norms are considered particularly carefully. Questions of application and enforcement of relevant rules and institutional responses to the problem are also examined. The UN began considering an arms trade treaty in 2006; the publication of the book at this critical moment in time will make a positive contribution towards shaping the debate and aims to further enhance understanding in an area where close analysis is required.

B. Lloyd 2018-10-30 'Transnational Crimes in the Americas' addresses contemporary issues with respect to public institutions that are stakeholders in the fight against globalization of crime. Regional public organizations, with a primary focus on the Americas, constitute a framework for understanding the need for an institutional response within the Western Hemisphere. While other authors have addressed the growth of organized crime, no one has explained institutional developments in the struggle against transnational crimes.

'Transnational Crimes in the Americas' highlights existing organizations, emphasizing a regional response to transnational crimes, suggestions for a permanent criminal court in the Americas and an appraisal of the current state of institutional developments in the region.

2007-05-02 Ce rapport offre l'un des aperçus les plus complets qui soient des tendances

mondiales en terme de culture, de production, de saisie et de prix des drogues illicites au niveau international. Il examine les tendances des quatre principaux marchés dans le monde, celui de l'opium et de l'héroïne, celui de la coca et de la cocaïne, celui du cannabis et enfin celui des stimulants de type amphétamine. Cette édition fournit un examen en profondeur de l'articulation entre criminalité transnationale organisée et trafic de drogues. Une annexe statistique riche en détails sur la production, les prix et la consommation complète cet ouvrage qui offre au lecteur un tableau exhaustif du problème de la drogue dans le monde.

as well as new and updated information on small arms production, stockpiles, transfers, and international measures. It presents two case studies: one exploring the concept of 'gun culture' in Kosovo, the other focusing on the Central African Republic. In addition, this volume surveys representations of small arms and armed violence in contemporary art. The Small Arms Survey is the principal international source of impartial and reliable information on all aspects of small arms. Its blend of information and analysis makes it an indispensable resource for policy-makers, officials, and non-governmental organizations. The Small Arms Survey is an independent research project located at the Graduate Institute of International Studies in Geneva, Switzerland. The project has an international staff with expertise in security studies, political science, international public policy, law, economics, development studies, conflict resolution, and sociology, who work closely with

Islamist Militancy in Bangladesh Ali Riaz

2012-08-21 In an unprecedented show of force, organization and skill, two proscribed Islamist militant organizations exploded more than 450 bombs within a span of less than an hour throughout Bangladesh on 17 August 2005 sending a strong message that they were a force to be reckoned with. This catastrophic event, followed by a number of suicide attacks, forced the then reluctant Bangladeshi government, a coalition of center-right parties with two Islamists among them, to acknowledge the existence of a network of militants and take action against this threat. Against this backdrop, this book is the first academic study on the growing Islamist militancy in Bangladesh. It examines the relevance, significance and trajectories of militant Islamist groups in Bangladesh, exploring the complex web of domestic, regional and international events and

dynamics that have both engendered and strengthened Islamist militancy in Bangladesh. The three factors - domestic, regional and international aspects - are each discussed separately and their connection and links are analyzed. It goes on to consider possible future trajectories of militant Islamism in Bangladesh. This book addresses an issue of great importance for contemporary Bangladeshi politics, and will be of interest to scholars of international politics and security studies, including terrorism and the politics of South Asia.

Small Arms Survey 2013 Small Arms Survey, Geneva 2013-07-04 The Small Arms Survey 2013 explores the many faces of armed violence outside the context of armed conflict. Chapters on the use of firearms in intimate partner violence, the evolution of gangs in Nicaragua, Italian organised crime groups, and trends in armed violence in South Africa describe the dynamics and effects of gun violence in the

home and on the street. Many of the chapters in the 'weapons and markets' section zero in on the use of specific weapons by particular armed actors, such as drug-trafficking organisations and insurgents. These include chapters on the prices of arms and ammunition at illicit markets in Lebanon, Pakistan and Somalia; illicit weapons recovered in Mexico and the Philippines; and the impacts of improvised explosive devices on civilians. Chapters on the Second Review Conference of the UN Programme of Action and the industrial demilitarisation industry round out the 2013 volume.

the national, regional and international levels are necessary. This analysis is part of a joint project of the United Nations Development Programme, the United Nations Institute for Disarmament Research, the United Nations Department for Disarmament Affairs and the Small Arms Survey established to assist States to better fulfil their commitments under the PoA. It analyses the information contained in national reports voluntarily submitted by States on their implementation of the PoA from 2002 to 2005. To date, 137 countries have participated in national reporting, which is an encouraging development and indicates a growing awareness across the globe on problems related to the illicit trade in small arms and light weapons. However, the level of PoA implementation in different regions remains unequal, and while the number of reporting States is increasing in most regions, the level of reporting and of implementation remain low in some regions. By analysing the reports submitted

by States, this study contributes to the efforts to strengthen the PoA. It highlights the main trends in national reporting, including regional differences, thematic priorities and areas where further assistance is indicated to be needed. It also provides concrete recommendations on how different aspects of this reporting mechanism could be enhanced and used more efficiently to combat the illicit trade and proliferation of small arms and light weapons.

The International Arms Trade Rachel Stohl
2009-11-09 The multi-billion dollar business of the international conventional arms trade involves virtually every country in the world. Around the globe, people's lives are being irrevocably changed by the effects of guns, tanks, and missiles. These weapons have the potential to cause a deadly and current threat - one responsible for hundreds of thousands of deaths a year. This succinct and accessible new

book explores the complexities and realities of the global conventional weapons trade. The first book on the subject in nearly a decade, *The International Arms Trade* provides an engaging introduction to the trade, the effects, and the consequences of these weapons. The authors trace the history of the arms trade and examine how it has evolved since the end of the Cold War. In particular, they assess the role of the largest arms exporters and importers, the business of selling conventional arms around the world, and shed new light on the illicit arms trade and the shadowy dealers who profit from their deadly commerce. The book also looks closely at the devastating effect the business can have on countries, societies, and individuals and concludes with an evaluation of the various existing control strategies and the potential for future control opportunities. *The International Arms Trade* will be invaluable for students and scholars of international relations and security studies, and for policymakers and anyone

Handbook of Transnational Crime and Justice Philip Reichel 2013-04-29 Transnational crime and justice will characterize the 21st century in same way that traditional street crimes dominated the 20th century. In the Handbook of Transnational Crime and Justice, Philip Reichel and Jay Albanese bring together top scholars from around the world to offer perspectives on the laws, crimes, and criminal justice responses to transnational crime. This concise, reader-friendly handbook is organized logically around four major themes: the problem of transnational crime; analysis of specific transnational crimes; approaches to its control; and regional geographical analyses. Each comprehensive chapter is designed to be explored as a stand-alone topic, making this handbook an important textbook and reference tool for students and practitioners alike.

norms have been established in the policies and practices of states, regions and international organizations. It also attempts to establish criteria for assessing norm emergence, and to assess the process of norm development by comparing what actually happens at the multilateral level. If norm-making on small arms and related multilateral negotiations have mostly dealt with 'illicit arms', and most of the norms examined here fall on the arms supplier side of the arms equation, the author argues that the creation of international norms and the setting of widely agreed standards amongst states on all aspects of the demand for, availability, and spread of both legal and illegal small arms and light weapons must become central to the multilateral coordination of policy responses in order to tackle the growing violence associated with small arms availability. Small Arms and Security will be of interest to researchers and professionals in the fields of peace and conflict studies, global governance, international

security and disarmament.

The Sulu Arms Market Lino Miani 2011

Situated in a remote area long a historical buffer zone between competing political entities, the Sulu Arms Market is an illicit market of a typical form in that it is both a source and a destination for less-than-legal guns. What makes the Sulu market unique is its longevity which is measured in centuries. In modern times, guns from the area supply conflicts and crime from Japan to Sri Lanka to Papua New Guinea and beyond; and in turn the world pours guns and ammunition into Mindanao, the Maluku (Molucca) Islands, and to a lesser extent, Malaysia and the rest of the Philippines. Like most black arms pipelines, the Sulu Arms Market is intertwined with piracy, terrorism, and the traffic of other illicit commodities. Criminal gangs, communists, Moro independence groups, and Islamic militants are all major players in the market, making it a security problem for at least five member states of the Association of Southeast Asian Nations

The Modern Defense Industry Richard A. Bitzinger 2009-10-15 Whether it's guns and ammunition or multidimensional anti-terrorism systems, the defense industry is dynamic, complex, and ubiquitous. It is also mysterious, powerful, and controversial, involving thousands of players worldwide—from suppliers and producers to government and military procurers to shadowy figures that trade in the black market. This comprehensive, two-volume reference will explore, on a global scale, the various issues, concepts, problems, and controversies surrounding the rise of the modern defense industry. Unparalleled in its scope and insight, *The Modern Defense Industry* will prove invaluable to the industry's critics and champions alike. The phenomenon of a more-or-less permanent defense industry—especially one so wide in scale, breadth (air, sea, land, and space), technology, and geography—is still relatively new. Until now, its implications for politics, economics, and technology have not

been adequately discussed in an authoritative, accessible format for scholars and researchers, business people, journalists, policymakers, and interested laymen. The Modern Defense Industry addresses the period from 1945 to the present, covering the United States, Europe, Russia, China, Israel, and other important arms-producing and arms-procuring countries. Including essays by experts from around the world, a glossary, data on firms and governments, laws and policies, primary documents, case studies, and a host of other elements, this set will be a unique resource for anyone interested in the arms industry. It will also offer penetrating insights into topics like international relations and diplomacy, arms proliferation, and contemporary politics. Volume I comprises chapters by experts in the field on topics like the relationship between the industry, military, and government; how new modes of warfare are changing the industry; the implications of globalization on the industry; the

black and gray areas of the arms trade; and much more. Volume II features an extensive A-Z glossary of terms, lists of defense firms and government agencies, annotated primary documents, lists of leading defense contractors and key weapons systems, an analysis of key legislation, and professional organizations. The Modern Defense Industry sets the standard for state of the art overviews of an industry that has, for better or worse, come to infuse nearly every aspect of world affairs in the early twenty-first century.

New Threats and New Actors in International Security E. Krahnmann 2005-01-14 Non-state threats and actors have become key topics in contemporary international security as since the end of the Cold War the notion that state is the primary unit of interest in international security has increasingly been challenged. Statistics show that today many more people are killed by ethnic conflicts, HIV/AIDS or the proliferation of small arms than by international war. Moreover,

non-state actors, such as non-governmental organizations, private military companies and international regimes, are progressively complementing or even replacing states in the provision of security. Suggesting that such developments can be understood as part of a shift from government to governance in international security, this book examines both how private actors have become one of the main sources of insecurity in the contemporary world and how non-state actors play a growing role in combating these threats.

Small Arms, Crime and Conflict Owen Greene

2013-07-03 This book focuses on the use of small arms in violence and attempts by the state to govern the use and acquisition of these weapons. It is likely that hundreds of thousands of people are killed every year as a result of armed violence – in contexts ranging from war zones to domestic violence. This edited volume examines why these deaths occur, the role of guns and other weapons, and how governance can be used

to reduce and prevent those deaths. Drawing on a variety of disciplines, ranging from anthropology through economics to peace and security studies, the book's main concern throughout is that of human security – the causes and means of prevention of armed violence. The first part of the book concerns warfare, the second armed violence and crime, and the last governance of arms and their (mis)-use. The concluding chapter builds on the contributors' key findings and suggests priorities for future research, with the aim of forming a coherent narrative which examines what we know, why armed violence occurs, and what can be done to reduce it. This book will be of much interest to students of small arms, security studies, global governance, peace and conflict studies, and IR.

fundamentals of global security were altered by the September 11 terrorist attacks. Do these changes undercut or enhance the role of the United Nations? What do events like the role of the UN in the crisis over Iraq tell us? Here top scholars examine the role of the UN in preventing international and civil violence, arms control, deterring and reversing aggression, and addressing humanitarian crises. The chapters are concise while providing depth of understanding of the issues, positions and problems facing the United Nations and its member states in grappling with increased opportunities and threats. Their lively presentations of the drama of UN debates establish the contributions and shortcomings of global multilateralism in an era of U.S. hegemony and unilateralism.

Negotiating Sovereignty and Human Rights

Michaelene Cox 2016-04-22 Providing an overview of institutional developments and innovations in human rights politics, this volume discusses some of the most important current and emerging human rights issues. It takes stock of the initiatives, policy responses and innovations of past years to identify some of the

challenges that will likely require bold and innovative solutions. The contributors focus on actors and/or issues that are outside the mainstream of international human rights politics; the chapters address issues that have only emerged as an important part of the international human rights agenda and generated much advocacy, diplomacy and negotiations since the end of the Cold War. These issues include: the International Criminal Court, the norm of Responsibility to Protect (R2P), the proliferation of small arms and light weapons and its human rights impact, truth commissions, and the rights of persons with disabilities. The contributions offer a direct challenge to entrenched notions of state sovereignty and represent a departure from established ways of policy making.

Governing Guns, Preventing Plunder Asif Efrat 2012-07-19 From human trafficking to the smuggling of small arms to the looting of antiquities, illicit trade poses significant threats to international order. So why is it so difficult to establish international cooperation against illicit trade? *Governing Guns, Preventing Plunder* offers a novel, thought-provoking answer to this crucial question. Conventional wisdom holds that criminal groups are the biggest obstacle to efforts to suppress illicit trade. Contrarily, Asif Efrat explains how legitimate actors, such as museums that acquire looted antiquities, seek to hinder these regulatory efforts. Yet such attempts to evade regulation fuel international political conflicts between governments demanding action against illicit trade and others that are reluctant to cooperate. The book offers a framework for understanding the domestic

origins of these conflicts and how the distribution of power shapes their outcome. Through this framework, Efrat explains why the interests of governments vary across countries, trades, and time. In a fascinating empirical analysis, he solves a variety of puzzles: Why is the international regulation of small arms much weaker than international drug control? What led the United States and Britain to oppose the efforts against the plunder of antiquities, and why did they ultimately join these efforts? How did American pressure motivate Israel to tackle sex trafficking? Efrat's findings will change the way we think about illicit trade, offering valuable insights to scholars, activists, and policymakers.

Small Arms Survey 2014 Small Arms Survey, Geneva 2014-07-03 The Small Arms Survey 2014 considers the multiple roles of women in the context of armed violence, security, and the

The volume's thematic section comprises one chapter on violence against women and girls - with a focus on post-conflict Liberia and Nepal - and another on the recent convergence of the small arms agenda with that of women, peace and security. Complementing these chapters are illustrated testimonies of women with experience as soldiers, rebels and security personnel. The 'weapons and markets' section assesses the potential impact of the Arms Trade Treaty, presents the 2014 Transparency Barometer and an update on the authorised small arms trade, and analyses recent ammunition explosions in the Republic of the Congo. Additionally, it examines ammunition circulating in Africa and the Middle East, maps the sources of insurgent weapons in Sudan and South Sudan, and evaluates crime gun records in the United States.

a million people die (directly or indirectly) as a result of gun violence, with most deaths occurring in the poorest, yet also most highly weaponized parts of the world. Firearm proliferation -- 875 million global firearms -- is a direct contributor to both regional conflicts and to crime. This book attempts to understand the inter-related dynamics of supply and demand which are weaponizing the world. Now over ten years after Peter Squires's *Gun Culture or Gun Control?*, the issues pertaining to gun violence and gun control have developed dramatically. With *Gun Crime in Global Contexts*, Peter Squires offers a cutting-edge account of contemporary developments in the politics of gun crime and the social and theoretical issues that surround the problem. This book contains: an innovative political analysis of neo-liberal globalization and weapon proliferation; an overview of recent gun control debates and gang strategies in the UK; an updated analysis of US gun politics: self-defence, race and the 'culture

war'; a critical analysis of US school and rampage shootings, how they have impacted the gun debate and how different societies have responded to mass shootings; an examination of the UN's development of an Arms Trade Treaty (2001--13); a discussion of weapon trafficking; discussions about youth gangs around the world, including those in Brazil, Kenya, West Africa, Mexico and South Africa. With its interdisciplinary perspective and global reach, this book will be important reading for academics and students interested in youth and gang crime, violent crime and comparative criminal justice, as well as peace and security studies and international relations.

Postinternationalism and Small Arms

Control Damien Rogers 2016-04-08 Even though impacts generated by the widespread availability and ongoing use of small arms and light weapons have not reached a magnitude sufficient to radically reorder contemporary world affairs, awareness of the nature and extent of these impacts has compelled some international actors to take decisive action. Damien Rogers examines how the international community has responded to the challenge of controlling small arms and light weapons since the early 1990s. Using a postinternationalist analytic framework, he specifically focuses on the maturing relationships between particular

actors of world affairs and the nascent interconnectivity between their strategies for, and approaches toward, controlling these weapons. Furthermore, the book identifies ways in which the captains of small arms industry, arms brokers and chief users of these weapons are able to mitigate, resist or elude the intended effects of those responses.

within domestic settings, as well as in public spaces, affecting everyone in the community without regard to sex or age. The impact of these weapons can be vastly different for women and men and for girls and boys. However, careful consideration of gender and age is rare in the formulation of small arms policy, of planning small arms collection or control, or even in small arms research. To counter the effects of prolific SALW, their role in gender- and age-specific violence must be more deeply analyzed and the results applied at the policy and operational level. This work should be undertaken in war-afflicted contexts, in societies suffering from elevated levels of social violence and / or severe underdevelopment, and in those tolerant of the presence of individually owned firearms. Contributors to the book draw on experience and research from around the world on the nexus of gender, age, violence, and small arms in developing and developed countries. They provide a number of recommendations for

policies, programs, and research designed to further illuminate and counteract the firing of the "sexed pistol."

world, terrorist leaders have articulated that economic warfare is a key component of the new terrorist agenda. Governments have accentuated the role of economic tools in their counter-terrorism policies while maintaining emphasis on the application of military force, or 'hard power', even though such tools often prove unnecessarily blunt or even sorely inadequate. Given the complexity of the global threat posed by modern transnational terrorist groups, combating terrorism with a mix of 'hard' and 'soft power' is more important than ever. As an invaluable new book in terrorism studies, *Terroronomics* brings together contributions from renowned international scholars and practitioners to provide a multifaceted view of contemporary financial counterterrorism and terrorist funding efforts. It employs key concepts, terms, case studies and policy recommendations to advance our understanding of the threats and possible courses of action, thus enabling us to grasp the critical financial

and economic issues while providing potential counterterrorist strategies.

Controlling Small Arms Peter Batchelor
2013-11-20 This edited volume takes stock of the state of research and policy on the issue of Small Arms and Light Weapons (SALW), ten years after the UN first agreed to deal with the problem. The end of the Cold War originated a series of phenomena that would subsequently come to dominate the political agenda. Perhaps most symptomatic of the ensuing environment is the marked escalation in the scale and dynamics of armed violence, driven by the proliferation of SALW. Events in Rwanda, Somalia and Bosnia seared into global consciousness the devastating effects of this phenomenon, and of the necessity to engage actively in its limitation and prevention. This edited volume explores and outlines the research and policy on the SALW issue at this critical juncture. In addition to providing a detailed telling of the genesis and evolution of SALW research and advocacy, the

volume features a series of essays from leading scholars in the field on both advances in research and action on SALW. It reflects on what has been achieved in terms of cumulative advances in data, methodology and analysis, and looks at the ways in which these developments have helped to inform policy making at national, regional and international levels. Alongside situating and integrating past and present advances in advocacy and international action, Controlling Small Arms also outlines future directions for research and action. This book will be of much interest to students of small arms, peace and conflict studies, peacebuilding, security studies and IR.
