This collection corrects that oversight, exploring the nexus between the emancipation of women and their roles in CSOs. Featuring contrasting, international studies from a wide range of contributors, it covers emerging issues such as the role of social media in organizing, the significance of religion in many cultural contexts, activism in Eastern Europe, and the impact of environmental degradation on women's lives. Asking whether involvement in CSOs offers a potential source of emancipation for women or maintains the status quo, this book will have an impact on both equal-opportunity policy and practice.

The German type is somewhat trying to my failing eyesight, but I could not resist at once reading it. And, having read it, I cannot resist offering you more than a merely formal acknowledgment. And this is not merely because my mind inclines strongly to agree in your foundation-argunients: but because, apart from mere concurrence in this or that special remark, it seems to me by far the most comprehensive, luminous and penetrating work on this question that I have yet met with. **A Certain Emancipation of Women** Tracey Rizzo 2004 "Best-selling court cases in eighteenth-century France provide ample evidence of a certain emancipation of women. Certain in the sense of tentative, qualified: women won their cases in surprising numbers yet were represented by their lawyers via limiting stereotypes. Certain also in the sense of sure: lawyers and editors contributed to a liberatory moment, particularly in the two decades leading up to the radical phase of the French Revolution, in which late eighteenth-century constructions of female citizenship offered virtuous women, regardless of rank or even race, "strategic possibilities" for establishing modern identities - defined as self-creating, autonomous, and capable of moral judgment and reason." "Few scholars have attempted to demonstrate the means by which representations both reflect and transform the lives of historical actors. This study offers a rare opportunity to glimpse that intersection as the causes celebres contain representations and lived experience, fact and fiction." "Lawyers and editors called for the liberation of women from tyrannical fathers, abusive husbands, public opinion, and even oppressive laws, like that maintaining the stigma of illegitimacy, in the dozens of seductions, separations, rapes, and infanticides on which this study is based."--Jacket.

The Emancipation of Women Florence Abena Dolphyne 1991 A former head of the Ghana National Council of Women and Development here explains, from her experience in Ghana and other parts of Africa during the UN Decade for Women, what she believes women's emancipation means to women in Africa. Although discrimination against women is worldwide, she believes that because of differences in social, educational and cultural backgrounds, women have differing perceptions of the meaning of emancipation. She discusses pertinent issues such as traditional beliefs and practices which keep women subjugated, including bride-wealth, child marriage, polygamy, purdah, widowhood, inheritance of property, fertility and female circumcision. She also examines specific women-in-development activities, and the role of governmental, non-governmental and inter- governmental organizations.

**The Feminists** Richard J. Evans 2012-10-09 Originally published in 1977, this book brings together what is known about liberal feminist and socialist movements for the emancipation of women all over the world in the nineteenth and early twentieth centuries. It deals not only with Britain and the United States but also with Australia, New Zealand, France, Germany, Russia, Austria-Hungary and the Scandinavian countries. The chapters trace the origins, development, and eventual collapse of these movements in relation to the changing social formations and political structures of Europe, America and Australasia in the era of bourgeois liberalism. The first part of the book discusses the origins of feminist movements and advances a model or 'ideal type' description of their development. The second part then takes a number of case studies of individual feminist movements to illustrate the main varieties of organised feminism and the differences from country to country. The

third part looks at socialist women's movements and includes a study of the Socialist Women's International. A final part touches on the reason for the eclipse of women's emancipation movements in the half-century following the end of the First World War, before a general conclusion pulls together some of the arguments advanced in earlier chapters and attempts a comparison between these feminist movements of 1840-1920 and the Women's Liberation Movement.
