Primarily geared towards recent graduates, this resource will also be relevant for professional librarians who are several years into their career and have recently joined a new position or institution. The Woman's Guide to Second Adulthood Suzanne Braun Levine 2011-12-05 Second Adulthood is a new stage of life for women over fifty. The first generation of socially emancipated women have reached an important frontier; they have fulfilled all their roles - daughter, wife, mother, career woman. Yet with longer life expectancy and better health they have no intention of retiring from the world. At the same time these women are experiencing an often bewildering array of physical

readjustments: their brains experience a growth very similar to that in adolescence, they enter menopause, their sexual and emotional rhythms change. Such momentous challenges raise three crucial questions that each woman must answer for herself: What matters? What works? What's next? Drawing on interviews, science, trend analysis and her own struggles, Levine explores all the issues and offers countless stories of how others have answered those three questions. This is the inspiring handbook and companion for every woman entering these uncharted waters.

### Are There Any Good Jobs Left?

R. William Holland 2006-07-30

This book is for and about the millions of people who are between jobs (code for out of work), have been between jobs,

or know of someone who has been. It is about how to navigate the transition from employment-for-life, career development support, and a company-sponsored pension to downsized, outsourced, and replaced. Bill Holland explains the macro-trends that have converged to create an environment of job instability and anxiety, and then moves beyond this context to present specific tactics and techniques that readers can use to stay one step ahead in their careers. More than a manual for job searches and career-building strategies, *Are There Any Good Jobs Left?* helps readers interpret trends, assess such temptations as leaving the corporate rat race for the entrepreneurial life and considers the ethics of constant networking. Featuring an annotated listing of books and Web sites, the book is not so much an indictment of corporate disloyalty as an explanation of the phenomenon, and a guidebook for anyone faced with job transition, change, or growth in

**Networking for People Who Hate Networking** Devora Zack 2010-12-30 Shows how the networking-averse can succeed by working with the very traits that make them hate traditional networking Written by a proud introvert who is also an enthusiastic networker Includes field-tested tips and techniques for virtually any situation Are you

the kind of person who would rather get a root canal than face a group of strangers? Does the phrase "working a room" make you want to retreat to yours? Does traditional networking advice seem like it's in a foreign language? Devora Zack, an avowed introvert and a successful consultant who speaks to thousands of people every year, feels your pain. She found that most networking advice books assume that to succeed you have to become an outgoing, extraverted person. Or at least learn how to fake it. Not at all. There is another way. This book shatters stereotypes about people who dislike networking. They're not shy or misanthropic. Rather, they tend to be reflective - they think before they talk. They focus intensely on a few things rather than broadly on a lot of things. And they need time alone to recharge. Because they've been told networking is all about small talk, big numbers and constant contact, they assume it's not for them. But it is! Zack politely
