King 2009-06 From propaganda released by the Third Reich to legislation passed in more than fifty nations, smoking is one of society's favorite targets. While the public goes along with persecuting smokers, Theodore J. King is here to tell us why we shouldn't. In this book, which does not advocate smoking, King surveys smoking bans in the United States, England, and Ireland, documenting their effects on society and commerce. King interviews many people, including members of the medical community. King takes his arguments further, showing how and why bans on smoking extend to other areas of our lives-how smokers are only the beginning. Anti-smokers represent an agenda that involves everything from personal property to the way you raise your children, what you eat, and your right to freedom of speech. Authoritarians have willing accomplices in the press and government to take power at the individual's expense. Learn how anti-smoking fanatics use tobacco control as an effective form of social engineering. King offers solutions so that smokers and non-smokers can be accommodated in a free society, where it must never be a crime to smoke in a bar, in a car, in the open air, in a restaurant, or at home.

*How Tobacco Smoke Causes Disease* 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is

relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

**The Wisdom of W.E.B. Du Bois** Aberjhani 2018-07-31 The men and women who shaped our world—in their own words. The Wisdom Library invites you on a journey through the lives and works of the world's greatest thinkers and leaders. Compiled by scholars, this series presents excerpts from the most important and revealing writings of the most remarkable minds of all time. THE WISDOM OF W.E.B. DU BOIS "Throughout history, the powers of single blacks flash here and there like falling stars, and die sometimes before the world has rightly gauged their brightness." Dr. Martin Luther King, Jr., wrote of W.E.B. Du Bois, "History cannot ignore [him] because history has to reflect truth, and Dr. Du Bois was a tireless explorer and a gifted discoverer of social truths. His singular greatness lay in his quest for truth about his own people." Du Bois was the first African-American to receive a Ph.D. from Harvard (1896). A brilliant writer and speaker, he was the outstanding African-American intellectual of his time. His lifelong active struggle for racial equality and civil rights resulted in the founding of both the Niagara Movement and the National Association for the Advancement of Colored People (NAACP). As editor of the NAACP's magazine, *The Crisis*, Du Bois presented the literary genius of many of the Harlem Renaissance's most compelling voices; and his own works—the sociological study *The Philadelphia Negro* and his famous 1903 treatise, *The Souls of Black Folk*—eloquently delineated the African-American struggle for identity in America. During his lifetime, Du Bois was a powerful force in academia, literature, civil rights, and the peace movement. Using excerpts from his many books as well as from articles, essays, poems, letters, and speeches, *The Wisdom of W.E.B. Du Bois* provides a telling portrait of the man and his groundbreaking ideas. It is a tribute to a voice that would not be silenced and to a pioneer who, in his passion for justice movingly declared, "the cost of

liberty is less than the price of repression."

*A Counterblast to Tobacco* King James 2017-04-07 "Counterblast to Tobacco" is one of the best examples of an early social reform tract, penned by none other than the famous (or infamous) King James I, of "Daemonologie" renown. This tract is one of pious religiosity and pragmatic state rulership twain with then-modern 17th century medical lore. Covering the theory of the humors and the various negative effects of tobacco use (and overuse) King James' work here is additionally fleshed out by the deliberate inclusion of logic as he excoriates the "unsavory" fumes of this menacing societal scourge.
