The Storytelling Classroom Sherry Norfolk 2006-09-30 Consisting of a series of essays written by storytellers who work in the classroom, as well as teachers who use storytelling in the classroom, this title addresses specific curriculum areas, and includes practical, easily replicable lesson plans. Also included is a review and explanation of the current research on the value of storytelling in the classroom in teaching the whole brain using the multiple intelligences and the integration of thinking in the left and right brain. It makes valid connections to educational standards in curriculum areas. Topics addressed are from the dual viewpoints of storytellers and educators. The Storytelling Classroom is an inspiring, practical and immediately applicable collection of preK through eighth grade lesson plans by and for teachers and media specialists who use storytelling in the classroom and storytellers who work in the classroom. Each lesson plan is linked to National Standards in Language Arts Social Studies, Math or Science and accompanied by an essay which provides a glimpse of the alchemy that occurs when students, teachers and story are brought together: student engagement, classrooms that are alive with thinking students, LEARNING!

New York Magazine 1989-10-23 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Transforming the Workforce for Children Birth Through Age 8 National Research Council 2015-07-23

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Books to Build On E.D. Hirsch, Jr. 2009-10-14 The invaluable grade-by-grade guide (kindergarten—sixth) is designed to help parents and teachers select some of the best books for children. Books to Build On recommends:

- for kindergartners, lively collections of poetry and stories, such as The Children's Aesop, and imaginative alphabet books such as Bill Martin, Jr.'s Chicka Chicka Boom Boom and Lucy Micklewait's I Spy: An Alphabet in Art
- for first graders, fine books on the fine arts, such as Ann Hayes's Meet the Orchestra, the hands-on guide My First Music Book, and the thought-provoking Come Look with Me series of art books for children
- for second graders, books that open doors to world cultures and history, such as Leonard Everett Fisher's The Great Wall of China and Marcia Willaims's humorous Greek Myths for Young Children
- for third graders, books that bring to life the wonders of ancient Rome, such as Living in Ancient Rome, and fascinating books about astronomy, such as Seymour Simon's Our Solar System
- for fourth graders, engaging books on history, including Jean Fritz's Shh! We're Writing the Constitution, and many books on Africa, including the stunningly illustrated story of Sundiata: Lion King of Mali
- for fifth graders, a version of Shakespeare's A Midsummer Night's Dream that retains much of the original language but

condenses the play for reading or performance by young students, and Michael McCurdy's *Escape from Slavery: The Boyhood of Frederick Douglass* • for sixth graders, an eloquent retelling of the Iliad and the Odyssey, and the well-written American history series, *A History of US . . .* and many, many more!

National Education Technology Plan Arthur P. Hershaft 2011 Education is the key to America's economic growth and prosperity and to our ability to compete in the global economy. It is the path to higher earning power for Americans and is necessary for our democracy to work. It fosters the cross-border, cross-cultural collaboration required to solve the most challenging problems of our time. The National Education Technology Plan 2010 calls for revolutionary transformation. Specifically, we must embrace innovation and technology which is at the core of virtually every aspect of our daily lives and work. This book explores the National Education Technology Plan which presents a model of learning powered by technology, with goals and recommendations in five essential areas: learning, assessment, teaching, infrastructure and productivity.

Parenting Matters National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
