The Economics of Inequality, Discrimination, Poverty, and Mobility Robert Rycroft 2009-07-01 Thoroughly classroom tested, this introductory-level text surveys what economists have to say about inequality (or income and wealth distribution), poverty, mobility - both intragenerational (within careers), and intergenerational (between generations) - and discrimination (on the basis of race, ethnicity, age, gender, and many other factors) in the United States. This text brings the undergraduate treatment of these issues up-to-date, featuring detailed, but not mathematical, examination of the economic theory underlying the analysis. There is a greater emphasis on mobility, on wealth accumulation, distribution and inheritance, and on discrimination law than in other texts. The author provides full and fair treatment of competing sides in several of the controversial issues in the field, written in such a way that instructors can use the text material to motivate a variety of classroom discussions. An Instructor's Manual featuring solutions to the end-of-chapter questions is available online to adoptors.

Race and Economic Opportunity in the Twenty-First Century Marlene Kim 2007-06-19 Examining the crucial topic of race relations, this book explores the economic and social environments that play a significant role in determining economic outcomes and why racial disparities persist. With contributions from a range of international contributors including Edward Wolff and Catherine Weinberger, the book compares how various racial groups fare and are affected in different ways by economic and social institution. Themes covered in the book include: the economic status of various racial and ethnic groups, including their progress or retrenchment over the years how the law, economic motivations, and increased competition for jobs affect racial disparities. This is an invaluable resource for researchers and academics across a number of disciplines including political economy, ethnic and multicultural studies, Asian studies, and sociology.

The Economics of Race and Crime Samuel L. Myers Jr 2020-02-18 The relationship between crime and the economy has received too little attention from researchers. This volume remedies that deficit, resurrecting several classic writings on this elusive topic by and about blacks, and presenting new contributions by researchers at the frontier of work on the subject. Among the landmark articles included are W.E.B. Dubois' famous examination of crime in Philadelphia, an analysis of black criminal behavior by Walter Willcox, who was chief statistician of the Census Bureau at the time he wrote this essay, and excerpts from the ninth Atlanta Conference on Negro Crime. The frontier articles use quality microdata to understand particular aspects of criminal justice processes. They address the relationship between employment and criminal behavior, trade-offs among education, employment, and crime, and the link between overall economic conditions and rates of incarceration. Among the authors represented in the landmark research articles are Harold Votey and Llad Phillips, Richard Freeman, David Good and Maureen Pirog-Good, Dario Melossi, and Samuel Meyers and

William Sabol. Richard MaGahey concludes the volume with comments on the current status of research in the field. This volume captures the emerging tension within scholarship on race and crime, and provides both a reflective vision of work in this area as well as state-of-the-art research by leading scholars.

African Americans in the U.S. Economy Cecilia Conrad 2005 The forty-three chapters in African Americans in the U.S. Economy focus on various aspects of the economic status of African Americans, past and present. Taken together, these essays present two related themes: first, when it comes to economics, race matters; second, racial economic discrimination and inequality persist despite the optimistic predictions of standard economic analysis that racial discrimination cannot thrive in a free-market economy. The Dynamics of Racial Progress Antoine L. Joseph 2016-07-22 Race relations in the United States have long been volatile - marked on the one hand by distrust and violence, but tempered on the other by periods of conciliation, integration and relative harmony. This path-breaking blend of history, sociology, political science and economics argues that the key factor determining the quality of race relations is economic: When economic equality spreads so do social and political equality. Conversely, economic downturns and widening income disparities promote political inequality, polarizing blacks and whites. To support this provocative thesis the author examines key events and eras in American history since the Reconstruction - particularly the black migration and the New Deal policies of the interwar years, the civil rights movement of the 1950s and 60s, and the rise and decline of affirmative action in the late twentieth century. He also analyzes the racial policies and politics of the major political parties and shows how they "played the race card" to win support.

The Economics of Poverty and Discrimination Bradley R. Schiller 2004 For courses in Economics of Poverty and Discrimination, Welfare Politics and Policy, Social Problems, and Sociology of Poverty, in the departments of Economics, Sociology, Urban Studies, Education and Social Work. The ninth edition preserves these qualities while incorporating new reference material.

The Political Economy of Racism Melvin Leiman 2011-02-02 An intense and compact resource for understanding how the political economy of racism evolved in the United States." - Science & Society Racism is about more than individual prejudice. And it is hardly the relic of a past era. This scholarly, readable, and provocative book shows how the persistence of racism in America relies on the changing interests of those who hold the real power in society and use every possible means to hold onto it.

The Color of Money Mehrsa Baradaran 2017-09-14 In 1863 black communities owned less than 1 percent of total U.S. wealth. Today that number has barely budged. Mehrsa Baradaran pursues this wealth gap by focusing on black banks. She challenges the myth that black banking is the solution to the racial wealth gap and argues that black communities can never accumulate wealth in a segregated economy.

Racism Carter A. Wilson 1996-08-20 This volume in the Sage Series on Race and Ethnic Relations seeks to explain the phenomenon of racism throughout history by drawing on and integrating the massive literature on racism coming out of the economic, political, and cultural realms. In

so doing, author Carter A. Wilson tackles four major goals: first, to help resolve the major debates surrounding racism; second, to demystify racism; third, to provide understanding of how racism has been sustained in various historical eras; and finally, to discuss how racism takes on different forms in various stages of history. This eye-opening volume sheds new light on racism and will be vital to students and professionals in race and ethnic studies, sociology, political science, economics, history, American studies and anthropology.

The Color of Wealth Meizhu Lui 2006 Identifies discriminatory legal practices that benefit white Americans while preventing minorities from participating in government wealth-building programs, sharing the insights of five leading experts on the racial wealth divide to demonstrate the decisive influence of government on the net worth of everyday people. Original.

The Economics of Inequality, Discrimination, Poverty, and Mobility Robert S. Rycroft 2017-09-01 If there was any question before, there is no longer a question today: inequality, discrimination, poverty, and mobility are prominent national issues. The notion of "The American Dream" has been sold to generations of young Americans as the idea that working hard and following your dreams will allow you to break through any barriers in your path and inevitably lead to success. However, recent findings on inequality, discrimination, poverty, and mobility show that "The American Reality" is very different. The second edition of this introductory-level text brings together the essential materials on what economists have to say about these findings and brings students up to date with current thinking. It covers several ground-shattering events, such as: the election of Barack Obama followed by Donald Trump; the passage of the Affordable Care Act and attempts to repeal it; and the publication of Thomas Piketty's *Capital in the 21st Century*, among many others. With an emphasis on data, theory, and policy, this book tackles these issues by exploring three key questions in each chapter: What do the data tell us about what has been happening to the American economy? What are the economic theories needed to understand what has been happening? What are the policy ideas and controversies associated with these economic problems? Key controversies are highlighted in each chapter to drive classroom discussion, and end-of-chapter questions develop student understanding. This clearly written text is ideally suited to a wide variety of courses on contemporary economic conditions, inequality, and social economics in the United States.

The Economics of Inequality, Poverty, and Discrimination in the 21st Century: Solutions 2013

The Wealth of Races Richard F. America 1990-08-24 This collection of essays examines the question of how injustices of the past affect entire groups of people today and outlines the current beneficiaries of these injustices. Although discriminatory practices can be based on ethnicity, religion, and gender, this book focuses on one important type--racial discrimination--and deals with the way it affects both blacks and whites. The authors address the question from different perspectives and, although there is no real consensus as to what extent unjust enrichments currently exist because of past discrimination, the focus of several essays is on the need to systematically and equitably redistribute wealth. In beginning to explore these questions, the volume addresses the larger issues of how the costs and benefits of past practices can be measured and how historical injustices should affect current public policy matters. The volume is organized in a straightforward manner intended to create an integrated discussion. An introductory essay charts the development of the project and offers a summary and critique of each essay. The first section explores the issue of slavery and current policy and considers the caution required when developing policy based on disputed models and assumptions. The second section examines the economic impact of slavery and discrimination on the functioning of the labor market. In the final section, some of the implications of redistribution policies are considered in relation to the various cost and benefit analyses. A final essay and conclusion sum up the study and outline the broad policy setting in which this work can take place. The book will be an important resource for courses in history, sociology, and public policy and an important addition to public and university libraries.

The Closing Door Gary Orfield 1993-11 *The Closing Door* is the first major critique of the effect of conservative policies on urban race and poverty in the 1980s. Atlanta, with its booming economy, strong elected black leadership, and many highly educated blacks, seemed to be the perfect site for those policies and market solutions to prove themselves. Unfortunately, not only did expected economic opportunity fail to materialize but many of the hard-won gains of the civil rights movement

were lost. Orfield and Ashkinaze painstakingly analyze the evidence from Atlanta to show why black opportunity deteriorated over the 1980s and outline possible remedies for the damage inflicted by the Reagan and Bush administrations. "The Closing Door is a crucial breath of fresh air . . . an important and timely text which will help to alter the 'underclass' debate in favor of reconsidering race-specific policies. Orfield and Ashkinaze construct a convincing argument with which those who favor 'race-neutrality' will have to contend. In readable prose they make a compelling case that economic growth is not enough."—Preston H. Smith II, *Transition*

The Economics of Inequality, Poverty, and Discrimination in the 21st Century Robert S. Rycroft

Race and the War on Poverty Robert Bauman 2022-08-16 President Lyndon B. Johnson's War on Poverty did more than offer aid to needy Americans; in some cities, it also sparked both racial conflict and cooperation. *Race and the War on Poverty* examines the African American and Mexican American community organizations in Los Angeles that emerged to implement War on Poverty programs. It explores how organizers applied democratic vision and political savvy to community action, and how the ongoing African American, Chicano, and feminist movements in turn shaped the contours of the War on Poverty's goals, programs, and cultural identity. Robert Bauman describes how the Watts riots of 1965 accelerated the creation of a black community-controlled agency, the Watts Labor Community Action Committee. The example of the WLCAC, combined with a burgeoning Chicano movement, inspired Mexican Americans to create The East Los Angeles Community Union (TELACU) and the Chicana Service Action Center. Bauman explores the connections that wove together the War on Poverty, the Watts revolt, and local movements in ways that empowered the participants economically, culturally, and politically. Although heated battles over race and other cultural issues sometimes derailed the programs, these organizations produced lasting positive effects for the communities they touched. Despite Nixon-era budget cuts and the nation's turn toward conservatism, the War on Poverty continues to be fought today as these agencies embrace the changing politics, economics, and demographics of Los Angeles. *Race and the War on Poverty* shows how the struggle to end poverty evolved in ways that would have surprised its planners, supporters, and detractors—and that what began as a grand vision at the national level continues to thrive on the streets of the community.

Race and Poverty John F. Kain 1969

Economics, Bureaucracy, and Race Judith Russell 2004 This is a hard-hitting analysis of the war on poverty in the United States. The book focuses on the genesis of the Economic Opportunity Act in the 1960s which constituted the core of the antipoverty crusade of President Kennedy and President Johnson.

Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The Economics of Discrimination Gary S. Becker 2010-08-15 This second edition of Gary S. Becker's *The Economics of Discrimination* has been expanded to include three further discussions of the problem and an entirely new introduction which considers the contributions made by others in recent years and some of the more important problems remaining. Mr. Becker's work confronts the economic effects of discrimination in the market place because of race, religion, sex, color, social class, personality, or other non-pecuniary considerations. He demonstrates that discrimination in the market place by any group

reduces their own real incomes as well as those of the minority. The original edition of *The Economics of Discrimination* was warmly received by economists, sociologists, and psychologists alike for focusing the discerning eye of economic analysis upon a vital social problem—discrimination in the market place. "This is an unusual book; not only is it filled with ingenious theorizing but the implications of the theory are boldly confronted with facts. . . . The intimate relation of the theory and observation has resulted in a book of great vitality on a subject whose interest and importance are obvious."—M.W. Reder, *American Economic Review* "The author's solution to the problem of measuring the motive behind actual discrimination is something of a tour de force. . . . Sociologists in the field of race relations will wish to read this book."—Karl Schuessler, *American Sociological Review*

A Different Vision Thomas D Boston 2002-01-04 *A Different Vision: Race and Public Policy, Volume 2* brings together for the first time the ideas, philosophies and interpretations of North America's leading African American economists. Presented in two volumes, Volume 2 includes: * an analysis of urban poverty * discusses aspects of racial inequality and public policy * examines the theory and method which underlies public policy

Poverty and Discrimination Kevin Lang 2011-02-11 Many ideas about poverty and discrimination are nothing more than politically driven assertions unsupported by evidence. And even politically neutral studies that do try to assess evidence are often simply unreliable. In *Poverty and Discrimination*, economist Kevin Lang cuts through the vast literature on poverty and discrimination to determine what we actually know and how we know it. Using rigorous statistical analysis and economic thinking to judge what the best research is and which theories match the evidence, this book clears the ground for students, social scientists, and policymakers who want to understand—and help reduce—poverty and discrimination. It evaluates how well antipoverty and antidiscrimination policies and programs have worked—and whether they have sometimes actually made the problems worse. And it provides new insights about the causes of, and possible solutions to, poverty and discrimination. The book begins by asking, "Who is poor?" and by giving a brief history of poverty and poverty policy in the United States in the twentieth century, including the Welfare Reform Act of 1996. Among the topics covered are the changing definition of poverty, the relation between economic growth and poverty, and the effects of labor markets, education, family composition, and concentrated poverty. The book then evaluates the evidence on racial discrimination in areas such as education, employment, and criminal justice, as well as sex discrimination in the labor market, and assesses the effectiveness of antidiscrimination policies. Throughout, the book is grounded in the conviction that we must have much better empirical knowledge of poverty and discrimination if we hope to reduce them.

The Hidden Rules of Race Andrea Flynn 2017-09-08 This book explores the racial rules that are often hidden but perpetuate vast racial inequities in the United States.

Economics of Racism II Victor Perlo 1996 A completely new edition. Reexamines the facts and explores their new dimensions, the issues and remedies for the 1990s and the next millennium.

Black-White Income Differentials Stanley H. Masters 1975 Monograph on income differentials between whites and Blacks in urban areas in the USA, including statistical analysis - examines economic theories of discrimination, the effects of internal migration and racial segregation in housing on income differentials, differences in labour productivity by race, etc., presents policy recommendations concerning equal opportunity in employment and education, and concludes that labour market discrimination is most important in causing income differentials. References and statistical tables.

Racial and Ethnic Economic Inequality Samuel L. Myers 2006 In a world where racial tensions and racial and ethnic inequality seem to be increasing, it is instructive to look back over the decade of the 1990s to examine what academic researchers have had to say about the global nature of race, racism, and racial inequality. Almost every country with a multiethnic population faces these problems. This collection of essays provides an eclectic but accessible mix of readings on perspectives from such countries as Australia, Russia, France, Chile, West Africa, India, and the United States. Emphasis is placed on positive strategies to help reduce or eliminate economic inequality. The implications for the demise of affirmative action programs are also discussed. Pre-dating the United Nation's World Conference on Racism, the readings anticipate many of the recommendations and insights that have now come to be the core of international strategies. This collection will prove valuable to all those

concerned with ending racism and achieving racial and ethnic economic equality.

At the Edge of the Economy Lawrence B. Morse 1973

The Colors of Poverty Ann Chih Lin 2010-09 Given the increasing diversity of the nation—particularly with respect to its growing Hispanic and Asian populations—why does racial and ethnic difference so often lead to disadvantage? In *The Colors of Poverty*, a multidisciplinary group of experts provides a breakthrough analysis of the complex mechanisms that connect poverty and race. *The Colors of Poverty* reframes the debate over the causes of minority poverty by emphasizing the cumulative effects of disadvantage in perpetuating poverty across generations. The contributors consider a kaleidoscope of factors that contribute to widening racial gaps, including education, racial discrimination, social capital, immigration, and incarceration. Michèle Lamont and Mario Small grapple with the theoretical ambiguities of existing cultural explanations for poverty disparities. They argue that culture and structure are not competing explanations for poverty, but rather collaborate to produce disparities. Looking at how attitudes and beliefs exacerbate racial stratification, social psychologist Heather Bullock links the rise of inequality in the United States to an increase in public tolerance for disparity. She suggests that the American ethos of rugged individualism and meritocracy erodes support for antipoverty programs and reinforces the belief that people are responsible for their own poverty. Sociologists Darren Wheelock and Christopher Uggen focus on the collateral consequences of incarceration in exacerbating racial disparities and are the first to propose a link between legislation that blocks former drug felons from obtaining federal aid for higher education and the black/white educational attainment gap. Joe Soss and Sanford Schram argue that the increasingly decentralized and discretionary nature of state welfare programs allows for different treatment of racial groups, even when such policies are touted as "race-neutral." They find that states with more blacks and Hispanics on welfare rolls are consistently more likely to impose lifetime limits, caps on benefits for mothers with children, and stricter sanctions. *The Colors of Poverty* is a comprehensive and evocative introduction to the dynamics of race and inequality. The research in this landmark volume moves scholarship on inequality beyond a simple black-white paradigm, beyond the search for a single cause of poverty, and beyond the promise of one "magic bullet" solution. A Volume in the National Poverty Center Series on Poverty and Public Policy

The Economics of Inequality, Poverty, and Discrimination in the 21st Century: Solutions 2013 "Leading scholars examine the conflicting paradigms of affluence and destitution in the United States—as well as other free societies—and discuss the influence of education, race, and status on economic mobility." -- Provided by publisher.

Race and Social Problems Ralph Bangs 2014-09-18 As much as Americans believe in the promise of an egalitarian, color-blind society, the reality is far from that ideal. People of color consistently lag behind their white counterparts in key quality-of-life areas. Despite many significant gains, widespread structural inequalities continue to exist and thrive. *Race and Social Problems* takes the long view of this state of affairs, offering both multi-level analysis and a practical blueprint for social justice. It begins by explaining how race-related social problems have changed over the decades. This volume identifies factors contributing to their persistence in this century, most notably the central role of economic disparities in exacerbating related social problems and replicating them for future generations. The chapters expand on this knowledge by detailing innovative and successful strategies for addressing aspects of six major areas of inequality: Poverty: challenging standard American concepts of poverty. Education: approaches toward closing the achievement gap. Intergroup relations: enhancing race dialogues. Family and lifespan: programs targeting families, youth, and elderly. Criminal justice: reducing incarceration and increasing public safety. Health and mental health: promoting positive outcomes. *Race and Social Problems* casts a wide net across the most pressing social issues, clarifying both the immediate and larger tasks ahead for a range of professionals in such diverse fields as social work, anthropology, communications, criminology, economics, history, law, political science, psychology, public health, and sociology.

Discrimination and Disparities Thomas Sowell 2019-03-05 An enlarged edition of Thomas Sowell's brilliant examination of the origins of economic disparities Economic and other outcomes differ vastly among individuals, groups, and nations. Many explanations have been offered for the differences. Some believe that those with less fortunate outcomes are victims of genetics. Others believe that those who are less fortunate are victims of the more fortunate. Discrimination and Disparities gathers a wide array of empirical evidence to challenge the idea that different economic outcomes can be explained by any one factor, be it discrimination, exploitation, or genetics. This revised and enlarged edition also analyzes the human consequences of the prevailing social vision of these disparities and the policies based on that vision--from educational disasters to widespread crime and violence.

[The Economics of Black America](#) Harold G. Vatter 1972

Essays on the Economics of Discrimination Emily P. Hoffman 1991 Collection of essays examining labour market discrimination, the impact of laws and policies, the treatment of children compared to the elderly, discrimination within the family, the economic underclass, and the treatment of minority members of society.

The Economics of Inequality, Poverty, and Discrimination in the 21st Century [2 volumes] Robert S. Rycroft 2013-03-07 Leading scholars examine the conflicting paradigms of affluence and destitution in the United States—as well as other free societies—and discuss the influence of education, race, and status on economic mobility. While recent catastrophic events in New Orleans and Haiti may have magnified issues of social inequity, leaders have debated over poverty and discrimination for decades. Are the poor disadvantaged by the institutions of society or by the choices they make? Through two insightful volumes, the author examines differing academic and political perspectives to help shed light on the causes of poverty and inequality; the role that gender, race, age, or sexual preference plays in determining opportunity; and the effectiveness of current social and economic policies in balancing the inequity among disparate groups. The Economics of Inequality, Poverty, and Discrimination in the 21st Century consists of 2 volumes containing 32 papers divided into 5 categories: measurement, inequality and mobility, institutions and choices, demographic groups and discrimination, and policy. The papers—written by economists, sociologists, philosophers and lawyers—deal with the extent of inequality in the United States and how it compares to other countries, and the newly emerging evidence on the relationship between inequality and mobility within a society.
