2011-07-15 WRANGLERS & Lace

READY...SET...MARRIAGE! It seemed everyone wanted to marry handsome, wealthy Logan Kincaid. Everyone except Merrie Foster, his make-believe bride-to-be. Well, that was fine by Logan. Playing the enamored groom to Merrie's blushing bride was only a means of avoiding the stampede of would-be wives. Because the last thing Logan wanted was marriage. Or so he thought. Suddenly spending all his days—and his nights—with pretty Merrie on her family's Montana ranch was way too appealing. Heck, if this confirmed bachelor didn't watch out, he would be making a mad dash to the altar himself—with a certain spitfire redhead who'd wound her way around his heart.... Hard to tame—impossible to resist—these cowboys meet their perfect match!

**Atmospheric Processes** James Hanwell  
2019-10-28 Originally published in 1980, this book is an original approach to the study of the atmosphere at A Level and introductory undergraduate courses. A true understanding of the way the atmosphere works is only attainable on a firm basis of science and the book concentrates on this aspect in a clear and straightforward manner without introducing advanced mathematics. The book discusses the atmosphere in terms of a machine fuelled by the Sun and it deals with the energy involved in global circulations before looking at local processes and finally global patterns. With a clear recognition of the vulnerability of climate to our wellbeing on a global scale, this book remains as relevant now as when it was first published.

**Sultry Climates** Ian Littlewood 2008-12-15

Here, said the reviewer for Salon.com, is a book that is "lively and accessible and erudite...the perfect companion for anyone who wouldn't be caught dead with an airport paperback-though I wouldn't want to wager which one provides more juice." Historically, the sexual motives of travel have rarely been spelled out in travel guides and brochures. *Sultry Climates* is an alternative history of tourism, made up of precisely the details that usually go unmentioned. As Ian Littlewood demonstrates with dazzling elegance and wit, if we want to make sense of the celebrated "Grand Tour" of the nineteenth and early twentieth centuries, for example, it's as important to take account of travelers' visits to Dresden streetwalkers and Venetian courtesans as it is to reckon with their visits to the Dresden picture gallery and the Doge's Palace. From Byron in Greece to Isherwood in Germany, from American expatriates on the Left Bank to Orton in Morocco and right up to the present day, what emerges from these experiences is a continuing motif of tourism, previously neglected or ignored-"a breathless book, a Grand Tour in and of itself" (Los Angeles Times).

*Thermal Comforts Properties of Knitted Fabrics Produced from Bamboo blended yarns* Dr.

Shivaraj R Kulkarni 2020-12-18 INTRODUCTION This chapter is concerned with the general

introduction, importance of thermal comfort and need for research on it. The objectives of the study and organization of the thesis are discussed. Importance of Blending Natural fibres and their blends with classic fibres bear valuable properties and so at present there are various products made of these fibres. It is observed that in respect of properties like the absorption and discharge of moisture, non-irritating, antibacterial, and anti-allergic characteristics, protection against the sun's harmful ultra-violet rays and other valuable properties, blended yarns are better than classical yarns. Hence, they may be used for clothing, underwear, socks, and hygienic textile products as well as for composites. In the cotton spinning process, blending has the objective of producing yarn with acceptable quality and reasonable cost. A good quality blend requires the use of adequate machines, objective techniques to select bales and knowledge of its characteristics. Knowledge of the importance of blended products in the textile industry and the generally rising costs of production make the achievement of economic and good quality blends with different kinds of cotton more and more critical (Azzouz et al 2008).
