history I hope everyone will read.” —Henry Louis Gates, Jr., author of *The Black Church: This Is Our Story, This Is Our Song* The events of that day are now tragically familiar: on May 25, 2020, George Floyd became the latest Black person to die at the hands of the police, murdered outside of a Minneapolis convenience store by white officer Derek Chauvin. The video recording of his death set off the largest protest movement in the history of the United States, awakening millions to the pervasiveness of racial injustice. But long before his face was painted onto countless murals and his name became synonymous with civil rights, Floyd was a father, partner, athlete, and friend who constantly strove for a better life. *His Name Is George Floyd* tells the story of a beloved figure from Houston's housing projects as he faced the stifling systemic pressures that come with being a Black man in America. Placing his narrative within the context of the country's enduring legacy of institutional racism, this

deeply reported account examines Floyd's family roots in slavery and sharecropping, the segregation of his schools, the overpolicing of his community amid a wave of mass incarceration, and the callous disregard toward his struggle with addiction—putting today's inequality into uniquely human terms. Drawing upon hundreds of interviews with Floyd's closest friends and family, his elementary school teachers and varsity coaches, civil rights icons, and those in the highest seats of political power, Washington Post reporters Robert Samuels and Toluse Olorunnipa offer a poignant and moving exploration of George Floyd's America, revealing how a man who simply wanted to breathe ended up touching the world.

Death in Slow Motion Eleanor Cooney 2013-02-26 A raw, unsentimental and passionately written memoir about trying to care for a parent with Alzheimer's When her once-glamorous and witty novelist-mother got Alzheimer's, Eleanor Cooney moved her

from her beloved Connecticut home to California in order to care for her. In tense, searing prose, punctuated with the blackest of humor, Cooney documents the slow erosion of her mother's mind, the powerful bond the two shared, and her own descent into drink and despair. But the coping mechanism that finally serves this eloquent writer best is writing, the ability to bring to vivid life the memories her mother is losing. As her mother gropes in the gathering darkness for a grip on the world she once loved, succeeding only in conjuring sad fantasies of places and times with her late husband, Cooney revisits their true past. Death in Slow Motion becomes the mesmerizing story of Eleanor's actual childhood, straight out of the pages of John Cheever; the daring and vibrant mother she remembers; and a time that no longer exists for either of them.

The Middle Class in Neoliberal China Hai Ren 2013

Investigating the new politics of the middle class in China, this book addresses three major questions. First, how does the Chinese state deal with problems of national sovereignty and political representation to create the middle class both as a legitimate category of the people and as an ideal norm of citizenship? Second, how does the recognition of the middle class norm take place in the practice of everyday life? Finally, what kind of risks does the politics of the middle class generate not only for middle class subjects but also for the disenfranchised? In answering these questions, this book examines a set of practices, bodies of knowledge, measures, and institutions that aim to manage, govern, control, and orient the behaviours, gestures, and

thoughts of Chinese citizens.

Power Relations in Nigeria Ann O'Hear 1997 This is the first study of slavery and its legacy in the Yoruba and incompletely Islamicised periphery of the Sokoto caliphate and of northern Nigeria. It shows the decline of slavery and the emergence of a small-scale peasantry at the end of the nineteenth century, and takes the story into the late-colonial and post-independence periods. Focusing on Ilorin, the city and emirate on the southern fringe of the caliphate, now in Nigeria, it shows how relations between the city elite and the ex-slaves and peasants they controlled have fluctuated during the long process of oppression and reaction. ANN O'HEAR is Co-ordinator of Intercultural Studies at Niagara University, New York.

Freedom Burning Richard
Huzzey 2012-08-22 After
Britain abolished slavery
throughout most of its empire
in 1834, Victorians adopted a
creed of "anti-slavery" as a vital
part of their national identity
and sense of moral superiority
to other civilizations. The
British government used
diplomacy, pressure, and
violence to suppress the slave
trade, while the Royal Navy
enforced abolition worldwide
and an anxious public debated
the true responsibilities of an
anti-slavery nation. This
crusade was far from altruistic
or compassionate, but Richard
Huzzey argues that it forged
national debates and political
culture long after the famous
abolitionist campaigns of
William Wilberforce and
Thomas Clarkson had faded
into memory. These anti-

slavery passions shaped racist
and imperialist prejudices, new
forms of coerced labor, and the
expansion of colonial
possessions. In a sweeping
narrative that spans the globe,
Freedom Burning explores the
intersection of philanthropic,
imperial, and economic
interests that underlay
Britain's anti-slavery zeal- from
London to Liberia, the Sudan to
South Africa, Canada to the
Caribbean, and the British East
India Company to the
Confederate States of America.
Through careful attention to
popular culture, official
records, and private papers,
Huzzey rewrites the history of
the British Empire and a
century-long effort to end the
global trade in human lives.

Food and Nutrition P.K. Newby 2018-08-07 From gluten-free to all-Paleo, GMOs to grass-fed beef, our newsfeeds abound with nutrition advice. Whether sensational headlines from the latest study or anecdotes from celebrities and food bloggers, we're bombarded with "superfoods" and "best ever" diets promising to help us lose weight, fight disease, and live longer. At the same time, we live in an over-crowded food environment that makes it easy to eat, all the time. The result is an epidemic of chronic disease amidst a culture of nutrition confusion-and copious food choices that challenge everyday eaters just trying to get a healthy meal on the table. But the exhilarating truth is

that scientists know an astounding amount about the power of food. A staggering 80% of chronic diseases are preventable through modifiable lifestyle changes, and diet is the single largest contributing factor. And we also know the secrets to eating sustainably to protect our planet. In *Food & Nutrition*, Harvard- and Columbia-trained nutrition scientist Dr. P.K. Newby examines 134 stand-alone questions addressing "need to know" topics, including how what we eat affects our health and environment, from farm to fork, and why, when it comes to diet, the whole is greater than the sum of its parts-and one size doesn't fit all. At the same time, Newby debunks popular myths and food folklore, encouraging readers to "learn, unlearn, and relearn" the fundamentals of nutrition at the heart of a health-giving diet. Her passion for all things food shines through it all, as does her love of the power of science, technology, and engineering to help create healthier diets for ourselves,

You Call This Art? Patrick Rosenkranz 2008-08-27 If he were alive today, he'd be a superstar. He was that good. But Greg Irons died just as his star was rising. He was only 37 years old when a speeding bus on a busy Bangkok street killed him in 1984. Irons was a psychedelic poster artist, an underground cartoonist, a book illustrator, and an emerging tattoo virtuoso who brought a new sensibility to an age-old art form. This retrospective book spans his whole artistic career, from his earliest dance posters, to his ground breaking science fiction and horror comix, to his innovative and colorful tattoo art. Greg Irons was one of the elite among posters artists who worked for Bill Graham's Fillmore Ballroom in San Francisco during the Age of Aquarius, designing posters for Chuck Berry, Jefferson Airplane, Big Brother, and Paul Butterfield. *You Call This Art?!* reprints his finest psychedelic posters in full-color, as well as complete

comic stories from *Slow Death Funnies*, *Legion of Charlies*, *Deviant Slice*, *Yellow Dog*, *Thrilling Murder*, and many other underground comic books. It also includes rarely seen album cover art for Jerry Garcia, Blue Cheer, Jefferson Starship and other counterculture musicians.

Irons had a third career as an illustrator of children's coloring books, and pages from books including *One Old Oxford Ox*, *Last of the Dinosaurs*, *Pirates*, and *Wyf of Bathe* appear as well. Many examples of his tattoo art are also included.

and he has 100 Test matches under his belt. Now Rudi takes the reader back to some of the highlights of his career in Test, ODI and T20 matches, including several World Cups and Ashes series. From his unique perspective, he rates the cricketers he has umpired over the years - the best batsmen, bowlers and fielders - and gives reasons why they stand out from other players. He shares players' hilarious on-field antics and, on occasion, histrionics. And he doesn't shy away from discussing the controversial side of international cricket, from match fixing to terrorist attacks, while giving his frank and possibly controversial views on the use of technology in the game. Humorous, informative and nostalgic, this is the book every cricket fan will want to own.

Daniel Deronda George Eliot
2021-04-12T21:57:16Z Daniel Deronda, published in 1876, was George Eliot's last novel. It deals with two major characters whose lives

intersect: One is a spoiled young woman named Gwendolen Harleth who makes an unwise marriage to escape impending poverty; the other is the titular character, Daniel Deronda, a wealthy young man who feels a mission to help the suffering. During her childhood Gwendolen's family was well-off. She lived in comfort and was indulged and pampered. But the family's fortune is lost through an unwise investment, and she returns to a life of near-poverty, a change which she greatly resents both for herself and for her widowed mother. The only escape seems to be for her to marry a wealthy older man who has been courting her in a casual, unemotional way. The marriage turns out to be a terrible mistake. Daniel Deronda has been raised by Sir Hugo Mallinger as his nephew, but Daniel has never discovered his true parentage, thinking it likely that he is Sir Hugo's natural son. This consciousness of his probable illegitimacy moves him to kindness and tolerance towards anyone who

is suffering from disadvantage. One evening, while rowing on the river Thames, he spots a young woman about to leap into the water to drown herself. He persuades her instead to come with him for shelter to a family he knows. The young woman turns out to be Jewish, and through his trying to help her find her lost family, Deronda comes into contact with Jewish culture—and in particular with a man named Mordecai, who has a passionate vision for the future of the Jewish race and who sees in Daniel a kindred spirit. The paths that Gwendolen and Daniel follow intersect often, and Daniel's kindly nature moves him to try to offer her comfort and advice in her moments of distress. Unsurprisingly, Gwendolen misinterprets Daniel's attentions. In Daniel Deronda Eliot demonstrates considerable sympathy towards the Jewish people, their culture, and their aspirations for a national homeland. At the time this was an unpopular and even controversial view. A

foreword in this edition reproduces a letter Evans wrote to Harriet Beecher Stowe, defending her stance in this regard. Nevertheless, the novel was a success, and was translated almost immediately into German and Dutch. It is considered to have had a positive influence on Zionist thinkers. Daniel Deronda has been adapted both for film and television, with the 2002 B.B.C. series winning several awards. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Entering the Picture Jill Fields 2012-02-27 In 1970, Judy Chicago and fifteen students founded the groundbreaking Feminist Art Program (FAP) at Fresno State. Drawing upon the consciousness-raising techniques of the women's liberation movement, they created shocking new art forms depicting female experiences. Collaborative work and performance art - including the famous "Cunt Cheerleaders" - were program hallmarks.

Moving to Los Angeles, the FAP produced the first major feminist art installation, *Womanhouse* (1972). Augmented by thirty-seven illustrations and color plates, this interdisciplinary collection of essays by artists and scholars, many of whom were eye witnesses to landmark events, relates how feminists produced vibrant bodies of art in Fresno and other locales where similar collaborations flourished. Articles on topics such as African American artists in New York and Los Angeles, San Francisco's Las Mujeres Muralistas and Asian American Women Artists Association, and exhibitions in Taiwan and Italy showcase the artistic trajectories that destabilized traditional theories and practices and reshaped the art world. An engaging editor's introduction explains how feminist art emerged within the powerful women's movement that transformed America. *Entering the Picture* is an exciting collection about the provocative contributions of

feminists to American art.

Wrongful Convictions and the DNA Revolution Daniel S. Medwed 2017-03-30 For centuries, most people believed the criminal justice system worked - that only guilty defendants were convicted. DNA technology shattered that belief. DNA has now freed more than three hundred innocent prisoners in the United States. This book examines the lessons learned from twenty-five years of DNA exonerations and identifies lingering challenges. By studying the dataset of DNA exonerations, we know that precise factors lead to wrongful convictions. These include eyewitness misidentifications, false confessions, dishonest informants, poor defense lawyering, weak forensic evidence, and prosecutorial misconduct. In Part I, scholars discuss the efforts of the Innocence Movement over the past quarter century to expose

Singapore's Future Heng

Chee Chan 2021-02-05

Professor Chan Heng Chee is the Institute of Policy Studies' 7th S R Nathan Fellow for the Study of Singapore. This book is an edited collection of her three IPS-Nathan Lectures, delivered between June and July 2020, and includes highlights of her question-and-answer segments with our virtual audience. Professor Chan analyses the uncertain and fast-changing world, and Singapore's place in it. She examines the major fault lines today, wrought by the sudden COVID-19 pandemic, the ongoing malfunctioning of democracies and capitalist economies, and the unravelling of the world order. The United States-China rivalry has continued to intensify, with

ripple effects on the world order, global trade and technology. Singapore will need to navigate this evolving relationship skilfully, while adapting its governance and economic models to respond to other challenges. But is it all doom and gloom for Singapore? Could our circumstances help us as we approach the new normal that lies ahead of us? The IPS-Nathan Lecture series was launched in 2014 as part of the S R Nathan Fellowship for the Study of Singapore. It seeks to advance public understanding and discussion of issues of critical national interest for Singapore.

Immigration Policy from 1970 to the Present Rachel Stevens
2016-02-19 This book examines national debates on immigration, asylum seekers and guest worker programs from 1970 to the present. Over the past 45 years, contemporary immigration has had a profound impact throughout North America, Europe and Australasia, yet the admission of ethnically diverse immigrants was far from inevitable. In the midst of significant social change, policymakers grappled with fundamental questions: what is the purpose of immigration in an age of mass mobility? Which immigrants should be selected

and potentially become citizens and who should be excluded? How should immigration be controlled in an era of universal human rights and non-discrimination? Stevens provides an in-depth case study comparison of two settler societies, Australia and the United States, while drawing parallels with Europe, Canada and New Zealand. Though contemporary immigration history that focuses on one national setting is well established, this book is unique because it actively compares how a number of societies debated vexing immigration policy challenges. The book also explores the ideas, values and principles that underpin this contentious area of public policy, and in doing so permits a broader understanding of contemporary immigration than outlining policies alone.

Canada is seen to be a murky and perplexing world that has become an important public issue and has significant policy implications for government spending. Aboriginal land policy in Canada began as an Aboriginal initiative. In *No Place for Fairness*, David McNab - a long time advisor on land and treaty rights for both government and First Nations groups - looks at the Bear Island Indigenous rights case, initiated by the Temagami Anishinabe, to explore why governments fail to deal effectively with Aboriginal land claims. The book, divided into two sections, includes a survey of the historical background of the Bear Island claim followed by a more personal series of reflections about what happened as the claim encountered decades of policy hurdles, court cases, public protests, and above all resistance by the Temagami First Nation. McNab provides details of how ministers and their senior officials resisted real efforts to resolve problems as well as examples of field

staff resisting government attempts at resolution. He also shows that government entities such as the Indian Commission of Ontario and the Native Affairs Directorate were largely used as "mailboxes" where successive federal and provincial governments sent things they wanted to bury. *No Place for Fairness* is the story of what happens when Aboriginal peoples' political rights are crammed into the Euro-Canadian legal system. McNab makes a clear case that a legalistic approach to these problems is wholly inadequate and that more important things - like fairness - must be recognized as paramount if a just and lasting Aboriginal land policy is to be created.

Rubble Jeff Byles 2007-12-18
From the straight boulevards that smashed their way through rambling old Paris to create the city we know today to the televised implosion of Las Vegas casinos to make room for America’s ever grander desert of dreams, demolition has long played an ambiguous role in our lives. In lively, colorful prose, Rubble rides the wrecking ball through key episodes in the world of demolition. Stretching over more than five hundred years of razing and toppling, this story looks back to London’s Great Fire of 1666, where self-deputized wreckers artfully blew houses apart with barrels of gunpowder to halt the furious blaze, and spotlights the advent of dynamite—courtesy of demolition’s patron saint, Alfred Nobel—that would later fuel epochal feats of unbuilding such as the implosion of the infamous Pruitt-Igoe housing

complex in St. Louis. Rubble also delves beyond these bravura blasts to survey the world-jarring invention of the wrecking ball; the oddly stirring ruin of New York’s old Pennsylvania Station, that potent symbol of the wrecker run amok; and the ever busy bulldozers in places as diverse as Detroit, Berlin, and the British countryside. Rich with stories of demolition’s quirky impresarios—including Mark Loizeaux, the world-famous engineer of destruction who brought Seattle’s Kingdome to the ground in mere seconds—this account makes first-hand forays to implosion sites and digs extensively into wrecking’s little-known historical record. Rubble is also an exploration of what happens when buildings fall, when monuments topple into memory, and when “destructive creativity” tears down to build again. It unearths the world of demolition for the first time and, along the way, throws a penetrating light on the role that destruction must play in

our lives as a necessary prelude to renewal. Told with arresting detail and energy, this tale goes to the heart of the scientific, social, economic, and personal meaning of how we unbuild our world. Rubble is the first-ever biography of the wrecking trade, a riveting, character-filled narrative of how the black art of demolition grew to become a multibillion-dollar business, an extreme spectator sport, and a touchstone for what we value, what we disdain, who we were, and what we wish to become.

Philippians Ryan Kelly
2014-07-31 The book of Philippians challenges Christians to remember their true identity as citizens of God's kingdom, especially when faced with difficult circumstances and painful trials. Helping us grasp the Apostle Paul's gospel-centered exhortation to endurance, this guide explains the biblical text with clarity and passion—encouraging us to joyfully imitate Christ in the midst of hardship. Over the course of 12 weeks, these

Slow Death by Rubber Duck

Rick Smith 2010-04-06 Funny, thought-provoking, and incredibly disturbing, *Slow Death by Rubber Duck* reveals that just the living of daily life creates a chemical soup inside each of us. Pollution is no longer just about belching smokestacks and ugly sewer pipes - now, it's personal. The most dangerous pollution has always come from commonplace items in our homes and workplaces. Smith and Lourie ingested and inhaled a host of things that surround all of us all the time. This book exposes the extent to which we are poisoned every day of our lives. For this book, over the period of a week - the

kind of week that would be familiar to most people - the authors use their own bodies as the reference point and tell the story of pollution in our modern world, the miscreant corporate giants who manufacture the toxins, the weak-kneed government officials who let it happen, and the effects on people and families across the globe. Parents and concerned citizens will have to read this book. Key concerns raised in *Slow Death* by Rubber Duck: • Flame-retardant chemicals from electronics and household dust polluting our blood. • Toxins in our urine caused by leaching from plastics and run-of-the-mill shampoos, toothpastes and deodorant. • Mercury in our blood from eating tuna. • The chemicals that build up in our body when carpets and upholstery off-gas. Ultimately hopeful, the book empowers readers with some simple ideas for protecting themselves and their families, and changing things for the better.

Slow Death Zero Jon B. Cooke
2021-04 Hey, gang! Slow

Death, Last Gasp's ultimate horror comix anthology from the hippie days of the underground, is back with a furious vengeance! IN this all-new 50th anniversary collection, a stellar crew of contributors -- some cartoonists from the original eco-funnies days, including Rich Corben, William Stout, Tim Boxell, and Errol McCarthy -- share macabre tales of ecological terror of today's horrifying times!

Queer Terror C. Heike Schotten 2018-08-21 After Sept. 11, 2001, George W. Bush declared, "Either you are with us, or you are with the terrorists." Bush's assertion was not simply jingoist bravado—it encapsulates the civilizationalist moralism that has motivated and defined the United States since its beginning, linking the War on Terror to the nation's settlement and founding. In *Queer Terror*, C. Heike Schotten offers a critique of U.S. settler-colonial empire that draws on political, queer, and critical indigenous theory to situate Bush's either/or

moralism and reframe the concept of terrorism. The categories of the War on Terror exemplify the moralizing politics that insulate U.S. empire from critique, render its victims deserving of its abuses, and delegitimize resistance to it as unthinkable and perverse. Schotten provides an anatomy of this moralism, arguing for a new interpretation of biopolitics that is focused on sovereignty and desire rather than racism and biology. This rethinking of biopolitics puts critical political theory of empire in dialogue with the insights of both native studies and queer theory. Building on queer theory's refusal of sanctity, propriety, and moralisms of all sorts, Schotten ultimately contends that the answer to Bush's ultimatum is clear: dissidents must reject the false choice he presents and stand decisively against "us," rejecting its moralism and the sanctity of its "life," in order to further a truly emancipatory, decolonizing queer politics.

Dispatches from Disabled

Country Catherine Frazee
2023-05-15 Catherine Frazee wants her readers to know that there is far more to disability than most people think or assume. There is much not to like about disability, such as the ways it diminishes status and opportunity, and the ways it requires medical intrusions which, even if lifesaving, are nobody's idea of a good time. As becomes apparent in this powerful collection of writing, there is much more to the story of disabled life. There is adaptation and activism. There is art, philosophy, and history. There is solidarity, identity, collective struggle, and shared culture. Frazee offers a glimpse into a rich and delicate ecology of disability that warrants not fear and pity, but recognition and respect.

Arming Asia Richard Bitzinger
2016-12-19 Bitzinger examines the phenomenon of attempted self-reliance in arms production within Asia, and assesses the extent of success in balancing this independence with the growing requirements of next-generation weapons

systems. He analyzes China, India, Japan, South Korea, and Southeast Asia. The overarching question in the book is whether self-reliance is a strategically viable solution for development and manufacturing of arms. Given the ever-changing dynamics and increasing demand for sophisticated next-generation weaponry, will these countries be able to individually sustain their domestic defense industries and constantly update their technologies? This is the first book to analyze arms production from a regional perspective.
