Islamization in Modern South Asia David Emmanuel Singh 2012-08-31 The religious identity of indegenous Gujjars in the Himilayan region remains largely unexplored. This book argues that their choice to associate with Deobandi Islam occurs in the wider context of conservation debates, local government-led efforts to relocate them from the Rajaji National Park in Uttarakhand, India, and the failure of NGOs to represent their interests. Based on documents and interviews, this detailed work explores both the continuing expansion of Deobandi reform and the responses of the Gujjars. It points toward the role of Islam in integrating marginal groups in South Asia.

Megacity Slums Marie-Caroline Saglio-Yatzimirsky 2013 This book looks at slums and social exclusion in the four major megacities of India and Brazil, and analyzes the interrelationships between urban policies and housing and environmental issues. The challenges posed in Delhi, Mumbai, Rio de Janeiro and Suo Paulo have spurred public reformers into action through housing, rehabilitation and conservation programs. Civil society and the inhabitants of these cities have also begun to get involved. On the other hand, one must wonder whether these challenges were partly created by the deficiencies of these very reformers and civil society, be it their lack of intervention (as advocates of government intervention would argue), or the flaws and inadequacies of their actions (as supporters of the free market would suggest). Are policies alleviating or aggravating social exclusion This book explores these questions and more.

Governance in the Gullies Saumitra Jha 2005 The authors use detailed ethnographic evidence to design and interpret a broad representative survey of 800 households in Delhi's slums, examining the processes by which residents gain access to formal government and develop their own informal modes of leadership. While ethnically homogeneous slums transplant rural institutions to the city, newer and ethnically diverse slums depend on informal leaders who gain their authority through political connections, education, and network entrepreneurship. Education and political affiliation are more important than seniority in determining a leader's influence. Informal leaders are accessible to all slum dwellers, but formal government figures are most accessed by the wealthy and the well-connected.

Community Participation and Slum Housing Vandana Desai 1995-06-12 The study explores the nature of community participation in a Bombay housing project and analyzes the concepts of influence and power in community participation, focusing on the impact of community mobilization on the process of slum upgrading. The study reveals that despite community organization and pro-participation rhetoric in official discourse, most slum-dwellers are excluded from decision- making. Of interest to those in sociology and development studies, and voluntary organizations and international agencies. Acidic paper. Annotation copyright by Book News, Inc., Portland, OR

HOUSING PROBLEMS OF SLUM DWELLERS: A STUDY OF MANGALORE CITY B M Kumara Devi

Analytical Perspective of Pro-poor Slum Upgrading Frameworks 2006

Urban Poverty,Health and Human Development of Slumdwellers Deepak Wankhede 2012-08 The study is mainly concerned with urban poverty of slum dwellers, their present health conditions and Human Development Index of slums of Nagpur city. Urban poverty has been discussed spatially with the help of various parameters. Multi-Dimensional Poverty Index had been work out by applying Multi-Dimensional Index Poverty indicators. Apart from this feature, health condition of slumdwellers was discussed in this book. The third important aspect of study is Human Development Index of the slumdwellers of Nagpur city. The recent methodology of United Nation Organisation and World Bank Report had been employed to calculate the Human Development Index of Nagpur slumdwellers. Human Development Index parameters like Income Index, Life expectancy at Birth and Education Indexes have been calculated separately. HDI of Nagpur was compared with the National HDI of India. The HDI of slums were compared with the HDI of sub Saharan countries. The approach of the study is scientific and rational. The most distinguishing feature of this book is Human Development Index was calculated for exclusively for slums. No other study had highlighted this aspect of slums ever before.

Social Structure and Cultural Practices in Slums Tulshi Kumar Das 2000 Investigates various aspects of Social Structure and Cultural Practices of Slum-dwellers in Dhaka city. It shows that social structure seems to be influencing the cultural life of slum dwellers.

Assessing Benefits of Slum Upgrading Programs in Second-best Settings Basab Dasgupta 2006 "Slum upgrading programs are being used by national and city governments in many countries to improve the welfare of households living in slum and squatter settlements. These programs typically include a combination of improvements in neighborhood infrastructure, land tenure, and building quality. In this paper, the authors develop a dynamic general equilibrium model to compare the effectiveness of alternative slum upgrading instruments in a second-best setting with distortions in the land and credit markets. They numerically test the model using data from three Brazilian cities and find that the performance of in situ slum upgrading depends on the severity of land and credit market distortions and how complementary policy initiatives are being implemented to correct for these problems. Pre-existing land supply and credit market distortions reduce the benefit-cost ratios across interventions, and change the rank ordering of preferred interventions. In the light of these findings, it appears that partial equilibrium analysis used in typical cost-benefit work overstates the stream of net benefits from upgrading interventions and may in fact propose a misleading sequence of interventions. Slum Development in India Sulochana Shekhar 2021 This book is an earnest effort in understanding the slums and their needs by taking a case study of Kalaburagi, India. This study aims to contribute sustainable methodologies to advance the living conditions of slum dwellers and for better execution of slum policies. The core objectives are: 1) mapping the existing slums of Kalaburagi (formerly Gulbarga) city using slum ontology from very high-resolution data and validating the slum map through ground survey and using reliable data; 2) developing a model to understand the factors which are responsible for the present growth as well as to predict the future growth of slums; 3) estimating the housing demand of urban poor and suggesting a suitable site for the rehabilitation program; and 4) suggestions for the better intervention of government policies with special reference to in-situ program. Urban is the future, and slums are its reality. Sustainable development goals are directly and indirectly concerned about the increasing urbanization and the slums. Housing the urban poor and affordable housing to all are the national missions. Practically making these plans successful depends on a deep understanding of urban issues and proper methodology and technology to handle it. The participatory slum mapping, cellular automata slum model, housing demand analysis, and the spatial decision support system demonstrated in the book help in monitoring and managing the slums and thus lead towards a slum-free India.

Slum Dwellers, Curse on Development Anupurna Rathor 2003 The Slum Is A Pervasive Phenomenon Throughout The Developing Countries Of The World. Slum Cannot Be Separated From The Social System In The Urban Life. The Slum Have Created Many Social, Moral And Demographic Problems And The Situation Have Been Further Aggravated Due To Uncontrolled Migration, Unbalanced Distribution Of Income, Inadequate Community Facilities, Lack Of Urban Planning, Absence Of Community Participation And Ineffective Legal Measure. Like A Disease, Slum Seems To Grow And Multiply. Several Factors Contribute Towards The Growth Of Slum In Urban Areas. Number Of Studies Have Indicated That They Have Created Many Social Problems And There Are Many Reasons For Providing A Maximum Desirable Standard Of Living To Each And Every Section Of The Society. The Slum Dwellers Are Deprived Of The Satisfaction Of Even Basic Need Such As Living In Appaling Conditions, It Becomes Duty Of The Social Worker To Scientifically Study And To Suggest Some Measures For Betterment.

Work of SPARC, the National Slum Dwellers Federation and Mahila Milan, The Sheela Patel 2001 *Poverty, Policy and Politics in Madras Slums* Joop W de Wit 1996 Starting from the premise that an integral understanding of all dimensions of urban poverty is essential for the formulation of meaningful urban policies, this book - based on a case study of a slum in Madras - provides a critical but balanced account of the process and impact of urban policy and planning. The author paints a vivid portrait of the urban poor

covering: the culture, praxis and survival problems of slum dwellers; their difficulties in accessing schools and hospitals; the differential impact of slum policies on men and women; and their coping strategies.

Inter-Generational Mobility of Slum Dwellers Kalyany Sankar 2013 Slum-like human settlements are found in almost every town in Kerala, India especially in coastal areas like Thiruvananthapuram which is one of the cities with most true characteristics as of any other slum of metropolitan city. In this book an attempt is made to understand the dynamics of low human development of slums over generations in two Thiruvananthapuram slums taking the cases of Bartonhill Colony and Thekkumudu Bund Colony. The study probed empirically into the question whether there has been an upward socio-economic mobility and identifies the key drivers of upward/downward mobility in the two selected slums. The study indicates that there been very little intra-slum and inter-slums socio-economic mobility. The further it ascertains that vicious circle of low human development in the slums is not due to lack of basic capabilities such as literacy or longevity but because of their inability to translate these gains into upward mobility through which they could have purchased access to tertiary health care, and technical and higher education, which are crucial in maintaining and improving economic and social status of a community.

City of Shadows Supriya Roy Chowdhury 2021-05-31 Alongside debates over rising inequalities, the stubbornness of urban poverty, globally, has emerged as a major academic and policy concern. Urban poverty policy positions are typically framed by paradigms of basic services and welfare. In the backdrop of Bangalore's evolution into India's silicon valley, the book presents research spanning old, inner city slums, new migrant settlements in urban peripheries, slum development projects, and garment export and construction workers, highlighting that intergenerationally, the urban poor remain tied to traditional low paying occupations, or, get incorporated into new urban growth channels (export industries, low end services) under highly unfavourable terms and conditions. Using the concepts of the old and the new poor, to explore channels of inclusion and exclusion, the book underscores that the poor's vulnerabilities are defined by different regimes of informality. Debates on the urban poor's political agency are used to problematize informality's complex relationship to contemporary theories of class.

Slums Alan Mayne 2017-08-15 More than half of the world's population now lives in urban areas, and a billion of these urban dwellers reside in neighborhoods of entrenched disadvantage—neighborhoods that are characterized as slums. Slums are often seen as a debilitating and even subversive presence within society. In reality, though, it is public policies that are often at fault, not the people who live in these neighborhoods. In this comprehensive global history, Alan Mayne explores the evolution and meaning of the word “slum,” from its origins in London in the early nineteenth century to its use as a slur against the favela communities in the lead-up to the Rio Olympics in 2016. Mayne shows how the word slum has been extensively used for two hundred years to condemn and disparage poor communities, with the result that these agendas are now indivisible from the word's essence. He probes beyond the stereotypes of deviance, social disorganization, inertia, and degraded environments to explore the spatial coherence, collective sense of community, and effective social organization of poor and marginalized neighborhoods over the last two centuries. In mounting a case for the word's elimination from the language of progressive urban social reform, *Slums* is a must-read book for all those interested in social history and the importance of the world's vibrant and vital neighborhoods.

FACETS OF CONTEMPORARY HISTORY M. Thilakavathy 2019-06-05 This book “Facets of Contemporary History” is a selection of research papers, presented in the International Conference on Contemporary History which was held on 30th and 31st January 2015. This conference was organized by the Department of History, Tourism and Travel Management, Ethiraj College for Women, Chennai. It gives us great pleasure to put together a selection of the papers for the public in the form of a book in the interest of research. Contemporary History refers to the history of the immediate past or that which can be expected to remain in living memory. While there are areas of history which have branched off from contemporary history such as social history and economic history this conference took a very broad look at contemporary events from not just a historical but also a social science perspective. This Book contains 6 Sections namely Political History, Socio-Cultural History, Gender, Economic History, Environment and Tourism. We would

like to place on record the Management of the college for the moral and financial support extended in the conduct of the Conference and in the production of the book. Thanks are due to our respected Chairman of the Trust Board, Mr. V.M.Muralidharan for all his support and encouragement. Heartfelt thanks are due to Prof.Dr.Karu. Nagarajan Member Secretary, TAMIL NADU STATE COUNCIL FOR HIGHER EDUCATION for their generous financial Assistance towards the conduct of the Conference. We would be failing in our duty if we do not thank the faculty of the Department of History, Tourism and Travel Management for their support and encouragement in the conduct of the Conference.

Squatters as Developers? Vinit Mukhija 2017-03-02 In the mid-1990s, the state government of Maharashtra introduced an innovative strategy of slum redevelopment in its capital city, Mumbai (Bombay). Based on demolishing existing slums and rebuilding on the same sites at a higher density, it is very distinct from the two prevalent conventional strategies with respect to slums in developing countries - slum clearance and slum upgrading. So why did the slum redevelopment strategy originate in Mumbai, and how did it do so? What were the key issues in the implementation of such a project? This critical volume responds to these questions by closely examining one particular redevelopment project over a period of twelve years: the Markandeya Cooperative Housing Society (MCHS). It analyzes the problems faced and the solutions innovated; identifies non-traditional issues often overlooked in housing improvement strategies; reveals the complexities involved in housing production for low-income groups; and combines in-depth empirical research with historical, institutional, spatial and financial perspectives to improve our understanding of complex urban development processes.
