Dirt Bill Buford 2020-05-05 “You can almost taste the food in Bill Buford’s *Dirt*, an engrossing, beautifully written memoir about his life as a cook in France.” —The Wall Street Journal What does it take to master French cooking? This is the question that drives Bill Buford to abandon his perfectly happy life in New York City and pack up and (with a wife and three-year-old twin sons in tow) move to Lyon, the so-called gastronomic capital of France. But what was meant to be six months in a new and very foreign city turns into a wild five-year digression from normal life, as Buford apprentices at Lyon’s best boulangerie, studies at a legendary culinary school, and cooks at a storied Michelin-starred restaurant, where he discovers the exacting (and incomprehensibly punishing) rigueur of the professional kitchen. With his signature humor, sense of adventure, and masterful ability to bring an exotic and unknown world to life, Buford has written the definitive insider story of a city and its great culinary culture.

There’s a reason Alison Green has been called “the Dear Abby of the work world.” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don’t know what to say. Bewilderment David Ferry 2012-09-14 Winner of the 2012 National Book Award for Poetry. To read David Ferry’s *Bewilderment* is to be reminded that poetry of the highest order can be made by the subtlest of means. The passionate nature and originality of Ferry’s prosodic daring works astonishing transformations that take your breath away. In poem after poem, his diction modulates beautifully between plainspoken high eloquence and colloquial vigor, making his distinctive speech one of the most interesting and ravishing achievements of the past half century. Ferry has fully realized both the potential for vocal expressiveness in his phrasing and the way his phrasing plays against—and with—his genius for metrical variation. His vocal phrasing thus becomes an amazingly flexible instrument of psychological and spiritual inquiry. Most poets write inside a very narrow range of experience and feeling, whether in free or metered verse. But Ferry’s use of meter tends to enhance the colloquial nature of his writing, while giving him access to an immense variety of feeling. Sometimes that feeling is so powerful it’s like witnessing a volcanologist taking measurements in the midst of an eruption. Ferry’s translations, meanwhile, are amazingly acclimated English poems. Once his voice takes hold of them they are as bred in the bone as all his other work. And the translations in this book are vitally related to the original poems around them. From *Bewilderment*: October The day was hot, and entirely breathless, so The remarkably quiet remarkably steady leaf fall Seemed as if it had no cause at all. The ticking sound of falling leaves was like The ticking sound of gentle rainfall as They gently fell on leaves already fallen, Or as, when as they passed them in their falling, Now and again it happened that one of them touched One or another leaf as yet not falling, Still clinging to the idea of being summer: As if the leaves that were falling, but not the day, Had read, and understood, the calendar.

#GIRLBOSS Sophia Amoruso 2015-09-29 The New York Times bestseller Sophia Amoruso spent her teens hitchhiking, committing petty theft, and dumpster diving. By twenty-two, she had resigned herself to employment, but was still broke, directionless, and working a mediocre day job she’d taken for the health insurance. Eight years later, she is the founder, CEO, and creative director of *Nasty Gal*, a \$100 million plus online fashion retailer with more than 350 employees. Sophia’s never been a typical CEO, or a typical anything, and she’s written **#GIRLBOSS** for outsiders (and insiders) seeking a unique path to success, even when that path is winding as all hell and lined with naysayers. **#GIRLBOSS** proves that being successful

isn't about how popular you were in high school or where you went to college (if you went to college). Rather, success is about trusting your instincts and following your gut, knowing which rules to follow and which to break.

Value-Based Fees Alan Weiss 2008-11-03 In this thoroughly revised edition of his classic book, Alan Weiss shows how consulting fees are dependent on only two things: value provided in the perception of the buyer and the intent of the buyer and the consultant to act ethically. Many consultants, however, fail to understand that perceived value is the basis of the fee, or that they must translate the importance of their advice into long-term gains for the client in the client's perception. Still others fail to have the courage and the belief system that support the high value delivered to clients, thereby reducing fees to a level commensurate with the consultant's own low self-esteem. Ultimately, says Weiss, consultants, not clients, are the main cause of low consulting fees.

Umfundalai Kariamuwelsh-Asante 1997 Umfundalai, a Kiswahili word meaning "essence" or "essential", is now also the name of an innovative dance technique discovered and developed by the author of this book to enable anyone to perform traditional African dances. In 1970-71, as an eager young student, the author set about organizing the complex multiplicity of rhythms and movements displayed in the various traditional dances still practiced in rural villages throughout the continent of Africa. In the process, she isolated the elements essential to all African dances: the circle (the earliest form of dance, symbol of the unified whole); repetition (a necessary extension of rhythm); rattling and ululation (natural accompaniments of rhythm). She also discovered their wider, social and political symbolism; the unique power inherent in rhythm; the responsibilities inherent in leadership and control; and the political and moral standards inherent in human society. Then, after a crucial, challenging encounter with a master teacher of dance, she delved deeply into the histories, the arts, and the philosophies of successive African civilizations-Pharaonic, Sudanese, Colonial, Diasporic, Post-Colonial, Pre-Independent, and Independent. Now, from the crucible of time and one woman's personal voyage of discovery, there has emerged not only a fresh and vibrant vehicle for the self-expression of a people, but also a powerful political and moral instrument of immense contemporary impact. Umfundalai not only mirrors the rich and variegated African dance aesthetic...it not only incarnates a wealth of African history, philosophy, and art...it actually serves and empowers the dancer, the artist, and the audience by invoking the communal power of African dance to stimulate political and social action. More than a technique, Umfundalai is an organic and exhilarating series of rhythms, movements, and sounds that affirms life's passages (birth, marriage, death, rebirth, etc.), celebrates a holistic system of beliefs and values, and salutes the universal and unifying life force that is Africa's most precious resource.

Foods of Association Nina Lilian Etkin 2009 "We should look for someone to eat and drink with before looking for something to eat and drink." Epicurus This fascinating book examines the biology and culture of foods and beverages that are consumed in communal settings, with special attention to their health implications. Nina Etkin covers a wealth of topics, exploring human evolutionary history, the Slow Food movement, ritual and ceremonial foods, caffeinated beverages, spices, the street foods of Hawaii and northern Nigeria, and even bottled water. Her work is framed by a biocultural perspective that considers both the physiological implications of consumption and the cultural construction and circulation of foods. For Etkin, the foods and beverages we consume are simultaneously biodynamic substances and cultural objects. The book begins with a look at the social eating habits of our primate relatives and discusses our

evolutionary adaptations. It then offers a history of social foods in the era of European expansion, with a focus on spices and decaffeinated cordials. (Of course, there were some powerful physiological consequences of eating foods brought home by returning explorers, and those are considered too—along with consequences for native peoples.) From there, the book describes street food, which is always served in communal settings. Etkin then scrutinizes ceremonial foods and beverages, and considers their pharmacological effects as well. Her extensive examination concludes by assessing the biological and cultural implications of bottled water. While intended primarily for scholars, this enticing book serves up a tantalizing smorgasbord of food for thought.

An Irreverent Curiosity David Farley 2009-07-09 Read David Farley's posts on the Penguin Blog. A tour through the centuries and through a bizarre Italian town in search of an unbelievable relic: the foreskin of Jesus Christ In December 1983, a priest in the Italian hill town of Calcata shared shocking news with his congregation: the pride of their town, the foreskin of Jesus, had been stolen. Some postulated that it had been stolen by Satanists. Some said the priest himself was to blame. Some even pointed their fingers at the Vatican. In 2006, travel writer David Farley moved to Calcata, determined to find the missing foreskin, or at least find out the truth behind its disappearance. Farley recounts how the relic passed from Charlemagne to the papacy to a marauding sixteenth-century German soldier before finally ending up in Calcata, where miracles occurred that made the sleepy town a major pilgrimage destination. Blending history, travel, and perhaps the oddest story in Christian lore, *An Irreverent Curiosity* is a weird and wonderful tale of conspiracy and misadventure.

On Risk Mark Kingwell 2020-10-13 With COVID-19 comes a heightened sense of everyday risk. How should a society manage, distribute, and conceive of it? As we cope with the lengthening effects of the global COVID-19 pandemic, considerations of everyday risk have been more pressing, and inescapable. In the past, everyone engaged in some degree of risky behaviour, from mundane realities like taking a shower or getting into a car to purposely thrill-seeking activities like rock-climbing or BASE jumping. Many activities that seemed high-risk, such as flying, were claimed basically safe. But risk was, and always has been, a fact of life. With new focus on the risks of even leaving the safety of our homes, it's time for a deeper consideration of risk itself. How do we manage and distribute risks? How do we predict uncertain outcomes? If risk can never be completely eliminated, can it perhaps be controlled? At the heart of these questions--which govern everything from waking up each day to the abstract mathematics of actuarial science--lie philosophical issues of life, death, and danger. Mortality is the event-horizon of daily risk. How should we conceive of it?

Global Corruption Report 2006 Transparency International 2005-12-20 TI has once again shown its ability to combine research and policy analysis not just to shine a light on the deeply embedded problems of corruption ... but to propose progressive solutions. Former World Bank President James Wolfensohn on the *Global Corruption Report* In the health sector, corruption is a matter of life or death. It can take many forms: from medical professionals who sell medicines or services that should be freely available, to high-level government officials who embezzle money from health budgets, to pharmaceutical companies that buy influence over research agendas. The impact of corruption is always felt by the end user -- the sick person who is forced to pay over the odds or who is given unsafe, counterfeit medicines. The 2006 edition of Transparency International's *Global Corruption Report* shows the impact that corruption has on health care in rich and poor countries. From high-level bribery in Costa Rica to informal payments in Hungary, case studies from around the world explore the characteristics of the health sector that make it so prone to corruption. In a special section dedicated to corruption in HIV/AIDS, the report warns that the large sums being poured into fighting the world's deadliest diseases need to be safeguarded against abuse. There is also a detailed analysis of the problems of the pharmaceutical system. The report also offers an annual round-up of worldwide developments and tracks major trends in more than 40 countries. *The Global Corruption Report 2006* is the only report of its kind, and is an essential reference source for anyone who wants the latest research on how corruption affects everything from health to education and the oil and gas industries.

Ptolemy's Almagest Ptolemy 1998-11-08 Ptolemy's Almagest is one of the most influential scientific works in history. A masterpiece of technical exposition, it was the basic textbook of astronomy for more than a thousand years, and still is the main source for our knowledge of ancient astronomy. This translation, based on the standard Greek text of Heiberg, makes the work accessible to English readers in an intelligible and reliable form. It contains numerous corrections derived from medieval Arabic translations and extensive footnotes that take account of the great progress in understanding the work made in this century, due to the discovery of Babylonian records and other researches. It is designed to stand by itself as an interpretation of the original, but it will also be useful as an aid to reading the Greek text.

Learning to Think Spatially National Research Council 2005-02-03 Learning to Think Spatially examines how spatial thinking might be incorporated into existing standards-based instruction across the school curriculum. Spatial thinking must be recognized as a fundamental part of K-12 education and as an integrator and a facilitator for problem solving across the curriculum. With advances in computing technologies and the increasing availability of geospatial data, spatial thinking will play a significant role in the information-based economy of the twenty-first century. Using appropriately designed support systems tailored to the K-12 context, spatial thinking can be taught formally to all students. A geographic information system (GIS) offers one example of a high-technology support system that can enable students and teachers to practice and apply spatial thinking in many areas of the curriculum.
